K.V. Iyengar,T. Raja Rani,2014-10-31 Approximate Analytical Methods for Solving Ordinary Differential Equations ODEs is the first book to present all of the available approximate methods for solving ODEs eliminating the need to wade through multiple books and articles It covers both well established techniques and recently developed procedures including the classical series solution method diverse perturbation methods pioneering asymptotic methods and the latest homotopy methods The book is suitable not only for mathematicians and engineers but also for biologists physicists and economists It gives a complete description of the methods without going deep into rigorous mathematical aspects Detailed examples illustrate the application of the methods to solve real world problems The authors introduce the classical power series method for solving differential equations before moving on to asymptotic methods They next show how perturbation methods are used to understand physical phenomena whose mathematical formulation involves a perturbation parameter and explain how the multiple scale technique solves problems whose solution cannot be completely described on a single timescale They then describe the Wentzel Kramers and Brillown WKB method that helps solve both problems that oscillate

rapidly and problems that have a sudden change in the behavior of the solution function at a point in the interval The book concludes with recent nonperturbation methods that provide solutions to a much wider class of problems and recent analytical methods based on the concept of homotopy of topology *Bibliography of Agriculture with Subject Index*,1993-11 *Bioluminescence* Hirobumi Suzuki,Katsunori Ogoh,2021-12-15 This book contains seven chapters on bioluminescence techniques and organisms On the technical side the four chapters presented the fluorescent markers of proteins and nanocrystals imidazopyrazine type luciferin that emits light when bound to human serum albumin firefly luciferin that emits near infrared light and imaging technique for visualization of promoter activity in fruiting body formation of cellular slime molds Dictyostelium On the organismal side the three chapters presented recommendations for the commercial use of fireflies in urban areas from the perspective of conservation biology the origin of luciferin by predation in marine luminescent organisms and the ecology and behavior of luminescent organisms from sea to land which will be of interest to both professionals and students
