Essential Questions Houghton Mifflin First Grade:

Essential Questions in Adolescent Literacy Jill Lewis, 2009-05-04 In each chapter of this unique volume an exemplary teacher collaborates with a prominent scholar to present real world strategies for putting literacy research to work in grades 5-12. These lively dialogues tackle key questions in adolescent literacy including issues of motivation, critical thinking skills, content area writing, differentiated instruction, assessment, English language learning and technology. Suggestions for incorporating adolescents out of school literacies and working with reading specialists and coaches show how to build connections between the classroom and wider communities. In-depth portraits of challenges and successes in the classroom, practical instructional tips and stimulating questions for reflection make the book a valuable resource for inservice and preservice teachers.

Social Studies for Secondary Schools Alan J. Singer, 2008-10-26 This popular text advocates an inquiry and activity based view of social studies teaching that respects the points of view of students and teachers. Based in practice and experience it offers systematic support and open, honest advice for new teachers. It is conversational, not pedantic, and provides lots of examples. While the structure and most of the topics remain largely the same as before, this Third Edition presents new lesson ideas in every chapter, especially designed to help new teachers address learning standards to work in inclusive settings and to promote literacy and the use of technology in social studies classrooms. It puts a heavier focus on what is important to know and why, includes new essays on the politics of social studies education, responds to opponents of project or activity based social studies instruction, and multicultural education with a sharpened defense of both of these approaches throughout the book. Intended as a text for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs as a reference for new social studies teachers and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice.

Early Reading Instruction Diane McGuinness,2006-01-20 Early Reading Instruction is a comprehensive analysis of the research evidence from early writing systems to computer models of reading In this book Diane McGuinness provides an innovative solution to the reading war the century old debate over the efficacy of phonics sound based versus whole word meaning based methods She has developed a prototype a set of elements that are critical to the success of a reading method McGuinness shows that all writing systems without exception are based on a sound unit in the language This fact and other findings by paleographers provides a platform for the prototype Other elements of the prototype are based on modern research For example observational studies in the classroom show that time spent on three activities strongly predicts reading success learning phoneme symbol correspondences practice at blending and segmenting phonemes in words and copying writing words phrases and sentences Most so called literacy activities have no effect and some like sight word memorization have a strongly negative effect The National Reading Panel 2000 summarized the research on reading methods after screening out thousands of studies that failed to meet minimum scientific standards In an in depth analysis of this evidence McGuinness shows that the most successful methods children reading a year or more above age norms include all the elements in the prototype Finally she argues because phonics type methods are consistently shown to be superior to whole word methods in studies dating back to the 1960s it makes no sense to continue this line of research The most urgent question for future research is how to get the most effective phonics programs into the classroom
