**Asteroid Answers to Ancient Calendar Mysteries** Herbert B. Stollorz, 2008-07-03 Ancient calendars found around the world are designed to end one point in time They communicate an urgent warning to everyone alive today Complex bronze and gold clocks with multiple dials are found in museums around the world Why they have such advanced intricacy has stumped scientists for hundreds of years This book reveals why the ancients built so many pyramids observatories as well as those complex gold and bronze clocks with more than one dial It surprised me greatly to discover that their various complex designs in one way or another converge on 21 December 2012 It amazes me that ancient cultures separated by thousands of miles of geography and thousands of years in chronology agree so precisely in the cyclical nature of time history and prophecy which is history written in advance The most famous example is the Mayan Aztec calendar which ends its 25 626 year cycle on that momentous date Some researchers have also found 21 December 2012 in what is called the Bible Code Using very different research methods I discovered it in the Bible s book of Revelation and Daniel s prophecies It is one of the most important dates in the plan of God for all humanity

*A New Science of Heaven* Robert Temple, 2022-03-24 This book is an important contribution and I hope it will open many minds What is particularly important in it are the discussions of David Bohm of bioplasma biophotons and bioelectronics PROFESSOR ZBIGNIEW WOLKOWSKI Sorbonne University Paris Answers so many questions scientific and esoteric about the true nature of our reality A seminal work Will revolutionise how we frame reality and the thinking of everyone on this planet Kudos to Professor Temple for striking the first match to light the fire NEW DAWN The story of the science of plasma and its revolutionary implications for the way we understand the universe and our place in it Histories of science in the 20th century have focused on relativity and quantum mechanics But

quietly in the background there has been a third area of exploration which has equally important implications for our understanding of the universe It is unknown to the general public despite the fact that many Nobel prize winners senior academics and major research centres around the world have been devoted to it it is the study of plasma Plasma is the fourth state of matter and the other three gas liquid and solids emerge out of plasma This book will reveal how over 99% of the universe is made of plasma and how there are two gigantic clouds of plasma called the Kordylewski Clouds hovering between the Earth and the Moon only recently discovered by astronomers in Hungary Other revelations not previously known outside narrow academic disciplines include the evidence that in certain circumstances plasma exhibits features that suggest they may be in some sense alive clouds of plasma have evolved double helixes banks of cells and crystals filaments and junctions which could control the flow of electric currents thus generating an intelligence similar to machine intelligence We may in fact have been looking for signs of extra terrestrial life in the wrong place Bestselling author Robert Temple has been following the study of plasma for decades and was personally acquainted with several of the senior scientists including Nobel laureates at its forefront including Paul Dirac David Bohm Peter Mitchell and Chandra Wickramasinghe who has co written an academic paper with Temple

**Everything** Andrew Robinson, 2023-05-09 No one has given the polymath Thomas Young 1773 1829 the all round examination he so richly deserves until now Celebrated biographer Andrew Robinson portrays a man who solved mystery after mystery in the face of ridicule and rejection and never sought fame As a physicist Young challenged the theories of Isaac Newton and proved that light is a wave As a physician he showed how the eye focuses and proposed the three colour theory of vision only confirmed a century and a half later As an Egyptologist he made crucial contributions to deciphering the Rosetta Stone It is hard to grasp how much Young knew This biography is the fascinating story of a driven yet modest hero who cared less about what others thought of him than for the joys of an unbridled pursuit of knowledge with a new foreword by Martin Rees and a new postscript discussing polymathy in the two centuries since the time of Young It returns this neglected genius to his proper position in the pantheon of great scientific thinkers Choice ,2001
