scholarship Leisha DeHart Davis builds a framework of three perspectives on rules the organizational perspective which sees rules as a tool for achieving managerial goals and organizational functions the individual perspective which examines how rule design and implementation affect employees and the behavioral perspective which explores human responses to the intersection of the first two perspectives. The book then considers the effectiveness of rules applying these perspectives to a case study of employee grievance policies in North Carolina local government Finally the book concludes by outlining five attributes of effective rules green tape to guide future rule creation in public organizations.
