Creating a Life Together Diana Leafe Christian, 2003-01-01 An intentional community is a group of people who have chosen to live or work together in pursuit of a common ideal or vision An ecovillage is a village scale intentional community that intends to create ecological social economic and spiritual sustainability over several generations The 90s saw a revitalized surge of interest in intentional communities and ecovillages in North America the number of intentional communities listed in the Communities Directory increased 60 percent between 1990 and 1995 But only 10 percent of the actual number of forming community groups actually succeeded Ninety percent failed often in conflict and heartbreak After visiting and interviewing founders of dozens of successful and failed communities along with her own forming community experiences the author concluded that the successful 10 percent had all done the same five or six things right and the unsuccessful 90 percent had made the same handful of mistakes Recognizing that a wealth of wisdom were contained in these experiences she set out to distill and capture them in one place Creating a Life Together is the only resource available that provides step by step practical how to information on how to launch and sustain a successful ecovillage or intentional community Through anecdotes stories and cautionary tales about real communities and by profiling seven successful communities in depth the book examines the successful 10 percent and why 90 percent fail the role of community founders getting a group off to a good start vision and vision documents decision making and governance agreements legal options finding financing and developing land structuring a community economy selecting new members and communication process and dealing well with conflict Sample vision documents community agreements and visioning exercises are included along with abundant resources for learning more [Superbia!](#) Dan Chiras, Dave Wann, 2009-03-01 The only book that shows how to transform existing suburbs to create environment and people friendly neighborhoods **The Intentional Christian Community Handbook** David Janzen, 2012-11-01 This is a book that we ve needed for a long long time This is a book for people who long for community and for people who ve found it for young seekers and for old radicals Like a farmer s almanac or a good cookbook it s a guide that doesn t tell you what to do but rather gives you the resources you need to find your way together with friends in the place where you are We couldn t be more grateful to have a book like this And we couldn t be happier to share it with you Shane Claiborne and Jonathan Wilson Hartgrove In the 21st century a new generation of Spirit energized people are searching for a new yet ancient way of life together David Janzen a friend of the New Monasticism movement with four decades of personal communal experience has visited scores of communities both old and new The Intentional Christian Community Handbook shares his wisdom as well as the experience of intentional Christian communities across North America over the last half century **When Technology Fails** Matthew R. Sustainability and Wellbeing Mònica Guillen-Royo,2018-03-29 The idea that we can meet human needs and simultaneously conserve and even enhance the natural environment is an attractive one Since the Brundtland report popularised a definition of sustainable development based on the concept of needs there has been a widespread belief that it should be possible to achieve a good quality of life without compromising natural ecosystems Sustainability and Wellbeing fills a gap in sustainable development studies by drawing on a range of case studies to discuss the challenges and opportunities of using Max Neef s Human Scale Development HSD framework in practice The first section presents the theory and the methodology of HSD in the context of related literature on sustainable development and wellbeing The second section discusses applications of the HSD methodology with three different purposes the design of sustainable development interventions the engagement of researchers with communities or groups of people in sustainability processes and the consolidation of sustainable community initiatives Finally the third reflects on challenges and limitations of using the HSD approach to define strategies for sustainable development and concludes This is an invaluable resource for researchers and postgraduate students in wellbeing sustainability sustainable development and human development

Environmental Anthropology Engaging Ecotopia Joshua Lockyer,James R. Veteto,2013-04-01 In order to move global society towards a sustainable ecotopia solutions must be engaged in specific places and communities and the authors here argue for re orienting environmental anthropology from a problem oriented towards a solutions focused endeavor Using case studies from around the world the contributors scholar activists and activist practitioners examine the interrelationships between three prominent environmental social movements bioregionalism a worldview and political ecology that grounds environmental action and experience permaculture a design science for putting the bioregional vision into action and ecovillages the ever dynamic settings for creating sustainable local cultures

The Routledge Companion to Alternative Organization Martin Parker,George Cheney,Valérie Fournier,Chris Land,2014-01-03 Despite the Great Recession slightly different forms of global capitalism are still portrayed as the only game in town by the vast majority of people in power in the world today Unbridled growth trade liberalisation and competition are advocated as the only or best ways of organizing the contemporary

world Unemployment yawning gaps between rich and poor political disengagement and environmental devastation are too often seen as acceptable side effects of the dominance of neo liberalism But the reality is that capitalism has always been contested and that people have created many other ways of providing for themselves This book explores economic and organizational possibilities which extend far beyond the narrow imagination of economists and management theorists Chapters on co operatives community currencies the transition movement scrounging co housing and much more paints a rich picture of the ways in which another world is not only possible but already taking shape The aim of this companion is to move beyond complaining about the present and into exploring this diversity of organisational possibilities Our starting point is a critical analysis of contemporary global capitalism is merely the opening for thinking about organizing as a form of politics by other means and one that can be driven by the values of solidarity freedom and responsibility This comprehensive companion with an international cast of contributors gives voice to forms of organizing which remain unrepresented or marginalised in organizational studies and conventional politics yet which offer more promising grounds for social and environmental justice It is a valuable resource for students activists and researchers interested in alternative approaches to economy and society in a variety of disciplinary and interdisciplinary fields *Living Sustainably* A. Whitney

Sanford,2017-06-16 In light of concerns about food and human health fraying social ties economic uncertainty and rampant consumerism some people are foregoing a hurried distracted existence and embracing a mindful way of living Intentional residential communities across the United States are seeking the freedom to craft their own societies and live based on the values of nonviolence self sufficiency equality and voluntary simplicity In *Living Sustainably* A Whitney Sanford reveals the solutions that such communities have devised for sustainable living while highlighting the specific choices and adaptations that they have made to accommodate local context and geography She examines their methods of reviving and adapting traditional agrarian skills testing alternate building materials for their homes and developing local governments that balance group needs and individual autonomy *Living Sustainably* is a teachable testament to the idea that new cultures based on justice and sustainability are attainable in many ways Sanford s engaging work demonstrates that citizens can make a conscious effort to subsist in a more balanced harmonious world **Community , The New Conspirators** Tom

Sine,2009-10-25 If you have faith as small as a mustard seed Jesus says in the Gospel of Matthew nothing will be impossible for you That sounds good but does it work in a world where seeds are genetically altered by an impatient few and hard to come by for countless others In a world where the gulf between the very rich and the profoundly poor is constantly growing can a mustard seed faith make any difference And can such a little bit of faith be sustained in a world whose future is so uncertain on so many fronts Tom Sine says yes and he has the audacity to try to prove it in his latest book In *The New Conspirators* Tom surveys the landscape of creative Christianity where streams of renewal are flowing freely from diverse sources The emerging church Contemporary monastic movements The missional church The mosaic movement Individuals
