**Genital Autonomy:** George C. Denniston, Frederick M. Hodges, Marilyn Fayre Milos, 2010-08-25 Circumcision affects 15 3 million children and young adults annually In terms of gender 13 3 million boys and 2 million girls are subjected to the involuntary removal of part or all of their external sexual organs every year The problem of female circumcision has been addressed on an international level but male circumcision remains a controversial subject that many academics have been reluctant to examine Circumcision is tolerated today because it has been practiced for millennia by a small but vocal minority of religious and ethnic groups however when the practice is examined through the lens of modern legal ethical and human rights advancements no place remains in civilized society for this body altering ritual In *Genital Autonomy Protecting Personal Choice* international experts address various types of genital modifications the impact of these harmful traditional practices on the child on human rights and on the development of the concept of bodily integrity The papers presented in this volume address these topics from a variety of angles They question and dissect the true motivations of the doctors witch doctors and holy men who promote and profit from circumcision *Circumcision, Public Health, Genital Autonomy and Cultural Rights* Matthew Johnson, 2017-07-05 Circumcision is one of the oldest and most common surgical processes being practised for a range of medical social and religious reasons on up to 30% of males worldwide It is currently being promoted by a range of health bodies as a means of tackling HIV in developing countries Yet there is significant concern about sexual physiological and psychological effects and complications and its prophylactic effectiveness In examining a case in which a failed circumcision was performed for religious reasons the Regional Court in Cologne decided that the practice contravened the bodily autonomy of minors and was subject to the same legislation used to classify female genital cutting as assault This understandably aroused serious concerns among various religious communities who practise circumcision At the same time as religious groups seek to protect circumcision from comparisons with female genital cutting there is a trend particularly in post colonial thought in the US to revise negative understandings of female genital cutting by making cautious positive comparisons with circumcision This collection considers the apparent contradictions and complications of the contemporary status and deployment of the many forms of genital cutting raising a serious wide reaching question what scope should society have to impose physically invasive rites on people This book was originally published as a special issue of *Global Discourse*

*Toleration in Political Conflict* Glen Newey, 2013-10-03 Political disputes over toleration are endemic while toleration as a political value seems opposed to those of civic equality neutrality and sometimes democracy Toleration in Political Conflict sets out to understand toleration as both politically awkward and indispensable The book exposes the incoherence of Rawlsian reasonable pluralist justifications of toleration and shows that toleration cannot be fully reconciled with liberal political values While reason d tat concerns very often overshadow debates over toleration these debates for example about terrorism need not be framed as a conflict between toleration and security Framing them in this way tends to obscure objectionable behaviour by tolerators themselves and their reliance on asymmetric power Glen Newey concludes by sketching a picture of politics as dependent on free speech which he argues is entailed by the demands of free association That in turn suggests that questions of toleration are inescapable within the conditions of politics itself

**The Cambridge Handbook of New Human Rights** Andreas von

Arnauld, Kerstin von der Decken, Mart Susi, 2020-01-02 The book provides in depth insight to scholars practitioners and activists dealing with human rights their expansion and the emergence of new human rights Whereas legal theory tends to neglect the development of concrete individual rights monographs on new rights often deal with structural matters only in passing and the issue of new human rights has received only cursory attention in literature By bringing together a large number of emergent human rights analysed by renowned human rights experts from around the world and combining the analyses with theoretical approaches this book fills this lacuna The comprehensive and dialectic approach which enables insights from individual rights to overarching theory and vice versa will ensure knowledge growth for generalists and specialists alike The volume goes beyond a purely legal analysis by observing the contestation rhetorics the struggle for recognition of new human rights thus speaking to human rights professionals beyond the legal sphere *"Lost" Causes*

Charli Carpenter, 2014-06-24 Why do some issues and threats diseases weapons human rights abuses vulnerable populations get more global policy attention than others How do global activist networks decide the particular causes for which they advocate among the many problems in need of solutions According to Charli Carpenter the answer lies in the politics of global issue networks themselves Building on surveys focus groups and analyses of issue network websites Carpenter concludes that network access has a direct relation to influence over how issues are ranked Advocacy elites in nongovernmental and transnational organizations judge candidate issues not just on their merit but on how the issues connect to specific organizations individuals and even other issues In *Lost Causes* Carpenter uses three case studies of emerging campaigns to show these dynamics at work banning infant male circumcision compensating the wartime killing and maiming of civilians and prohibiting the deployment of fully autonomous weapons so called killer robots The fate of each of these campaigns was determined not just by the persistence and hard work of entrepreneurs but by advocacy elites perception of the issues network ties Combining sweeping analytical argument with compelling narrative Carpenter reveals how the global human security agenda is determined *Reproductive Justice*
