

The Radial Arm Power Workshop

Eighty percent of all home workshop power tool projects are done with a power saw. Band saws, shapers, jointers, drill presses, sanders, grinders and jig saws account for the other 20%, just in case you were wondering about the outstanding popularity of the power saw.

As yet, far less than 80% of home handymen own a power saw but that day is coming. If you are to judge by the gleam in their collective eye. And when that day comes, the happiest gleams will be in the eyes of radial arm saw owners, DeWalt radial arm saw owners, that is. I've had an eight-inch table saw for years, a very good one, with a tilting arbor that permits the blade to be cranked to any bevel, rather than tilting the table top, an awkward and unsafe practice. But the safety, amazing flexibility and accuracy of the DeWalt radial arm made me an easy convert, even though it did cost a third more than my table saw.

Many handymen admit that they are "a little afraid of a power saw," and I always advise them to stay that way, in the interest of safety. I am, this fear of power saws gave me an obsession for safety. Here are a few of the safety features built into the DeWalt that should appeal to home mechanics who love their hobby but have to use their hands also to make a living at another type of job:

Ignition-type "on-off" key switch.

Top side cutting, with your layout marks visible at all times.

A downward and backward blade action, away from the operator.

Key, controls and elevating knob above the arm, not on or below the table.

The safety guard covers the top of the cutting tool (saw blade, sander, shaper, jointer, etc.) at all times.

The machine fits along the wall of your shop, not in the middle of it.

Lay your piece of wood flat on the saw table, face up (with all your layout or pencil marks clearly visible on it) and draw the blade forward on the radial arm, that's all there is to sawing a

straight line with a DeWalt radial arm saw. Note the sawdust blower, which can be adjusted to direct the sawdust away from the operator.
