Essays On Life Itself By Rosen Robert 1999 Paperback:

Essays on Life Itself Robert Rosen, 2000 Compiling twenty articles on the nature of life and on the objective of the natural sciences this remarkable book complements Robert Rosen's groundbreaking *Life Itself* a work that influenced a wide range of philosophers biologists linguists and social scientists In *Essays on Life Itself* Rosen takes to task the central objective of the natural sciences calling into question the attempt to create objectivity in a subjective world and forcing us to reconsider where science can lead us in the years to come

Darwin's Pharmacy Richard M. Doyle, 2011-10-01 Are humans unwitting partners in evolution with psychedelic plants Darwin's Pharmacy shows they are by weaving the evolutionary theory of sexual selection and the study of rhetoric together with the science and literature of psychedelic drugs Long suppressed as components of the human tool kit psychedelic plants can be usefully modeled as eloquence adjuncts that intensify a crucial component of sexual selection in humans discourse Psychedelic plants seduce us to interact with them building an ongoing interdependence rhetoric as evolutionary mechanism In doing so they engage our awareness of the noosphere or thinking stratum of the earth The realization that the human organism is part of an interconnected ecosystem is an apprehension of immanence that could ultimately benefit the planet and its inhabitants To explore the rhetoric of the psychedelic experience and its significance to evolution Doyle takes his readers on an epic journey through the writings of William Burroughs and Kary Mullis the work of ethnobotanists and anthropologists and anonymous trip reports The results offer surprising insights into evolutionary theory the war on drugs the internet and the nature of human consciousness itself Watch the book trailer <https://www.youtube.com/watch?v=xof-t2cAob4>

American Book Publishing Record, 2000 **Intelligent Environments** P. Droege, 2022-12-05 The promises and realities of digital innovation have come to suffuse everything from city regions to astronomy government to finance art to medicine politics to warfare and from genetics to reality itself Digital systems augmenting physical space buildings and communities occupy a special place in the evolutionary discourse about advanced technology The two *Intelligent Environments* books edited by Peter Droege span a quarter of a century across this genre The second volume *Intelligent Environments Advanced Systems for a Healthy Planet* asks how does civilization approach thinking systems intelligent spatial models design methods and support structures designed for sustainability in ways that could counteract challenges to terrestrial habitability This book examines a range of baseline and benchmark practices but also unusual and even sublime endeavors across regions currencies infrastructure architecture transactive electricity geodesign net positive planning remote work integrated transport and artificial intelligence in understanding the most immediate spatial setting the human body The result of this quest is both highly informative and useful but also critical It opens windows on what must fast become a central and overarching existential focus in the face of anthropogenic planetary heating and other threats and raises concomitant questions about direction scope and speed of that change The volume uses a cross disciplinary approach to exploring digitally enhanced spatially relevant sustainability systems It critically

queries the promise of information technologies and related support systems to help safeguard the habitability of the planet. The new edition is fully updated and reorganized in thematically linked yet stand alone chapters and is referenced to global bodies of knowledge for ease of discovery and access. It includes copious images, maps, diagrams and references to other media to enhance understanding.

Slavoj Zizek and Dialectical Materialism Agon Hamza, Frank Ruda, 2016-01-26. This book is the first volume to bring together the most prominent scholars who work on Slavoj Žižek's philosophy, examining and interrogating his understanding of dialectical materialism. It deserves to be thoroughly and systematically elaborated because it attempts to propose a new foundation for dialectical materialism.

Theistic Evolution Mariusz Tabaczek, 2023-11-02. Deeply rooted in the classical tradition, this book develops a contemporary reimagined proposal of an Aristotelian-Thomistic perspective on theistic evolution.

Telos Stephen Iacoboni, 2022-04-05. Discover the Science of Purpose. Atheistic scientists have lied about humanity's intelligent design for centuries, and their lies have decayed our culture into the social dystopia continually ripening before our eyes. Life and death have purpose, and we belong to all of it, which the ancient Greeks understood as *Telos*, meaning the end as it was intended. Join Dr. Stephen Iacoboni, award-winning cancer specialist, as he recounts his impassioned search to discover humanity's true origin and purpose. Not only does he address in plain, straightforward language how modern science points inextricably to God's hand on earth, but he also reviews the history of western science and philosophy, challenges misguided theories from academic titans such as Aristotle, Newton, and Darwin, addresses complex questions regarding the human soul, equips the nonscientist with a confident understanding of how science validates faith, and helps readers reclaim a profound sense of individual purpose and meaning. The time has come to resurrect ancient biblical truth and restore it to its rightful place. It will be a battle royale for the hearts and minds of our civilization, but the treasure is our spiritual inheritance, the greatest gift we will ever receive.

