Market capitalization market cap is the total value of a company's outstanding shares of stock. It is calculated by multiplying the current share price by the total number of outstanding shares. Market cap is used to assess a company's size and is often classified into categories such as large cap, mid cap, and small cap.

7 What are dividends? Answer: Dividends are payments made by a corporation to its shareholders, typically out of profits. They are usually paid quarterly and can be in the form of cash or additional shares. Dividends are a way for companies to share their profits with their investors.

8 What is technical analysis? Answer: Technical analysis involves analysing historical price and volume data of stocks to forecast future price movements. It uses various charts and indicators like moving averages, Relative Strength Index (RSI), and Bollinger Bands to identify trends and trading opportunities.

9 What is fundamental analysis? Answer: Fundamental analysis involves evaluating a company's financial health and performance by analysing its financial statements, management, industry position, and economic factors. Key metrics include earnings, revenue, growth, debt levels, and profit margins. This approach helps assess the intrinsic value of a stock.

10 What is the difference between stocks and bonds? Answer: Stocks represent ownership in a company, and shareholders can benefit from dividends and capital appreciation. Bonds are debt instruments issued by companies or governments. Bondholders receive fixed interest payments (coupons) and the principal amount when the bond matures. Bonds are generally considered safer than stocks.

11 What are stock exchanges? Answer: Stock exchanges are centralized platforms where securities are bought and sold. Examples include the New York Stock Exchange (NYSE), NASDAQ, London Stock Exchange (LSE), and Bombay Stock Exchange (BSE). These exchanges ensure transparency and facilitate fair trading of stocks.

12 What are risk management strategies in stock market investments? Answer: Some common risk management strategies include:  
Diversification: Spreading investments across different sectors and asset classes to reduce risk.  
Hedging: Using financial instruments like options and futures to offset potential losses.  
Stop loss orders: Setting a predetermined price at which to sell a stock to limit potential losses.  
Asset allocation: Balancing the portfolio based on risk tolerance, time horizon, and financial goals.

13 What is a stock split? Answer: A stock split is when a company divides its existing shares into multiple new shares to lower the trading price per share while keeping the overall value unchanged. For example, in a 2 for 1 stock split, shareholders receive two shares for every one they currently own.

14 Explain the concept of a P/E ratio. Answer: The Price to Earnings (P/E) ratio is a measure of a company's stock price relative to its earnings per share (EPS). It is calculated by dividing the market price per share by the earnings per share. A high P/E ratio can indicate that the stock is overvalued, while a low P/E ratio may suggest it is undervalued.

15 What is a margin account? Answer: A margin account allows an investor to borrow money from a brokerage firm to purchase securities using their existing investments as collateral. While margin trading amplifies potential returns, it also increases the risk of losses if the value of the investment declines.

16 What is a trading volume? Answer: Trading volume refers to the number of shares or contracts traded in a given period, typically measured daily. High trading volume can indicate strong interest and liquidity in a particular stock, while low trading volume

might suggest less investor interest 17 What are ETFs Exchange Traded Funds Answer ETFs are investment funds that hold a diversified portfolio of assets like stocks bonds or commodities They trade on stock exchanges like individual stocks providing a way for investors to gain exposure to a wide range of assets with a single purchase 18 What is the role of a broker in the stock market Answer A broker is a licensed professional or firm that facilitates the buying and selling of securities on behalf of investors Brokers execute trades provide advice and may also offer research and analysis to assist in investment decisions International Investment Management Kara Tan Bhala,Warren Yeh,Raj Bhala,2016-04-14
