Essentials Of Physical Anthropology 9th Edition:

Essentials of Physical Anthropology. 9th Ed Robert Jurmain, 2013 **Essentials of Physical Anthropology** Robert Jurmain, Lynn Kilgore, Wenda Trevathan, 2012-02-24 Best selling ESSENTIALS OF PHYSICAL ANTHROPOLOGY Ninth Edition presents a concise and authoritative introduction to physical anthropology with the goal of helping students understand why it is important to know about human evolution by showing how humans are biologically connected to all other life. These biological connections link our species with our ancient ancestors, our contemporary primate cousins, and show how closely modern human populations are related to each other. The text has been reframed to emphasize this theme of biological connections as well as the connections between chapters in the material presented. This new framework will better help students grasp the big picture of human evolution and better navigate the material. Supported by new chapter opening Learning Objectives, new visual diagrams (see Chapter One) and other summation pedagogy such as What's Important boxes that put key chapter concepts into perspective for students, this text continues to help students master basic biological principles of physical anthropology and so be able to better understand human origins and our place in the biological world. Altogether ESSENTIALS OF PHYSICAL ANTHROPOLOGY Ninth Edition integrates coverage of the latest finds with relevant technologies to be the most up to date text available. description or the product text may not be available in the ebook version. **Homo Novus - A Human Without Illusions** Ulrich J. Frey, Charlotte Störmer, Kai P. Willführ, 2010-08-24 Converging evidence from disciplines including sociobiology, evolutionary psychology, and human biology forces us to adopt a new idea of what it means to be a human. As cherished concepts such as free will, naive realism, humans as creation's crowning glory, fall, and our moral roots in ape group dynamics become clearer, we have to take leave of many concepts that have been central to defining our humanness. What emerges is a new human, the homo novus, a human being without illusions. Leading authors from many different fields explore these issues by addressing a range of illusions and providing evidence for the need, despite considerable reluctance to relinquish some of our most cherished ideas about ourselves. Essentials of Physical Anthropology Robert Jurmain, 2001 This mainstream
