The Digilent Genesys 2 board is an advanced, high-performance, ready-to-use digital circuit development platform based on the latest Kintex-7™ Field Programmable Gate Array (FPGA) from Xilinx. With its high-capacity, high-speed FPGA (Xilinx part number XC7K325T-2FFG900C), fast external memories, high-speed digital video ports, and wide expansions options make the Genesys 2 well suited for data and video processing applications. Several built-in peripherals, including Ethernet, audio and USB 2.0, allow a wide range of other applications. The fully-bonded® high-speed FMC HPC connector opens the door to great expansion possibilities.

Nonlinear Finite Element Analysis in Structural Mechanics W. Wunderlich,E. Stein,K.J. Bathe,2013-03-14 With the rapid development of computational capabilities nonlinear finite element analysis in structural mechanics has become an important field of research Its objective is the realistic assessment of the actual behavior of structures by numerical methods This requires that all nonlinear effects such as the nonlinear characteristics of the material and large deformations be taken into account The activities in this field being worldwide direct interaction between the various research groups is necessary to coordinate future research and to overcome the time gap between the generation of new results and their appearance in the literature The first U S Germany Symposium was held in 1976 at the Massachusetts Institute of Technology Under the general topic Formulations and Computational Algorithms in Finite Element Analysis it provided an opportunity for about 20 researchers from each country to present lectures hold discussions and establish mutual contacts The success of this first symposium was so encouraging that it seemed natural to organize a second bilateral meeting this time in Germany and to invite researchers from other European countries as well      **CAD Systems** John J.
