Bradley examines the provocative nexus of law religion and the Constitution This collection includes his timely and sometimes controversial writings on capital punishment affirmative action homeschooling criminal law sexual morality and the sanctity of human life Bradley's engaging essays are an important contribution to current ethical thought **Miscellanies: Essays, tracts or addresses, moral & religious** Francis William Newman, 1887 Law, Religion and Love Paul Babe, Vanja-Ivan Savić, 2017-09-01 Increasingly the modern neo liberal world marginalises any notion of religion or spirituality leaving little or no room for the sacred in the public sphere While this process advances the conservative and harmful behaviours associated with some religions and their adherents exacerbate this marginalisation by driving out those who remain religious or spiritual And all of this is seen through the lens of social science which seems to agree that religion remains important if not in spiritual sense at least as a source of folklore and a means of identification religions remain rooted in the societies from which they emerged and the legal systems of many of those societies emerged from religious sources even if those societies remain unwilling to admit that fact In the modern materialistic world of conformity religion is less a source of guidance than a label of identification The world therefore faces two issues First the decreasing level of spirituality in the West widens the gap between worshippers and those who have left their faith eg agnostics and atheists or those who look at religion as a matter of picking and choosing from a range of options And second the strong connections to religion which remain in many nations but which are often misused in the secular public sphere both in the West and internationally In such divided worlds both religious and secular forces tend to lock themselves into closed groupings of pure truth and in so doing increase the level of disagreement in turn producing radicalism In short the modern world is divided in two ways between religious and non religious although some have argued that the non religious secular is itself a form of civil religion and between those subscribing to divergent understandings of the same religious tradition While hyperbolic and histrionic the term culture wars nonetheless best captures what we see happening in the public sphere today The question emerges then how best to accommodate the

democratic principle which posits that the majority should feel that it lives in a society of its own with the human rights principle holding that is necessary to ensure the full protection of the minority's rights How to balance these seemingly opposed principles We are very familiar with the differences that appear between secular and sacred in the modern world yet what of the similarities amongst scriptures and laws which seek to encourage mutual understanding cooperation and even cohabitation Because religion itself is a source of law a set of exhortations or commands as much as a set of rights every major religion offers an approach to encountering the Other in a positive constructive affirming way and it is here that religions reveal much that they have in common This book draws together the work of scholars engaged in exploring the possibilities for a utopian world in the sense fostered by St Thomas More The essays explore those dimensions of religious and civil law where love however that is defined by relevant texts fosters and encourages acceptance of the Other and will offer perspectives on the ways in which religious or civil state law command one to act in the spirit of love Science, Faith, Society: New Essays on the Philosophy of Michael Polanyi Péter Hartl, 2024-04-03 The book is arguably the first comprehensive collection of essays on Michael Polanyi's social political philosophy The essays combine philosophical and historical approaches to show Polanyi's social thought in the context of his epistemology and philosophy of science as well as the 20th century intellectual history This volume appeals to specialists in Michael Polanyi's philosophy political philosophers who are interested in the 20th century political thought mainly conservative liberal political tradition Furthermore it appeals to scholars focusing on the intersections between epistemology and political philosophy *Contractor and Staff Papers Prepared for the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research* United States. National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research, 1976 **Sanctity of Life and Human Dignity** K. Bayertz, 2012-12-06 Sanctity of life and human dignity are two bioethical concepts that play an important role in bioethical discussions Despite their separate history and content they have similar functions in these discussions In many cases they are used to bring a difficult or controversial debate to an end They serve as unquestionable cornerstones of morality as rocks able to weather the storms of moral pluralism This book provides the reader with analyses of these two concepts from different philosophical professional and cultural points of view Sanctity of Life and Human Dignity presents a comparative analysis of both concepts **Encyclopaedia of Religion and Ethics: Suffering-Zwingli** James Hastings, John Alexander Selbie, 1922 Tax Law, Religion, and Justice Allen Calhoun, 2021-03-08 This book asks why tax policy is both attracted to and repelled by the idea of justice Accepting the invitation of economist Henry Simons to acknowledge that tax justice is a theological concept the work explores theological doctrines of taxation to answer the presenting question The overall message of the book is that taxation is an instrument of justice but only when taxes take into account multiple goods in society the requirements of the government the property rights of society's members and the material needs of the poor It is argued that this answer to the presenting question is a theological and ethical answer in that

it derives from the insistence of Christian thinkers that tax policy take into account material human need *necessitas*. Without the *necessitas* component of the tax balance tax systems end up honoring only one of the three components of the tax equation and cease to reflect a coherent idea of justice. The book will be of interest to academics and researchers working in the areas of tax law, economics, theology, and history.

Religious Ethics and Constructivism Kevin Jung, 2018-04-17

In metaethics, there is a divide between those who believe that there exist moral facts independently of human interests and attitudes (i.e. moral realists) and those who don't (i.e. antirealists). In the last half century, the field of religious ethics has been inundated with various antirealist schools of moral thought. Though there is a wide spectrum of different positions within antirealism, a majority of antirealist religious ethicists tend to see moral belief as an historically dependent social construction. This has created an environment where doing religious ethics in any metaphysically substantial sense is often seen not only as out of fashion but also as philosophically implausible. However, there is a lack of clarity as to what antirealists exactly mean by construction and what arguments they would use to support their views. *Religious Ethics and Constructivism* brings together a diverse group of scholars who represent different philosophical and theological outlooks to discuss the merits of constructivism vis-à-vis religious ethics. The essays explore four different kinds of constructivism in metaethics: social or Hegelian constructivism, Kantian constructivism, Humean constructivism, and theological constructivism. The overall aim of these essays is to foster dialogue between religious ethicists and moral philosophers and to open the field of religious ethics to the insights that can be provided by contemporary metaethics.
