## **Genetic Geographies The Trouble With Ancestry:**

*Genetic Geographies* Catherine Nash, 2015-04-01 What might be wrong with genetic accounts of personal or shared ancestry and origins Genetic studies are often presented as valuable ways of understanding where we come from and how people are related In *Genetic Geographies* Catherine Nash pursues their troubling implications for our perception of sexual and national as well as racial difference Bringing an incisive geographical focus to bear on new genetic histories and genetic genealogy Nash explores the making of ideas of genetic ancestry indigeneity and origins the global human family and national genetic heritage In particular she engages with the science culture and commerce of ancestry in the United States and the United Kingdom including National Geographic's Genographic Project and the People of the British Isles project Tracing the tensions and contradictions between the emphasis on human genetic similarity and shared ancestry and the attention given to distinctive patterns of relatedness and different ancestral origins Nash challenges the assumption that the concepts of shared ancestry are necessarily progressive She extends this scrutiny to claims about the natural differences between the sexes and the nature of reproduction in studies of the geography of human genetic variation Through its focus on sex nation and race and its novel spatial lens *Genetic Geographies* provides a timely critical guide to what happens when genetic science maps relatedness

The Trouble with Ancient DNA Anna Källén, 2025-01-20 A thoughtful consideration of the storytelling and science behind ancient DNA discoveries In recent years discoveries brought to light through analysis of ancient DNA or aDNA have made headlines around the world While ancient DNA studies may appear to focus on laboratory science and objective results the findings have also relied heavily on storytelling and can be influenced by political interests In *The Trouble with Ancient DNA* Anna Källén explores how the parameters of genetic science influence the stories we tell about our ancient ancestors questioning what narratives we can and should take at face value Through accounts of migrations warriors and figures like Cheddar Man we see enticing and potent narratives that reach far beyond what can be gathered from the scientific study of molecules alone Rather by privileging certain narratives and questions like those about sex or eye and skin color our stories of ancient DNA are spun around the structure of today's methodologies technologies and popular and political interests Källén considers how DNA is used to sensationalize stories how its use poses questions of ethics and care and who is responsible if stories of ancient DNA are adopted for dangerous political projects

**Critical Perspectives on Ancient DNA** Daniel Strand, Anna Kallen, Charlotte Mulcare, 2024-07-02 The first comprehensive critical analysis of the practices and consequences of ancient DNA research This edited collection *Critical Perspectives on Ancient DNA* presents a critical enquiry into the much hyped ancient DNA revolution in archaeology Offering the first comprehensive and in depth scholarly analysis of the practices and effects of archaeogenetics editors Daniel Strand Anna Källén and Charlotte Mulcare along with other renowned scholars from Europe and the United States address a host of questions such as What happens with our understanding of the past when archaeology is married to genetic science What cultural forms and

historical narratives are generated by ancient DNA aDNA research and what energies could they unleash Taking a multidisciplinary and multisite approach to the topic these essays offer important insights into the epistemological ethical and political consequences around and beyond the scientific analysis of aDNA As such *Critical Perspectives on Ancient DNA* provides a timely and much needed critical engagement with the rapidly growing field of aDNA research a field that while already having a notable impact on how we view the past in research museums and popular media had not yet been subject to thorough critical scrutiny Contributors Ruth Amstutz Chip Colwell Magnus Fiskesj K Ann Horsburgh Anna K ll n Stewart B Koyiyumptewa Amade M charek Charlotte Mulcare Andreas Nyblom Venla Oikkonen M lanie Pruvost Marianne Sommer Daniel Strand

**Routledge International Handbook of Visual Research Methods in Anthropology** Rupert Cox,Chris Wright,2025-03-31 Routledge International Handbook of Visual Research Methods in Anthropology approaches the question of method through conceptualisations of the visual world as light sight images and technologies of imaging that can be analysed and described through a range of visual practices in the course of anthropological research The aim of the book is to move beyond making a case for the importance of the visual via its notional arrangement as a subject and means of study in anthropology by showing how it is applied as a way of doing anthropological research through the explication of a series of examples Employing an innovative structure for a handbook each contribution is orientated around a single distinguishing concept and together the contributions addresses the following three issues How to see through images by treating the visual as a form of knowledge made visible A second group of entries is concerned with how to see through time by approaching the visual as a modality for representing duration and rendering legible what may no longer be available to vision Finally a third group of entries deals with the visual at a phenomenal level as a medium that we see in This handbook is a timely and useful resource for both students and researchers of anthropology at this time because the discipline s long standing theoretical and empirically rich practical engagements with visual methods provide valuable insights for the social sciences into current transmutations of the visual into the multimodal the non representational and the sensory The importance of these areas as well as of digital research more generally makes visual methods ever more important for social scientists hence this handbook is also valuable for those studying general research methods courses and in related fields such as sociology health studies and social work

