This book provides a highly accessible and user friendly overview of the essential concepts and terms related to the current global endeavour to implement the Sustainable Development Goals With the first decade of the 15 year timespan of the 2030 Agenda now past the SDGs show limited progress and several goals are even regressing It is imperative that SDG implementation is accelerated until 2030 and beyond to foster transformations and set the world onto a sustainable and resilient path The book starts with a thematic introduction to contextualize the topic and set the stage for the individual entries It then follows an A Z format with over 100 entries which describe an important concept or term using practical examples to illustrate how it connects to the overall debate about sustainable development It offers swift introductions to key concepts and terms that are discussed and explained by scholarly and policy experts from around the world in a concise and user friendly way The guide is comprehensive in scope practically oriented and focused on political and societal processes to drive change on a larger scale With cross references to related terms in the entries this book will be a highly valuable resource for students and practitioners engaged with the SDGs and sustainable development more broadly **Globalization, Environmental Law, and Sustainable Development in the Global South** Kirk W.

Junker, Paolo Davide Farah, 2021-11-29 This volume examines the impact of globalization on international environmental law and the implementation of sustainable development in the Global South Comprising contributions from lawyers from the Global South or who have experience in the Global South this volume is organized into three parts with a thematic inquiry woven through every chapter to ask how law can enable economies that can be sustained given the limited carrying capacity of the earth Part I describes and characterizes the status quo of environmental and economic problems in the Global South during the process of globalization Some of those problems include redistribution of environmental burden on the public through over reliance on the state in emerging economies and the transition to public private partnerships as well as extreme uncontrolled economic expansion Building on Part I Part II takes an international perspective by presenting some tools that are in place during the process of globalization that lead to friction and interfaces between developed and developing economies in environmental law Recognizing the impossibility of a globalized Northern economy the authors in Part III present some alternatives through framework ideas of human and civil rights environmental rights and indigenous persons rights as well as concrete and specific legal tools to strengthen justice and rule of law institutions The book gives new perspectives to familiar approaches through concrete examples by professional practitioners and theoretical discourse by

academic researchers and can thereby form the basis for changes in practices as well as further discussions and comparisons This book will be of great interest to students and scholars of environmental law sustainable development and globalization and international relations as well as legal professionals and practitioners

Effective Environmental Regulation in China Federico Pasini, 2021-06-16 Though recently improved Chinese legislation on environmental permits is still weak and urgent measures are needed to help the country in moving towards an effective permitting system This book examines this legislation gap and presents a contribution to solving China's pollution problems By analysing the deficiencies of current Chinese provisions on permitting in light of EU legislation and its Italian application the book determines which permitting legislative structure and approach China should embrace in practice in order to build more comprehensive legislation on emission permitting It is argued that a set of ad hoc legislative measures should be implemented so as to strengthen China's environmental protection and efficiently tackle pollution The book will be a valuable resource for researchers academics and policy makers working in the areas of international environmental law and comparative law

The Ecological Constitution Lynda Collins, 2021-05-20 The Ecological Constitution integrates the insights of environmental constitutionalism and ecological law in a concise engaging and accessible manner This book sets out the necessary components of any constitution that could be considered ecological in nature In particular it argues that an ecological constitution is one that codifies the following key principles at a minimum the principle of sustainability intergenerational equity and the public trust doctrine environmental human rights rights of nature the precautionary principle and non regression and rights and obligations relating to a healthy climate In the context of the global environmental crisis that characterises the current Anthropocene era these principles are important tools for changing consciousness and driving pragmatic policy reforms around the world Reimagining constitutions along these lines could play a vital role in the collective project of building a sustainable future for humans animals ecosystems and the biosphere we all share This book will be of great interest to students and scholars of environmental law ecological law environmental constitutionalism sustainability and rights of nature

