Essentials of Meteorology D. H. McIntosh, 1969 Essentials of Meteorology Ben Perry, 2021-12-07 Meteorology is the science which studies the atmosphere and atmospheric phenomena and how these influence the weather It specializes in the study of atmospheric events occurring in the troposphere and lower stratosphere A major area of meteorology is atmospheric research or operational weather forecasting Meteorology also explores the relationship between the atmosphere and the Earth's oceans climates and biological life Such research guides the assessment of the current state of the atmosphere and allows a future prediction of the climate to be developed A number of technologies aid in examining describing modeling and

predicting weather systems with a high degree of accuracy and efficiency Radar and satellites are two such technologies that are of utmost importance to meteorological studies This book discusses the fundamentals as well as modern approaches of meteorology It traces the progress of this field and highlights some of its key concepts and applications It is appropriate for students seeking detailed information in this area as well as for experts

**Essentials of Medical Meteorology** Mladjen Ćurić, Oliver Zafirovski, Vlado Spiridonov, 2021-11-30 This book discusses the impacts that weather and climate have on human physical health longevity and mental wellness and acts as a guide to the application of meteorological science in health care It provides a background on biometeorology by covering basic concepts of human anatomy and meteorology and how modern biometeorological science can be incorporated into medical practice through diagnosis prevention and treatment of physical and mental diseases The recommendations advice and preventive measures addressed in this book aim to help people adapt to different weather phenomena and changes to minimize negative health consequences which is increasingly relevant as climate change and its effects on human health become more pronounced and studied The book is intended for environmental epidemiologists medical students physicians health care providers climate scientists insurance industries and policy makers but will also appeal to general enthusiasts of atmospheric climate and medical sciences
