Valley Authority,1953      **Design of TVA Projects: Electrical design of hydro plants** Tennessee Valley Authority,1953  
This is the second of three volumes comprising the Design of TVA Projects and is one of a planned series of special reports recording the experience of TVA in carrying out the major phases of its engineering and construction program It undertakes to explain the engineering work involved in the design of electrical installations for primary water control stations of TVA including switch yards constructed at the generating stations but not transmission lines and substations      **Electrical Calculations and Guidelines for Generating Stations and Industrial Plants** Thomas E. Baker,2017-12-12 The new edition aims to simplify the math emphasize the theory and consolidate the information needed by electrical engineers and technicians who support operations maintenance protective relay systems and betterment projects for generating stations and industrial facilities It begins with a cursory review of basic electrical phenomenon and then provides additional insights into electrical theory Single phase and three phase electrical theory is explained in a simplified manner that is not presented in other books All chapters have been expanded and updated with the inclusion of an entirely new chapter      **Gas Turbine System Technician (electrical) 3 & 2** Robert W.
