The Burning Answer Keith Barnham, 2015-05-15 Our society faces a choice We could be enjoying a sustainable lifestyle but we have chosen not to In three generations we have consumed half the oil produced by photosynthesis over eight million generations In two generations we have used half our uranium resources With threats from global warming oil depletion and nuclear disaster we are running out of options Solar power as Keith Barnham says is our necessary solution Barnham explains that the roots of solar energy lie in a little known equation $E = hf$ an equation which was coincidentally celebrated and explained to the world by Einstein in the same year he discovered $E = mc^2$ He alleges that the former equation has been overlooked in favor of the latter much to our detriment and Barnham is here to offer us a solution We can still turn things around and solar energy is the key In this provocative inspiring passionately argued book Keith Barnham outlines actions that any one and all of us can take to make an impact now and on future generations The Burning Answer is a solar manifesto for the new climate aware generation and a must read for climate change skeptics

Taylor, 2015-11-11 This book introduces a new way of analyzing measuring and thinking about mega risks a paradigm shift that moves from single solutions to multiple competitive solutions and strategies Robust simulation is a statistical approach that demonstrates future risk through simulation of a suite of possible answers To arrive at this point the book systematically walks through the historical statistical methods for evaluating risks The first chapters deal with three theories of probability and statistics that have been dominant in the 20th century along with key mathematical issues and dilemmas The book then introduces robust simulation which solves the problem of measuring the stability of simulated losses incorporates outliers and simulates future risk through a suite of possible answers and stochastic modeling of unknown variables This book discusses various analytical methods for utilizing divergent solutions in making pragmatic financial and risk mitigation decisions The book emphasizes the importance of flexibility and attempts to demonstrate that alternative credible approaches are helpful and required in understanding a great many phenomena

Selected Papers, Volume 4 Subrahmanyan Chandrasekhar, 1989-11-17 This is the fourth of sixth volumes collection the significant papers of the distinguished astrophysicist and Nobel laureate S Chandrasekhar In his research his practice has been to change his focus from time to time to pursue new areas The result has been a prolific career of discoveries and insights some of which are only now being fully appreciated Volume 4 includes a foreword by mathematician Norman R Lebovitz who explains the context in which these papers were written how they relate to Chandrasekhar s other published work and how they continue to influence new research Volume 4 has three parts The first on plasma physics includes joint work with A N Kaufman and K M Watson on the stability of the pinch as well as a paper on Chandrasekhar s own approach to the topic of adiabatic invariants Part 2 includes work with specific scientific applications of hydrodynamic and hydromagnetic stability not covered in his monograph on the subject The final part contains Chandrasekhar s papers on the scientific applications of the tensor virial theorem in which he restores to its proper place Riemann s neglected work with ellipsoidal figures from back cover Summa Theologiae, Prima Pars Thomas Aquinas, 2023-06-23 This book is an introduction to three questions on love according to St Thomas Aquinas Summa Theologiae I II qq 26 28 These three questions reflect on the nature of love q 26 the causes of love q 27 and the effects of love q 28 It is thus an introduction to the entire phenomenon of love both as a bodily passion and an act of the will The purpose is to present the Thomistic and broadly scholastic account of

human and divine love from a philosophical and theological perspective It aims to be a theological and philosophical study of the topic useful both for a graduate professional audience as part of an undergraduate or graduate course and perhaps for the educated reader The thesis of the book is that contrary to contemporary conceptions not all loves are created equal Some loves perfect us and some loves corrupt us The worth of a love depends on its object and end St Thomas thus presents an objective and teleological account of human and divine love that is of philosophical and theological interest The method is broadly exegetical presenting a careful reading of the text and supplying the philosophical and theological background which the text of Aquinas assumes The scope of the work is limited to three questions ST I II qq 26 28 References to interpretative disputes of Aquinas and references to further resources in the secondary literature will be mostly limited to the footnotes making the body of the text accessible to more readers
