Milling Machines and Milling Practice D. De Vries,2015-06-25 Excerpt from Milling Machines and Milling Practice A Practical Manual for the Use of Manufactures Engineering Students and Practical Men It is an indisputable fact that with the beginning of the present century the manufacture of machinery has already attained a high state of development and taking into consideration the progress which it has made in the last decade and is still making it must be admitted by everyone who is in anyway acquainted with any branch of the metal working industry that the final stage of this development is very far from being reached but at the present time it may be considered as being in a very flourishing condition whilst its forces are still developing In speaking of metal working we do not refer to the working of the precious metals the usefulness of which except as a medium of barter is far inferior to that of the common metals It is just the baser metals that become valuable by being fashioned into useful objects by the hand of the workman assisted by machines of more or less modern construction We say this intentionally as nowadays the complaint is so often heard that owing to the general application of machinery the skill of the workman is gradually becoming a thing of the past and it cannot be gainsaid that half a century ago greater skill was often required of the workman s hand even in the metal working industry than is the case in the days in which we are now living But we would ask Has the metal worker s trade deteriorated on this account Certainly not About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
