The Essence of the Self Geoffrey Madell, 2014-11-20 In this volume Geoffrey Madell develops a revised account of the self making a compelling case for why the simple or anti criterial view of personal identity warrants a robust defense Madell critiques recent discussions of the self for focusing on features which are common to all selves and which therefore fail to capture the uniqueness of each self In establishing his own view of personal identity Madell proposes a that there is always a gap between A is f and g and I am f and g b that a complete description of the world offered without recourse to indexicals will fail to account for the contingent truth that I am one of the persons described and c that an account of conscious perspectives on the world must take into account what it means for an apparently arbitrary one of these perspectives to be mine Engaging with contemporary positions on the first person embodiment psychological continuity and other ongoing arguments Madell contends that there can be no such thing as a criterion of personal identity through time that no bodily or psychological continuity approach to the issue can succeed and that personal identity through time must be absolute not a matter of degree Madell s view that the nature of the self is substantively different from that of objects in the world will generate significant discussion and debate among philosophers of mind

**Philosophy, Music and Emotion** Geoffrey Madell, 2019-08-05 Philosophy Music and Emotion explores two issues which have been intensively debated in contemporary philosophy the nature of music s power to express emotion and the nature of emotion itself It shows how closely the two topics are related and provides a radically new account of what it means to say that music expresses emotion Geoffrey Madell maintains that most current accounts of musical expressiveness are fundamentally misguided He attributes this fact to the influence of a famous argument of the nineteenth century critic Hanslick and also to the dominant cognitivist approach to the nature of emotion which sees the essence of emotion to be the entertaining of evaluative judgements and beliefs of a certain sort an account very much in accord with Hanslick s position Such an approach results either in the unpersuasive view that musical expressiveness is somehow akin to human expressive gesture or in the view that music arouses feelings which have no specific object and unavoidably no necessary connection with the music The book argues that the cognitivist account of the nature of emotion is quite false and that it needs to be replaced with a conception of emotions as states of feeling towards states of intentional feeling whose objects are often evaluatively characterised states of affairs however in the context of the emotions that are aroused by music these objects are always musical events or states Central to this bold analysis of emotion is a new account of two closely connected mental states those of desire and of pleasure and of what role these states have in human motivation and value

Naturalism Stewart Goetz, Charles Taliaferro, 2008-04-29 This inaugural Interventions volume introduces readers to the dominant scientifically oriented worldview called naturalism Stewart Goetz and Charles Taliaferro examine naturalism philosophically evaluating its strengths and weaknesses Whereas most other books on naturalism are written for professional philosophers alone this one is aimed primarily at a college educated audience

interested in learning about this pervasive worldview Read a related blog post by the authors on EerdWord *The Tensed Theory of Time* W.L. Craig,2013-04-18 he present book and its companion volume *The Tenseless Theory of Time a T Critical Examination* are an attempt to adjudicate what one recent discussant has called the most fundamental question in the philosophy of time namely whether a static or a dynamic conception of the world is correct I had originally intended to treat this question in the space of a single volume but the study swelled into two I found that an adequate appraisal of these two of time requires a wide ranging discussion of issues in competing theories metaphysics philosophy of language phenomenology philosophy of science philosophy of space and time and even philosophy of religion and that this simply could not be done in one volume If these volumes succeed in making a contribution to the debate it will be precisely because of the synoptic nature of the discussion therein Too often the question of the nature of time has been prematurely answered by some philosopher or physicist simply because he is largely ignorant of relevant discussions outside his chosen field of expertise In these two complementary but independent volumes I have attempted to appraise what I take to be the most important arguments drawn from a variety of fields for and against each theory of time *Taking Persons Seriously* Mihretu P. Guta,Scott B. Rae,2024-06-06 This volume attempts to show why ontology matters for a proper grasp of issues in bioethics Contemporary discussions on bioethics often focus on seeking solutions for a wide range of issues that revolve around persons The issues in question are multi layered involving such diverse aspects as the metaphysical ontological personal medical moral legal cultural social political religious and environmental In navigating through such a complex web of issues it has been said that the central problems philosophers and bioethicists face are ethical in nature In this regard biomedical sciences and technological breakthroughs take a leading role in terms of shaping the sorts of questions that give rise to ethical problems For example is it ethical to keep terminally ill patients alive on dialysis machines or artificial ventilators Is it ethical to take someone s vital organs upon death and transplant them into another person s body without any prior consent from the deceased person Reproductive techniques also raise complicated ethical issues involving in vitro fertilization contraceptives prenatal testing abortions and genetic enhancements Moreover biomedical issues raise ethical problems regarding research on human subjects stem cell research and enhancement biotechnology The beginning and end of life issues bring up their own complicated ethical conundrums involving among other things terminating life support and euthanasia This book approaches such complex bioethical questions by engaging in ground level debates about the ontology of persons This is a nonnegotiable first step in taking steps forward in seeking a plausible solution s for the complex ethical problems in bioethics [Artificial Intelligence, Reincarnation, and Resurrection](#) Ernest M. Valea,2021-04-29 This book explores old and new hopes that have emerged in the human quest to defeat death On the one hand it answers questions such as Are we just physical machines of great complexity with the brain as the hardware on which consciousness operates as its software If so can we speculate on ways in which the mind could be uploaded to a machine and no longer suffer the

