Fermat's Enigma The Epic Quest To Solve The World's Greatest Mathematical Problem:

Fermat's Enigma Simon Singh, 2017-03-01 $x^n y^n z^n$ where n represents 3 4 5 no solution I have discovered a truly marvelous demonstration of this proposition which this margin is too narrow to contain With these words the seventeenth century French mathematician Pierre de Fermat threw down the gauntlet to future generations What came to be known as Fermat's Last Theorem looked simple proving it however became the Holy Grail of mathematics baffling its finest minds for more than 350 years In *Fermat's Enigma* based on the author's award winning documentary film which aired on PBS's *Nova* Simon Singh tells the astonishingly entertaining story of the pursuit of that grail and the lives that were devoted to sacrificed for and saved by it Here is a mesmerizing tale of heartbreak and mastery that will forever change your feelings about mathematics

Weisstein, 2002-12-12 Upon publication the first edition of the CRC Concise Encyclopedia of Mathematics received overwhelming accolades for its unparalleled scope readability and utility It soon took its place among the top selling books in the history of Chapman Hall CRC and its popularity continues unabated Yet also unabated has been the d [Toward a Theology of Scientific Endeavour](#) Professor Christopher B. Kaiser, 2013-05-28 Foundations of science are specific conditions of the cosmos of human intelligence of

cultural beliefs and of technological structures that make the pursuit of modern science possible Each of the four foundations of scientific endeavour can be studied as a topic on its own The concurrent study of all four together reveals several tensions and interconnections among them that point the way to a greater unification of faith and science This book explores four foundations of scientific endeavour and investigates some of the paradoxes each of them raises Kaiser shows that the resolution of these paradoxes inevitably leads us into theological discourse and raises new challenges for theological endeavour In order to address these challenges Kaiser draws on the wider resources of the Judeo Christian tradition and argues for a refocusing of contemporary theology from the perspective of natural science

understanding of cognition itself must be broadened to include nonverbal immediate awareness as a category of natural intelligence that is embedded within sensory and somatosensory motor processes that make possible yet another category of intelligence knowing how While most current theories of intelligence assume that the mind is entirely computational and also assume that sensation is cognitively neutral having no intentionality here empirical evidence is presented from numerous clinical studies showing that certain primitive sensory processes are not cognitively neutral nor do they require a representational language interface in order to be accessible to cognitive intelligence processes This volume describes a rigorous treatment and exhaustive classification of natural intelligence while also demonstrating a more adequate scientific and mathematical approach than current statistical and psychometric approaches shoring up the out dated and misused IQ hypothetical construct
