Essential Library Of Congress Subject Headings:

Essential Library of Congress Subject Headings Vanda Broughton, 2011-11-20 Library of Congress Subject Headings LCSH are increasingly seen as the English language controlled vocabulary despite their lack of a theoretical foundation and their evident US bias In mapping exercises between national subject heading lists and in exercises in digital resource organization and management LCSH are often chosen because of the lack of any other widely accepted English language standard for subject cataloguing It is therefore important that the basic nature of LCSH their advantages and their limitations are well understood both by LIS practitioners and those in the wider information community Information professionals who attended library school before 1995 and many more recent library school graduates are unlikely to have had a formal introduction to Library of Congress Subject Headings LCSH Paraprofessionals who undertake cataloguing are similarly unlikely to have enjoyed an induction to the broad principles of LCSH This is the first compact guide to LCSH written from a UK viewpoint Key topics include background and history of LCSH subject heading lists structure and display in LCSH form of entry application of LCSH document analysis main headings topical geographical and free floating sub divisions building compound headings name headings headings for literature art music history and law LCSH in the online environment Readership There is a strong emphasis throughout on worked examples and practical exercises in the application of the scheme and a full glossary of terms is supplied No prior knowledge or experience of subject cataloguing is assumed This is an indispensable guide to LCSH for practitioners and students alike **Library of Congress Subject Headings** Library of Congress. Cataloging Policy and Support Office, 2007 **Library of Congress Subject Headings** Library of Congress, 2007 **Guide to Reference in Essential General Reference and Library Science Sources** Jo Bell Whitlatch, Susan E. Searing, 2014-08-06 Ideal for public school and academic libraries looking to freshen up their reference collection as well as for LIS students and instructors conducting research this resource collects the cream of the crop sources of general reference and library science information **Introduction to Cataloging and Classification** Daniel N. Joudrey, Arlene G. Taylor, David P. Miller, 2015-09-29 A new edition of this best selling textbook reintroduces the topic of library cataloging from a fresh modern perspective Not many books merit an eleventh edition but this popular text does Newly updated Introduction to Cataloging and Classification provides an introduction to descriptive cataloging based on contemporary standards explaining the basic tenets to readers without previous experience as well as to those who merely want a better understanding of the process as it exists today The text opens with the foundations of cataloging then moves to specific details and subject matter such as Functional Requirements for Bibliographic Records FRBR Functional Requirements for Authority Data FRAD the International Cataloging Principles ICP and RDA Unlike other texts the book doesn't presume a close familiarity with the MARC bibliographic or authorities formats ALA's Anglo American Cataloging Rules 2nd Edition revised AACR2R or the International Standard Bibliographic Description ISBD Subject access to library

materials is covered in sufficient depth to make the reader comfortable with the principles and practices of subject cataloging and classification In addition the book introduces MARC BIBFRAME and other approaches used to communicate and display bibliographic data Discussions of formatting presentation and administrative issues complete the book questions useful for review and study appear at the end of each chapter

Maxwell's Guide to Authority Work Robert L.

Maxwell, 2002-05-22 Unidentified Flying Objects not UFOs or Flying Saucers Authority work is the linchpin of the library catalog As the author puts it Without authority control the burden is placed on the user to think of all the possible forms a cataloger might have used to give access in the catalog to a given author or subject If a subject is not sorted by its authorized heading then the library and its users and staff are left without a system and ultimately the cost of an unsatisfied user From one of the preeminent experts in the field this is the step by step guide for ensuring that your library and staff are creating and maintaining authority records with the end user in mind Comprehensive and definitive Maxwell's Guide to Authority Work is a must have In this readable text authority work is broken down to its most basic components so that you can trace and follow the preparation of a complete authority record Helpful illustrations identify the key characteristics of good authority records common acronyms are defined and cross references throughout reinforce material Step by step you'll learn how to Form and record uniform access points Keep thorough and accurate records Share information in an environment of international databases and cooperative cataloging The authoritative tool for making certain a person author corporate body organization book or other media is appropriately classified under its authority name subject and form Maxwell's should be part of any library's toolbox