frailty of this biological body And could an android robot or a mindfile in a computer simulation be conscious On the other hand the book examines the hope of survival through reincarnation according to the teachings of Eastern religions and New Age thought All these topics are discussed from the perspectives of Christian theology and the philosophy of mind This dual investigation will help Christians formulate a coherent response to old and new challenges to their faith The Blackwell Companion to Natural Theology William Lane Craig, J. P. Moreland, 2012-02-27 With the help of in depth essays from some of the world s leading philosophers The Blackwell Companion to Natural Theology explores the nature and existence of God through human reason and evidence from the natural world Provides in depth and cutting edge treatment of natural theology s main arguments Includes contributions from first rate philosophers well known for their work on the relevant topics Updates relevant arguments in light of the most current state of the art philosophical and scientific discussions Stands in useful contrast and opposition to the arguments of the new atheists **The Survival of the Self** Robin Harwood, 2018-12-20 First published in 1998 this volume gives an account of personal identity derived from the Butler Reid position arguing that from the first person point of view one necessary condition of personal identity is the survival of the Self Robin Harwood s claim is that a normal human person is a combination of a Self a mind and a body locating the issue of personal identity as stemming from the nature of persons as compound entities The Oxford Handbook of Eschatology Jerry L. Walls, 2007-12-03 Eschatology is the study of the last things death judgment the afterlife and the end of the world Through centuries of Christian thought from the early Church fathers through the Middle Ages and the Reformation these issues were of the utmost importance In other religions too eschatological concerns were central After the Enlightenment though many religious thinkers began to downplay the importance of eschatology which in light of rationalism came to be seen as something of an embarrassment The twentieth century however saw the rise of phenomena that placed eschatology back at the forefront of religious thought From the rapid expansion of fundamentalist forms of Christianity with their focus on the end times to the proliferation of apocalyptic new religious movements to the recent and very public debates about suicide martyrdom and paradise in Islam interest in eschatology is once again on the rise In addition to its popular resurgence in recent years some of the worlds most important theologians have returned eschatology to its former position of prominence The Oxford Handbook of Eschatology will provide an important critical survey of this diverse body of thought and practice from a variety of perspectives biblical historical theological philosophical and cultural This volume will be the primary resource for students scholars and others interested in questions of our ultimate existence Sacred Music, Religious Desire and Knowledge of God Julian Perlmutter, 2020-02-20 Many people find sacred choral music profound and deeply evocative even in societies that seem to be turning away from religious belief In this book Julian Perlmutter examines how in light of its wide appeal sacred music can have religious significance for people regardless of their religious convictions By differentiating between doctrinal belief and the desire for God Perlmutter explores a longing for the spiritual

that is compatible with both belief and interested non belief He describes how sacred music can elicit this kind of longing thereby helping the listener to grow in religious openness The work of Thomas Merton is also analyzed in order to show that musically elicited desire for God can be incorporated into the Christian practice of contemplative prayer aimed ultimately at a union of love with God By exploring connections between desire knowledge and religious practice this engaging account illustrates how sacred music can have a transformative effect on one s wider spiritual life Of particular interest to philosophers and theologians the book makes a novel contribution to several topics including religious epistemology the philosophy of emotion and aesthetics *The Substance of Consciousness* Brandon Rickabaugh, J. P. Moreland, 2023-10-31 A singularly powerful and rigorous argument in favor of modern substance dualism In *The Substance of Consciousness* A Comprehensive Defense of Contemporary Substance Dualism two distinguished philosophers deliver a unique and powerful defense of contemporary substance dualism which makes the claim that the human person is an embodied fundamental immaterial and unifying substance Multidisciplinary in scope the book explores areas of philosophy cognitive science neuroscience and the sociology of mind body beliefs The authors present the most comprehensive up to date and rigorous non edited work on substance dualism in the field as well as a detailed history of how property and substance dualism have been presented and evaluated over the last 150 years Alongside developing new and updated positive arguments for substance dualism they also discuss key metaphysical notions and distinctions that inform the examination of substance dualism and its alternatives Readers will also find A thorough examination of the recent shift away from standard physicalism and the renaissance of substance dualism Comprehensive explorations of the likely future of substance dualism in the twenty first century including an exhaustive list of proposed research projects for substance dualists Practical discussion of new and rigorous critiques of significant physicality alternatives including emergentism and panpsychism Extensive treatments of philosophy of mind debates about the roles played by staunch faint hearted naturalism and theism in establishing or presuming methodology epistemic priorities and prior metaphysical commitments Perfect for professional philosophers *The Substance of Consciousness* will also earn a place in the libraries of consciousness researchers philosophical theologians and religious studies scholars *Philosophy, History, and Theology* Alan P.F. Sell, 2012-04-06 Alan Sell here presents a selection of his wide ranging informative and entertaining reviews Among philosophical themes discussed are Locke and the Enlightenment Richard Price John Stuart Mill philosophical idealism and analytical philosophy of education and of religion Historical studies run from the Middle Ages onwards and encompass English Welsh and Scottish Nonconformity the Evangelical Revival the Oxford Movement theological education American Reformed thinkers the crisis of belief and the Social Gospel in Canada and evangelical and liberal theology Theological topics include Origen Calvin and Dutch Reformed thinkers American Baptists Mercersburg Theology Scottish theology liberation theology assurance the atonement ecclesiology ecumenism art and theology Christian ethics worship and spirituality *Human Beings* David

