eSourcing Capability Model For Client Organizations eSCM CL:

eSourcing Capability Model for Client Organizations - eSCM-CL Bill Hefley, Ethel Loesche, 1970-01-01 Note This book is available in several languages French English The eSourcing Capability Model for Client Organizations eSCM CL is the best practices model that enables client organizations to appraise and improve their capability to foster the development of more effective relationships and to better manage these relationships This title helps readers successfully implement a full range of client organization tasks ranging from developing the organization s sourcing strategy planning for sourcing and service provider selection initiating an agreement with service providers managing service delivery and completing the agreement The eSCM CL has been designed to complement existing quality models and sourcing frameworks so that clients can capitalize on their previous improvement efforts and meet mandated requirements ITIL V3 suggests that ITIL be supplemented with eSCM when service management is performed in the context of a sourcing arrangement Developed by The IT Services Qualification Center ITSqc and endorsed by a number of organizations including IAOP International Association of Outsourcing Professionals this title represents a major step forward for professionals looking to implement Best Practice within the Industry **The ESCM-CL V.1.1** William E. Hefley, Ethel A. Loesche, 2006 **eSourcing Capability Model for Client Organizations (eSCM-CL) Annotated Bibliography** Pawan Khera, Bill Hefley, 2009 The eSourcing Capability Model for Client Organizations eSCM CL Hefley 2006a 2006b is a best practices capability model with two purposes 1 to give client organizations guidance that will help them improve their capability across the sourcing life cycle and 2 to provide client organizations with an objective means of evaluating their sourcing capability eSourcing relies on information and communication technologies as an integral part of the service delivery of a sourced service Embedded within any service delivery is the client service provider relationship Client organizations serve as informed customers of these sourcing relationships ensuring that the organization s sourcing activities are directed to meet end user needs provide value for money and achieve the most beneficial outcomes The ultimate success of the eSCM CL model will be demonstrated when model adopters see fewer sourcing relationships that end due to deficiencies in service providers performance more effective and efficient management of service providers better relationships between client organizations and their service providers and increased business value arising from client organization s sourcing activities The eSCM CL was developed by a consortium led by Carnegie Mellon University s Information Technology Services Qualification Center ITSqc This work began in March 2003 with the eSCM CL being released in September 2006 Data collection activities during the model development included an extensive review of the published literature interviews with clients service providers and advisors and multiple workshops with global participation The literature review used to support the design of this model is represented in this Annotated Bibliography and is organized into two sections The first section provides annotated entries that are ordered alphabetically by author s last name In the second section the entries are arranged in a topical bibliography This topical

bibliography is organized into sections addressing existing frameworks and each of the Capability Areas CA of the eSourcing Capability Model for Client Organizations eSCM CL

eSourcing Capability Model for Service Providers eSCM-SP Bill Hefley, Elaine B. Hyder, Keith Heston, Mark Paulk, 2015-01-01 The eSourcing Capability Model for Service Providers eSCM SP is the best practices model that supports sourcing organizations successfully manage and reduce their risks and improve their capabilities across the entire sourcing life cycle. It addresses the critical issues related to IT enabled sourcing eSourcing for both outsourced and in sourced shared services agreements. Each of the Model's 84 Practices is distributed along three easy to follow dimensions: Sourcing Life cycle, Capability Area, and Capability Level, and have been applied in IT BPO and KPO settings. The eSCM SP has been designed to complement existing quality models so that service providers can capitalize on their previous improvement efforts. ITIL V3 suggests that ITIL be supplemented with eSCM when service management is performed in the context of a sourcing arrangement. A series of documents comparing the eSCM SP with other models and standards has been developed. Developed by The IT Services Qualification Center ITSqc and endorsed by a number of organizations including IAOP International Association of Outsourcing Professionals, this title represents a major step forward for professionals looking to implement Best Practice within the Industry.

Implementing Effective IT Governance and IT Management Gad Selig, 2015-02-01 This book is a revised edition of the best selling title Implementing IT Governance ISBN 978 90 8753 119 5. In all enterprises around the world, the issues, opportunities, and challenges of aligning IT more closely with the organization and effectively governing an organization's IT investments, resources, major initiatives, and superior uninterrupted service is becoming a major concern of the Board and executive management. An integrated and comprehensive approach to the alignment, planning, execution, and governance of IT and its resources has become critical to more effectively align, integrate, invest, measure, deploy, service, and sustain the strategic and tactical direction and value proposition of IT in support of organizations. Much has been written and documented about the individual components of IT Governance, such as strategic planning, demand management, program and project management, IT service management, strategic sourcing, and outsourcing, performance management, metrics, compliance, and others. Much less has been written about a comprehensive and integrated approach for IT Business Alignment, Planning, Execution, and Governance. This title fills that need in the marketplace and offers readers structured and practical solutions using the best of the best practices available today. The book is divided into two parts which cover the three critical pillars necessary to develop, execute, and sustain a robust and effective IT governance environment: Leadership, people, organization, and strategy; IT governance's major component processes; and enabling technologies. Each of the chapters also covers one or more of the following action-oriented topics: the why and what of IT strategic planning, portfolio investment management, decision authority, etc. the how of IT Program, Project Management, IT Service Management, including
