How Nursing has Changed with Technology, An Issue of Nursing Maria Overstreet, 2015-06-14
How has technology changed the art and science of nursing practice Many facets of nursing practice have stayed constant over the years such as the way we advocate for our patients and the art of caring for our patients
However nursing practice has evolved over the years especially in the bedside delivery of state of the art nursing care
Technology at the bedside has forced nurse educators to change the ways in which we always have taught nursing students
Technology has also begun to change the methods used in the actual bedside nursing care
In this issue you will hear from some of the nursing experts in areas of nursing care that has changed in either the delivery of care or method of assessing care of the patient
Nursing experts will describe some of the historical changes and intrigue you in the changes expected to come to the bedside
Why is this issue important
First we gain insight from a review of where we have been and nurses tend to reminisce on our past as well as romance our historical roots
Second technology is ever changing and it is good practice to keep abreast of what is happening in other areas of nursing so that we can apply others successes in our own specific areas of nursing
Third informatics in nursing is a growing field and nursing must embrace technology and learn to adapt various methods of delivery so that we can appropriately care for and advocate for our patients
With the changes in our national healthcare system we must encourage nurses to try out new methods of delivery as well as encourage their ideas of how nursing can change
The articles in this issue reflect these changes
