been regarded as promoting a shift in resources from the communal towards a small number of individuals However through a close micro study of a single region this book offers a different perspective Rather than promoting an aggressive individualism it is argued that in times of general crisis social networks aimed to reproduce themselves and the original status quo by developing creative solutions and institutions favouring co operation Furthermore the elites could not always exploit local wealth because of the need to protect their position of leadership within the community which required the preservation of that very community This thesis not only challenges the received wisdom but also fuels a new debate about the ways in which economic growth occurred in Early Modern Italy and Europe
