Whether you work with fitness enthusiasts or competitive athletes, this resource will help you understand and apply scientific findings so that you can assess an individual's nutrition status and if it falls within your scope of practice, develop customized nutrition plans. Understand what macronutrients are and how they are metabolized, stored, and oxidized for energy. Use science-based recommendations for using macronutrients, micronutrients, and hydration to improve aerobic, anaerobic, and strength-based performance. Finally, use cutting-edge findings on nutrient timing based on the type, intensity, and duration of activity to help you understand how to recommend the correct nutrients at the ideal time to achieve optimal performance results.
