**Resilience in Energy, Infrastructure, and Natural Resources Law** Catherine Banet, Hanri Mostert, LeRoy Paddock, Milton Fernando Montoya, Iñigo del Guayo, 2022-03-11 The number of severe and sometimes catastrophic disruptive events has been rapidly increasing Extreme weather events including floods wildfires hurricanes and other natural disasters have become both more frequent and more severe whilst events such as the COVID 19 pandemic represent a global threat to public health with huge economic effects that recovery packages tried to address These disruptive events alone and in combination have dramatic consequences on nature human life and the economy calling for urgent action to mitigate their causes and adapt to their impacts In response to discourses of collapsology and end of growth theories this monograph offers an analytical approach to developing legal responses that can help ensure the needs of present and future generations can be met through energy systems infrastructure development and natural resources management in these times of disruption Resilience is therefore seen as a common framework for the interpretation and development of energy infrastructure and natural resources law With a mix of thematic chapters and case studies from multiple jurisdictions Resilience in Energy

Infrastructure and Natural Resources Law maps and assesses legal responses to disruptive nature based events and examines possible legal pathways for more sustainable outcomes based on its engagement with this concept of resilience and social ecological thinking Planning for a Material World Laura Lieto, Robert A. Beauregard, 2015-11-06 Today urban scholars think of cities and regions as evolving through networks of human associations technologies and natural ecologies This being the case planners are faced with the task of navigating a profoundly material world Planning with and for humans alone is unacceptable in the unfolding of urban processes non human things cannot be ignored This inclusive vision has consequences for how planners envision the connections among norms technologies and life worlds as well as how they design and implement their plans The contributors to this volume utilize a variety of examples ecologically sensitive regional planning in Naples Italy congestion pricing in New York City and public participation in Europe among others to explore how planners engage a heterogeneous and restless world Inspired by assemblage thinking and actor network theory each chapter draws on this new materialism to acknowledge in quite pragmatic ways that spatial politics is a process of becoming that is inseparable from the materiality of urban practices *Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)* Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events **Democratic Brazil Divided** Peter R. Kingstone, Timothy J. Power, 2017-12-02 March 2015 should have been a time of celebration for Brazil as it marked thirty years of democracy a newfound global prominence over a decade of rising economic prosperity and stable party politics under the rule of the widely admired PT Workers Party Instead the country descended into protest economic crisis impeachment and deep political division *Democratic Brazil Divided* offers a comprehensive and nuanced portrayal of long standing problems that contributed to the emergence of crisis and offers insights into the ways Brazilian democracy has performed well despite the explosion of crisis The volume the third in a series from editors Kingstone and Power brings together noted scholars to assess the state of Brazilian democracy through analysis of key processes and themes These include party politics corruption the new middle classes human rights economic policymaking the origins of protest education and accountability and social and environmental policy Overall the essays argue that democratic politics in Brazil form a complex mosaic where improvements stand alongside stagnation and regression International Trade Regulation Zhiqiong June Wang, Jianfu Chen, 2023-03-21 The international trade regulatory system is a dynamic system that has been evolving throughout its history Tension and conflict are part of the system While calls for the abolition of the principal trade regulation authority the WTO have failed to understand this nature of the system proponents for reforms have so far not paid sufficient attention to the evolving nature of tension and conflict This book examines the evolving dynamics in international trade regulation from the conclusion of GATT in 1947 to the current crisis facing the WTO from a perspective of emerging powers of developing countries with a focus of China as the latest force that demands reforms of the international trade regulatory regime There is an extensive body of

scholarship on ideological struggles the rise of developing countries geopolitical contest the emerging powers especially China the use misuse or abuse of trading rules and so on There is however a lack of a single concise research book that synthesises these underlying causes and factors into a coherent and precise analytical theme This book attempts to fill this research gap by building upon the existing scholarship and placing the various tensions and conflicts in a perspective that treats them as dynamic factors that have propelled a continuing process of evolution of the international trade regulation The book will interest those researching on international trade regulation as well as development studies The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license **Latin American Weekly Report** ,1994 **Who's who in California** ,1985
