Democracy And Multicultural Education Research In Multicultural Education And International Perspe:

Democracy and Multicultural Education Farideh Salili, Rumjahn Hoosain, 2010-04-01 Democratic political systems and the democratic way of life is aspired by most people around the world. Democracy is considered to be morally superior to other forms of political systems as it aspires to secure civil liberties, human rights, social justice, and equality before the law for everyone regardless of their gender, culture, religion, and national origin. Enshrined in democracy is separation of religion and state, fair and competitive elections of leaders according to a country's constitution, which in turn is based on democratic ideals. Democracy aspires for people of different backgrounds to live together with their differences intact but all contributing towards a better life for all. In today's increasingly pluralistic societies, many people of different cultural and national backgrounds are brought together. Many have migrated from countries with autocratic political systems. Some with religions that require them to behave in different ways, others with cultures teaching them values of harmony, collectivism, and conformity as opposed to the culture of their host country emphasizing individualism and cherishing differences. Hence, in multicultural societies, development of pluralistic democracy, a democracy which includes respect for diversity, is essential. A truly multicultural education, which is based on the assumption that different cultures will be equally represented in education, goes a long way towards education for democratic citizenship. Such an education would make students aware of issues of human rights and justice and encourage them to define their own values and ways in which they could contribute to a better world. The aim of this volume is to provide a forum for discussion of how multiple social perspectives and personal values can be brought together on common grounds around matters related to democracy. Contributions from research and scholarly theoretical work as well as presentation of existing creative models of democracy education will be included. Authors from the major democracies will comment on the models and practice of multicultural education in their respective countries to facilitate discussion and learning from each others' experiences. *Routledge International Handbook of Multicultural Education Research in Asia Pacific* Yun-Kyung Cha, Seung-Hwan Ham, Moosung Lee, 2018-03-28 This handbook for educators and researchers consists of an unparalleled set of conceptual essays and empirical studies that advance new perspectives and build empirical ground on multicultural education issues from 10 different selected societies in Asia Pacific. This unique edited book will be a solid resource particularly for graduate students, educators, and researchers involved in multicultural education given its multiple balances in terms of 1) conceptual essays, empirical studies, and practical implications; 2) contributions from emerging scholars, established scholars, and leading scholars in the field; and 3) comprehensive coverage of key subareas in multicultural education. Given the growing need for in-depth understanding of multicultural education issues in the Asia Pacific region where we have witnessed increasing human mobility and interaction across countries and societies, this edited book is the only research-based handbook entirely focusing on multicultural education in Asia Pacific. *The Routledge International Companion to Multicultural Education* James A. Banks, 2006-12-22. The increasing ethnic, racial, cultural, religious, and language diversity in nations throughout the world is forcing educators and policymakers to rethink existing notions of citizenship and nationality. These experts discuss and identify the shared issues and possibilities that exist when educating for national unity and cultural diversity. *Diversity and Citizenship Education: Global Perspectives* presents compelling case studies and examples of successful programs and practices from twelve nations, discusses problems that arise when societies are highly stratified along race, cultural, and class lines, and describes guidelines and benchmarks that practicing educators can use to structure citizenship education programs that balance unity and diversity. The book covers a broad range of issues and includes vital information on such topics as Migration, citizenship and education, The challenge of racialized citizenship in the United States, The contribution of the struggles by Indians and Blacks for citizenship and recognition in Brazil, Crises of citizenship, education and ethnic issues in Germany, Russia, and South Africa, Conflicts between religious and ethnic factions, Diversity, globalization and democratic education. *Multicultural Education* James A. Ochoa-Becker, 2006-12-01 In the first edition of this book published in 1988 Shirley Engle and I offered a broader and more democratic curriculum as an alternative to the

persistent back to the basics rhetoric of the 70s and 80s This curriculum urged attention to democratic practices and curricula in the school if we wanted to improve the quality of citizen participation and strengthen this democracy School practices during that period reflected a much lower priority for social studies Fewer social studies offerings fewer credits required for graduation and in many cases the job descriptions of social studies curriculum coordinators were transformed by changing their roles to general curriculum consultants The mentality that prevailed in the nation s schools was back to the basics and the basics never included or even considered the importance of heightening the education of citizens We certainly agree that citizens must be able to read write and calculate but these abilities are not sufficient for effective citizenship in a democracy This version of the original work appears at a time when young citizens teachers and schools find themselves deluged by a proliferation of curriculum standards and concomitant mandatory testing In the 90s virtually all subject areas including United States history geography economic and civics developed curriculum standards many funded by the federal government Subsequently the National Council for the Social Studies issued the Social Studies Curriculum Standards that received no federal support Accountability captured in the No Child Left Behind Act passed by Congress has become a powerful political imperative that has a substantial and disturbing influence on the curriculum teaching and learning in the first decade of the 21st century