Morals and the Media, 2nd edition Nicholas Russell, 2011-11-01. Confronted daily with decisions on how to present their stories, what to write and what not to write, journalists and the media are frequently accused of sensationalizing, of choosing to report the bad news, and of misquoting those they interview. In this substantially updated edition of *Morals and the Media*, Nick Russell addresses many of the concerns the public has about the media as he examines why the media behave the way they do. He also discusses how values have been developed and applied and suggests value systems that can be used to judge special situations. This revised edition covers the many changes in the Canadian media in the last decade, including further concentration of media ownership, media convergence, online journalism, the rise of the web log, and the tightening economic pressures on the industry as a whole. While much of the debate in this field has focused on conditions in the United States, Russell points out that the ethical issues that arise in Canada are often substantially different from those in the US. He has also added new Tough Calls at the end of

each chapter inviting readers to test their own ethics in scenarios drawn from real news stories Morals and the Media will be essential reading in journalism courses as well as an important resource for journalists It will also be of interest to the consumers of journalism the readers listeners and watchers who wonder why the media do what they do **Ending the Science Wars** John D. Baldwin, 2015-12-03 The science wars have been raging for decades raising many questions about the power of science Some critics claim that science including social science is merely a social construction that fallible humans have created with words and other symbols If this is true is science as formidable a source of knowledge as most scientists claim Baldwin explains why the edifice of science has robust properties that make it one of the most useful forms of knowledge that humans have ever created although it is not perfect He trenchantly examines all sides of the debate and uses the philosophy of pragmatism to reveal the special characteristics that make science work as well as it does Ending the Science Wars shows how science is far better grounded than its critics claim The book not only helps resolve many current debates about science it is a major contribution for explaining science in terms of a powerful philosophical system This makes the book valuable to scientists in all fields of research and intellectually challenging for science s critics **Arts & Humanities Citation Index** ,2000 **All in All (More or Less)** Walter Jost, 2025-01-07 This book reinvents aspects of the rhetorical tradition as part of a philosophical pluralism oriented to All in Allness Its chapters unfold some of the ethical and intellectual responsibilities philosophy and rhetoric share their commitments toward literature broadly conceived the limited authority of their interpretations and the kinds of judgments they issue in Part One drawing chiefly on Ludwig Wittgenstein and Richard McKeon leverages a central line of argument regarding Rationality in the pragmatism of Robert Brandom Part Two pivots to specific instances of the range of rhetorical argument found in surprising places and in sophisticated arrangements The book as a whole culminates in Part Three where the author demonstrates how ordinary language criticism fruitfully bears on cultural models film drama novels poetry belonging to American Low Modernism **Saturday Review of Literature** ,1925 **Jews of Brooklyn** Ilana Abramovitch, Seán Galvin, 2002 Over 40 historians folklorists and ordinary Brooklyn Jews present a vivid living record of this astonishing cultural heritage 150 illustrations Map *The Natural Law of Cycles* James H. Bunn, 2017-07-28 The Natural Law of Cycles assembles scientific work from different disciplines to show how research on angular momentum and rotational symmetry can be used to develop a law of energy cycles as a local and global influence Angular momentum regulates small scale rotational cycles such as the swimming of fish in water the running of animals on land and the flight of birds in air Also it regulates large scale rotation cycles such as global currents of wind and water James H Bunn introduces concepts of symmetry balance and angular momentum showing how together they shape the mobile symmetries of animals Chapter 1 studies the configurations of animals as they move in a head first direction Chapter 2 shows how sea animals follow currents and tides generated by the rotational cycles of the earth In chapter 3 Bunn explores the biomechanical pace of walking as a partial cycle of rotating limbs On a large scale angular momentum governs

balanced shifts in plate tectonics Chapter 4 begins with an examination of rotational wind patterns in terms of the counterbalancing forces of angular momentum The author shows how these winds augment the flights of birds during migrations A final chapter centres on the conservation of energy as the most basic principle of science Bunn argues that in the nineteenth century the unity of nature was seen in the emergent concept of energy not matter as the source of power including the movements of animals and machines In each chapter Bunn features environmental writers who celebrate mobile symmetries This book will interest students naturalists and advocates of the environmental movement *The Catholic Periodical and Literature Index* ,1999 **Library Journal** ,2000