*Blood Relations* Jenny Bangham,2020-12-07 Blood is messy dangerous and charged with meaning By following it as it circulates through people and institutions Jenny Bangham explores the intimate connections between the early infrastructures of blood transfusion and the development of human genetics Focusing on mid twentieth century Britain *Blood Relations* connects histories of eugenics to the local politics of giving blood showing how the exchange of blood carved out networks that made human populations into objects of medical surveillance and scientific research Bangham reveals how biology was transformed by two world wars how scientists have worked to define racial categories and how the practices and rhetoric of public health made genetics into a human science Today genetics is a powerful authority on human health and

identity and Blood Relations helps us understand how this authority was achieved

**Possessing Polynesians** Maile Renee Arvin, 2019-11-08 From their earliest encounters with Indigenous Pacific Islanders white Europeans and Americans asserted an identification with the racial origins of Polynesians declaring them to be racially almost white and speculating that they were of Mediterranean or Aryan descent In Possessing Polynesians Maile Arvin analyzes this racializing history within the context of settler colonialism across Polynesia especially in Hawai i Arvin argues that a logic of possession through whiteness animates settler colonialism by which both Polynesia the place and Polynesians the people become exotic feminized belongings of whiteness Seeing whiteness as indigenous to Polynesia provided white settlers with the justification needed to claim Polynesian lands and resources Understood as possessions Polynesians were and continue to be denied the privileges of whiteness Yet Polynesians have long contested these classifications claims and cultural representations and Arvin shows how their resistance to and refusal of white settler logic have regenerated Indigenous forms of recognition

**Daniels v. Canada** Nathalie Kermoal, Chris Andersen, 2021-04-23 In Daniels v Canada the Supreme Court determined that M tis and non status Indians were Indians under section 91 24 of the Constitution Act 1867 one of a number of court victories that has powerfully shaped M tis relationships with the federal government However the decision and the case continues to reverberate far beyond its immediate policy implications Bringing together scholars and practitioners from a wide array of professional contexts this volume demonstrates the power of Supreme Court of Canada cases to directly and indirectly shape our conversations about and conceptions of what Indigeneity is what its boundaries are and what Canadians believe Indigenous peoples are owed Attention to Daniels v Canada s variegated impacts also demonstrates the extent to which the power of the courts extend and refract far deeper and into a much wider array of social arenas than we often give them credit for This volume demonstrates

the importance of understanding law beyond its jurisprudential manifestations but it also points to the central importance of respecting the power of court cases in how law is carried out in a liberal nation state such as Canada

**Genetic Afterlives** Noah Tamarkin, 2020-09-11 In 1997 M E R Mathivha an elder of the black Jewish Lemba people of South Africa announced to the Lemba Cultural Association that a recent DNA study substantiated their ancestral connections to Jews Lemba people subsequently leveraged their genetic test results to seek recognition from the post apartheid government as indigenous Africans with rights to traditional leadership and land retheorizing genetic ancestry in the process In Genetic Afterlives Noah Tamarkin illustrates how Lemba people give their own meanings to the results of DNA tests and employ them to manage competing claims of Jewish ethnic and religious

identity African indigeneity and South African citizenship Tamarkin turns away from genetics researchers results that defined a single story of Lemba peoples true origins and toward Lemba understandings of their own genealogy as multivalent Guided by Lemba people s negotiations of their belonging as diasporic Jews South African citizens and indigenous Africans Tamarkin considers new ways to think about belonging that can acknowledge the importance of historical and sacred ties to land without valorizing autochthony borders or other technologies of exclusion     *Stanley's Dream* Jacalyn