Information Resource Description Philip Hider, 2012-11-23 An overview of the field of information organization that examines resource description as both a product and process of the contemporary digital environment This timely book employs the unifying mechanism of the semantic web and the resource description framework to integrate the various traditions and practices of information and knowledge organization Uniquely it covers both the domain specific traditions and practices and the practices of the metadata movement through a single lens that of resource description in the broadest semantic web sense This approach more readily accommodates coverage of the new Resource Description and Access RDA standard which aims to move library cataloguing into the centre of the semantic web The work surrounding RDA looks set to revolutionise the field of information organization and this book will bring both the standard and its model and concepts into focus Key topics include information resource attributes metadata for information retrieval metadata sources and quality economics and management of metadata knowledge organization systems the semantic web books and e books websites and audiovisual resources business and government documents learning resources the field of information knowledge organization Readership LIS students taking information organization courses at undergraduate and postgraduate levels information professionals wishing to specialise in the metadata area and existing metadata specialists who wish to update their knowledge

Essential Thesaurus Construction Vanda Broughton, 2006

Many information professionals working in small units today fail to find the published tools for subject based organization that are appropriate to their local needs whether they are archivists special librarians information officers or knowledge or content managers Large established standards for document description and organization are too unwieldy unnecessarily detailed or too

expensive to install and maintain In other cases the available systems are insufficient for a specialist environment or don't bring things together in a helpful way A purpose built in house system would seem to be the answer but too often the skills necessary to create one are lacking This practical text examines the criteria relevant to the selection of a subject management system describes the characteristics of some common types of subject tool and takes the novice step by step through the process of creating a system for a specialist environment The methodology employed is a standard technique for the building of a thesaurus that incidentally creates a compatible classification or taxonomy both of which may be used in a variety of ways for document or information management Key areas covered are What is a thesaurus Tools for subject access and retrieval What a thesaurus is used for Why use a thesaurus Examples of thesauri The structure of a thesaurus Thesaural relations Practical thesaurus construction The vocabulary of the thesaurus Building the systematic structure Conversion to alphabetic format Forms of entry in the thesaurus Maintaining the thesaurus Thesaurus software The wider environment Readership Although primarily aimed at the practising information professional the book is also suitable for students of library and information science

Crash Course in Basic Cataloging with RDA Heather Lea Moulaison, Raegan Wiechert Assistant Professor, 2015-10-01 Covering tools terminology and the FRBR based RDA approach to description this book explains the current principles of organization of information and basic cataloging practices for non catalogers enabling readers to understand elements of the cataloging process and interact with records in a basic manner Organization of information and cataloging is often the most daunting task for library technicians and non catalogers working in the library New RDA cataloging rules can be baffling for even the more seasoned catalogers Written by two authors with 20 years combined experience in cataloging instruction Crash Course in Basic Cataloging with RDA approaches current principles of organization of information and cataloging practices from a basic standpoint for non catalogers It makes a complex topic easy to understand and a complicated practice doable for those without the proper training and necessary experience The book gives readers a basic understanding of organization of information and cataloging practice explaining how records are created and the approaches to different formats of information in libraries including MARC records and encoding RDA cataloging records offering assistance in applying RDA identifying the cataloger's tools and providing non technical explanations for the tasks that today's catalogers do It contains an introduction a bibliography webliography and three appendices of additional resources Cataloging Tools Resources for Catalogers and Sample Catalog Records *Basic Music Reference* Alan Green, Michael J. Duffy, IV, 2012-11-01 Basic Music Reference is a quick start guide designed to introduce library employees to the basic tools and techniques involved in answering questions related to music As in every specialist subject area music has its own terminology but unlike

most it also has a multitude of formats on paper and other materials as well as special notation and frequent use of foreign languages in titles and texts These features make it particularly difficult for library employees to answer users questions and thus a guide such as this one is essential Not all libraries with a music collection can afford to hire a music reference librarian Even libraries with such a specialist rely on support staff and student employees to answer questions when the music librarian is not available Whatever the scenario this volume will serve as a helpful training tool for library employees to learn about the basic music reference tools and to develop the techniques of greatest use when answering the most common types of music related questions
