Fertility And Resources Society For The Study Of Human Biology Symposium Series

Daniel G. Bates, Sarah H. Lees

Fertility And Resources Society For The Study Of Human Biology Symposium Series:

Fertility and Resources ,1990 *Current Catalog* National Library of Medicine (U.S.),1983 First multi year cumulation covers six years 1965 70 *American Book Publishing Record* ,1995 *Fertility and Resources* Society for the Study of Human Biology. Symposium,1990-10-25 Fertility in animals reflects access to scarce resources such as food and territory In humans the situation is more complex In this book the gap between socio ecology and population demography is bridged by showing how animals and humans adjust their fertility to environmental conditions Population Dynamics in the Mediterranean Yoann Doignon,Isabelle Blöss-Widmer,Elena Ambrosetti,Sébastien Oliveau,2023-08-24 This open access book makes a comparative overview of the demographic evolution of the Mediterranean populations It addresses all the demographic issues since 1950 such as fertility mortality growth demographic aging and the age structure of the population The book discusses the major demographic changes and its consequences for the Mediterranean region and describes the socio economic and societal opportunities such as the silver economy improvement in health of the population and progress in education By providing insights into the past demographic evolutions and analyzing the most recent indicators this book constitutes an essential reference work for those who wish to better understand the major transformations that Mediterranean societies are undergoing **Human Reproductive Decisions** R. I. M. Dunbar,1995-04-12 Reproductive biologists evolutionary biologists demographers and social scientists all have a common interest in the business of human reproduction Their perspectives however are very different and have traditionally prevented them from having much to do with each other The conference on which this book is based brought together contributors from each of these disciplines in an attempt to explore the common ground that they share and so generate a better understanding of the factors that influence human fertility **The Cumulative Book Index** ,1991 A world list of books in the English language *Life History Evolution* Steven C. Hertler,Aurelio José Figueredo,Mateo Peñaherrera-Aguirre,Heitor B. F. Fernandes,Michael A. Woodley of Menie,2018-07-04 The social sciences share a mission to shed light on human nature and society However there is no widely accepted meta theory no foundation from which variables can be linked causally sequenced or ultimately explained This book advances life history evolution as the missing meta theory for the social sciences Originally a biological theory for the variation between species research on life history evolution now encompasses psychological and sociological variation within the human species that has long been the stock and trade of social scientific study The eighteen chapters of this book review six disciplines eighteen authors and eighty two volumes published between 1734 and 2015 re reading the texts in the light of life history evolution **Bibliographic Index** ,1991 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), **Subject Guide to Books in Print** ,1996 **Index of Conference Proceedings** British Library. Document Supply Centre,1993 **Case Studies in Human Ecology** Daniel G. Bates,Sarah H. Lees,2013-06-29 This volume was developed to meet a much noted need for accessible case study material for courses in

human ecology cultural ecology cultural geography and other subjects increasingly offered to fulfill renewed student and faculty interest in environmental issues The case studies all taken from the journal Human Ecology An Interdisciplinary Journal represent a broad cross section of contemporary research It is tempting but inaccurate to suggest that these represent the Best of Human Ecology They were selected from among many outstanding possibilities because they worked well with the organization of the book which in turn reflects the way in which courses in human ecology are often organized This book provides a useful sample of case studies in the application of the perspective of human ecology to a wide variety of problems in different regions of the world University courses in human ecology typically begin with basic concepts pertaining to energy flow feeding relations material cycles population dynamics and ecosystem properties and then take up illustrative case studies of human environmental interactions These are usually discussed either along the lines of distinctive strategies of food procurement such as foraging or pastoralism or as adaptations to specific habitat types or biomes such as the circumpolar regions or arid lands

Resources in Education ,1997 日本教育資源データベース (Japan),1972

Cultural-Existential Psychology Daniel Sullivan,2016-04-06 Bridging cultural and experimental existential psychology this book offers a synthetic understanding of how culture shapes psychological threat

Life, Death and the Elderly Margaret Pelling,Richard M. Smith,2003-10-04 Debates on policy concerning medical care and social welfare of the elderly become ever more pressing and many of the assumptions on which they are based are now open to question This study sets out to provide a historical perspective on the economic medical class and gender relations of the elderly which until now have received relatively little attention In particular the position of the elderly is linked to the fundamental issues of health disability and medical care With attention currently focused on the setting of the retirement age community and family care and pensions as well as wider debates on the rights of the elderly this volume aims to supply a historical context for such issues
