Henley, Matt J.

Rossano, Edward P. Kardas, 2019-07-24 The remains that archaeologists uncover reveal ancient minds at work as much as ancient hands and for decades many have sought a better way of understanding those minds This understanding is at the forefront of cognitive archaeology a discipline that believes that a greater application of psychological theory to archaeology will further our understanding of the evolution of the human mind Bringing together a diverse range of experts including archaeologists psychologists anthropologists biologists psychiatrists neuroscientists historians and philosophers in one comprehensive volume this accessible and illuminating book is an important resource for students and researchers exploring how the application of cognitive archaeology can significantly and meaningfully deepen their knowledge of early and ancient humans This seminal volume opens the field of cognitive archaeology to scholars across the behavioral sciences Plato and the Moving Image Shai Biderman, Michael Weinman, 2019-05-27

This book shows how and why debates in the philosophy of film can be advanced through the study of the role of images in Plato's dialogues and conversely why Plato studies stands to benefit from a consideration of recent debates in the philosophy of film Contributions range from a reading of *Phaedo* as a ghost story to thinking about climate change documentaries through Plato's account of *pleonexia* They suggest how philosophical aesthetics can be reoriented by attending anew to Plato's deployment of images particularly images that move They also show how Plato's deployment of images is integral to his practice as a literary artist Contributors are Shai Biderman David Calhoun Michael Forest Jorge Tomas Garcia Abraham Jacob Greenstine Paul A Kottman Danielle A Layne David McNeill Erik W Schmidt Timothy Secret Adrian Switzer and Michael Weinman *Indigenous Heritage and Rock Art*

Richards, 2019-05-23 Biological

accounts of art typically start with evolutionary psychological or neurobiological theories These approaches might be able to explain many of the similarities we see in art behaviors within and across human populations but they don't obviously explain

the differences we also see Nor do they give us guidance on how we should engage with art or the conceptual basis for art A more comprehensive framework based also on the ecology of art and how art behaviors get expressed in engineered niches can help us better understand the full range of art behaviors their normativity and conceptual basis

**Palaeoart of the Ice Age** Robert G. Bednarik, 2017-08-21 The many hundreds of books and thousands of academic papers on the topic of Pleistocene Ice Age art are limited in their approach because they deal only with the early art of southwestern Europe This is the first book to offer a comprehensive synthesis of the known Pleistocene palaeoart of six continents a phenomenon that is in fact more numerous and older in other continents It contemplates the origins of art in a balanced manner based on reality rather than fantasies about cultural primacy Its key findings challenge most previous perceptions in this field and literally re write the discipline Despite the eclectic format and its high academic standards the book addresses the non specialist as well as the specialist reader It presents a panorama of the rich history of palaeoart stretching back more than twenty times as long in time as the cave art of France and Spain This abundance of evidence is harnessed in presenting a new hypothesis of how early humans began to form and express constructs of reality and thus created the ideational world in which they existed It explains how art producing behaviour began and the origins of how humans relate to the world consciously

**Naturalized Aesthetics** Richard A. Richards, 2022-06-29 This book bridges the gap between the many insights into art provided by research in evolutionary theory psychology and neuroscience and those enduring normative issues best addressed by philosophy The sciences have helped us understand how art functions our art preferences and the neurological systems underlying our engagement with art But we continue to rely on philosophy to tell us what is truly good in art how we should engage with art and the conceptual basis for this engagement Naturalized Aesthetics A Scientific Framework for the Philosophy of Art integrates a systematic and comprehensive naturalism grounded in the sciences with an ecology of art It shows how the environments in which we make and experience art our engineered art niches affect the practice and experience of art and generate normativity the goods and the shoulds in our engagement with art There are in effect two streams of normativity according to this book a niche dependent social impersonal and objective stream and a niche independent individual personal and subjective stream Recognition of these two streams allows us to make progress in long standing and unresolved philosophical disputes about how to interpret evaluate and conceive art

**Key Features** Provides a structured and critical introduction to the scientific accounts of art based on evolutionary thinking psychology and neuroscience Develops an ecology of art based on the insight that we engage with art in engineered niches Presents a naturalistic account of normativity based on the recognition of two streams a niche dependent social impersonal and objective stream and a niche independent individual personal and subjective stream Serves as an introduction and critical analysis of the debates about the interpretation evaluation and definitions of art