*Personal Identity, the Self, and Ethics* F. Santos,Santiago Sia,2007-08-16 Going beyond the controversy surrounding personhood in non philosophical contexts this book defends the need for a credible philosophical conception of the person Engaging with John Locke Derek Parfit and P F Strawson the authors develop an original philosophical anthropology based on the work of Charles Hartshorne and A N Whitehead **Immortality** Paul Edwards,2009-12-02 Is there life after death or do we simply cease to exist Renowned scholar Paul Edwards has compiled Immortality a superb group of philosophical selections featuring the work of both classical and contemporary authors who address the topics of immortality soul and body transmigration materialism epiphenomenalism physical research and parapsychology reincarnation disembodied existence and much more In addition to a 70 page editorial introduction offering an in depth discussion of the forms which belief in immortality has taken this volume includes selections from Thomas Aquinas A J Ayer Paul and Linda Badham John Beloff C D Broad Joseph Butler Rene Descartes C J Ducasse Paul Edwards Hugh Elliot Antony Flew John Foster Peter Geach John Hick John Hospers David Hume William James Raynor Johnson Immanuel Kant John Locke Lucretius Donald MacKay John Stuart Mill Derek Parfit Plato H H Price Joseph Priestley Thomas Reid Tertullian Peter van Inwagen and Voltaire Also included is a detailed annotated bibliography **The Recalcitrant Imago Dei** J.P. Moreland,2013-02-12 The Veritas Series refuses to accept disciplinary isolation both for theology and for other disciplines The Recalcitrant Imago Dei offers a critical discussion of naturalism the idea that all phenomena can be explained by the physical sciences **The Persistence of Persons**

Valerio Buonomo (Ed.), 2022-09-06 We ordinarily believe that the inhabitants of the world including ourselves persist over time. Such an idea, however, has puzzled philosophers for centuries. How can we change and still be the same? More specifically, is there any constitutive condition of our identity over time? And if so, does this condition involve mental aspects such as memories, beliefs, experiences, etc., physical aspects such as the body or the continuity of the organism, or something else? Or is it rather personal identity, primitive and unanalyzable, so that our persistence is nothing but a brute fact? This volume is a collection of new essays from leading figures in the field, analyzing the persistence of persons and the criteria of personal identity over time. It presents an extensive discussion of the most relevant views on personal identity in contemporary metaphysics and provides new treatments of the constitutive conditions of personal persistence.

### **Identity and Modality**

Fraser MacBride, 2006-07-20 The papers in this volume address fundamental and interrelated philosophical issues concerning modality and identity issues that have not only been pivotal to the development of analytic philosophy in the twentieth century but remain a key focus of metaphysical debate in the twenty-first. How are we to understand the concepts of necessity and possibility? Is chance a basic ingredient of reality? How are we to make sense of claims about personal identity? Do numbers require distinctive identity criteria? Does the capacity to identify an object presuppose an ability to bring it under a sortal concept? Rather than presenting a single partisan perspective, *Identity and Modality* enriches our understanding of identity and modality by bringing together papers written by leading researchers working in metaphysics, the philosophy of mind, the philosophy of science, and the philosophy of mathematics. The resulting variety of perspectives correspondingly reflects both the breadth and depth of contemporary theorizing about identity and modality, each paper addressing a particular issue and advancing our knowledge of the area. This volume will provide essential reading for graduate students in the subject and professional philosophers.