Global Networks and European Actors George Christou, Jacob Hasselbalch, 2021-05-30 This book examines the ability of the EU and European actor networks to coherently and effectively navigate manage and influence debates and policy on the international stage It also questions whether increasing complexity across a range of critical global issues and networks has affected this ability Engaging with the growing theoretical and conceptual literature on networks and complexity the book provides a deeper understanding of how the European Union and European actors navigate within global networks and complex regimes across a range of regulatory policy cooperation and foreign and security policy issue areas It sheds light on how far they are able to respond to and shape solutions to some of the most pressing challenges on the global agenda in the 21st century This book will be of key interest to scholars and students of EU European and global networks and more broadly to European and EU studies Global Governance International Relations International Political Economy and Foreign Policy and

Security Studies **The International Legal Régime for the Protection of the Stratospheric Ozone Layer** Osamu Yoshida, 2019-02-19 The first edition of Professor Yoshida's monograph *The International Legal Régime for the Protection of the Stratospheric Ozone Layer* provided a renowned and comprehensive contemporary study of the international ozone régime. In the second revised edition the author analyses important developments in the ozone treaty régime. **Global Environmental Governance** James Gustave Speth And Peter M. Haas, 2007-09 *Global Environmental Governance* examines ten major environmental threats: climate disruption, biodiversity loss, acid rain, ozone depletion, deforestation, desertification, freshwater degradation and shortages, decline of marine fisheries, toxic pollutants and excess nitrogen, and explores how they can be addressed through treaties, governance regimes and new forms of international cooperation. It also critically examines the serious shortcomings of current efforts and the underlying reasons for the persistence of disturbing trends. This book presents key concepts in international law and regime formation in simple, accessible language and describes the current institutional landscape. Lessons learned and new directions needed in international governance. International Organizations John McCormick, 2024-02-22 What role do humanitarian organizations play in crises such as those in Ukraine and the Middle East? How does policing work at an international level? Why has the US only ratified three of the seven major human rights treaties? Who guides the international response to climate change and is it working? This new textbook introduces readers to the nature, structure and purpose of international organizations (IOs). Taking a broad issues-based approach, the book goes beyond a conventional focus on topics like security and finance to cover global health, migration, food security and technology. In addition to providing cases of the best-known intergovernmental organizations such as the UN and the World Trade Organization, this text gives space to a wide variety of other bodies including international non-governmental organizations, non-state actors and multinational enterprises. It looks at the motivations behind regional cooperation with case studies of the European Union and the African Union and at human rights with reference to bodies as diverse as the International Criminal Court and Amnesty International. Assuming no prior knowledge of the subject, *International Organizations* uses a range of pedagogical tools and visual features to guide understanding. These include graphs to illustrate key trends, regional and world maps to illustrate wealth, democracy and development, tables of major international treaties and organizations, chapter previews and lists of key terms and organizations. The text also makes use of IOs in Theory, IOs in Action and Spotlight boxes to answer focused questions and provide more detail on how IOs operate in different parts of the world. This contemporary survey is an essential text for those studying global governance and international organizations. *Coalitions in the Climate Change Negotiations* Carola Klöck, Paula Castro, Florian Weiler, Lau Øfjorð Blaxekjær, 2020-11-22 This edited volume provides both a broad overview of cooperation patterns in the UNFCCC climate change negotiations and an in-depth analysis of specific coalitions and their relations. Over the course of three parts, this book maps out and takes stock of patterns of cooperation in the climate change negotiations since their inception in 1995.

In Part I the authors focus on the evolution of coalitions over time examining why these emerged and how they function Part II drills deeper into a set of coalitions particularly new political groups that have emerged in the last rounds of negotiations around the Copenhagen Accord and the Paris Agreement Finally Part III explores common themes and open questions in coalition research and provides a comprehensive overview of coalitions in the climate change negotiations By taking a broad approach to the study of coalitions in the climate change negotiations this volume is an essential reference source for researchers students and negotiators with an interest in the dynamics of climate negotiations

A Multidisciplinary Approach to Pandemics Philippe Bourbeau, Jean-Michel Marcoux, Brooke A. Ackerly, 2022 This edited volume provides a comparative analysis of the ways in which pandemics are theorized and studied across several disciplines
