Zachary Wong identifies the eight most common people problems in managing projects and offers a flexible customizable approach to solving them based on a lifetime of research. Zachary Wong offers practical strategies, skills, and tools to help project managers diagnose and solve their toughest people problems. Based on decades in the trenches, the book shows how to confront and correct bad behavior, increase team performance and inclusion, turn around difficult people, and poor performers. It gets people to do what you want them to do, boost employee motivation and attitude, reduce change resistance and risk aversion, and manage difficult bosses. Wong believes that the best team leaders are problem solvers and facilitators, so this book provides problem solving models and tools to diagnose people problems and facilitative methods, processes, and techniques to correct them. It's an approach that can be personalized to fit any person or situation. Each skill is explained with a well-balanced mix of case stories, examples, strategies, processes, tools, and techniques, along with illustrations, graphics, tables, and other visuals to clarify key concepts and their workplace application. To reinforce the most important learnings, Wong includes a Memory Card and Skill Summary at the end of each chapter. Nothing is harder than leading people and managing project teams. Being successful takes a combination of knowing human psychology, organizational behaviors, and human factors; having supervisory process and communication skills; ensuring good teamwork, high integrity, and strong leadership; and having the ability to integrate and apply these skills to a diverse work team.

The Eight Essential People Skills for Project Management is designed for individuals, team leaders, and managers who oversee and coordinate the daily performance of others and who are seeking solutions that they can apply immediately. *Interpersonal Skills for Portfolio, Program, and Project Managers* Ginger Levin DPA, PMP, PgMP, 2010-08-01

Improve Your Interpersonal Skills to Achieve Greater Management Success. Any formula for management success must include a high level of interpersonal skills. The growing complexity of organizational portfolios, programs, and projects, as well as the increasing number and geographic dispersion of stakeholders and employees, makes a manager's interpersonal skills critical. The frequency and variety of interpersonal interactions and the pressure to perform multiple leadership roles successfully while ensuring customer satisfaction have never been greater. *Interpersonal Skills for Portfolio, Program, and Project Managers* offers practical and proven tools and methods you can use to develop your interpersonal skills and meet the challenges of today's competitive professional environment. Develop the interpersonal skills you need to build effective, high-performing teams. Work efficiently with virtual teams. Develop approaches to build and maintain relationships with stakeholders at all levels. Handle stress and deal with unexpected critical incidents. Motivate your team. Whatever your level of experience, you will find these practical and proven methods to be the best formula for improving your interpersonal skills and enhancing your management success. The chapters include discussion questions, making this a perfect text for use in academic or workshop settings. *Project Team Dynamics* Lisa DiTullio, 2010-09

Integrating Change Mel Toomey, Judi Neal, 2021-09-26 Change processes in organizations are time consuming expensive and often don't create the intended results This book creates a new way for leaders to relate to change from a place of deeper understanding Based on years of research consulting and teaching the models and frameworks described in this book have been applied successfully in organizations such as Johnson Johnson AT T IBM Facebook Charles Schwab Company and Accenture The book provides breakthrough thinking to leaders who find themselves in the chaos of multiple high amplitude changes that cannot be managed from an autocratic or even a participative mindset The successful transformation of a human system does not require that people change who they are so much as it requires they become more of who they are more like themselves Change does not require new step by step models offered by an outside expert It requires teaching people how to become model builders As a result of this deeper transformation of mindset not only will people in the organization be able to manage the particular change crisis facing them in the moment they will develop a new

relationship to change so that strategic thinking and breakthrough business outcomes become part of the organizational norm This book will primarily appeal to experienced leaders senior managers and change agents who have learned that the textbook recipes for initiating or responding to change don't work It is also useful supplementary reading for students of organizational studies and leadership
