The Politics of Crisis Management in China Sonny Shiu-Hing Lo, 2014-11-14 This book analyzes the ways in which the Chinese government and military responded to the 2008 Wenchuan earthquake in Sichuan province. It adopts a comparative and historical perspective in studying the responses of the Chinese government in the first critical 72 hours, the mobilization of the People's Liberation Army and its difficulties, the assertive and important role of the non-governmental groups which established a partnership with the state in the rescue operations and the process and politics of reconstruction. The book is rich in materials including comparative case studies of the Tangshan earthquake in 1976, the outbreak of the Severe Acute Respiratory Syndrome in 2003, the earthquakes in Haiti, Chile and Myanmar, and the contrasts with the Japanese earthquake tsunami in 2011. Researchers, government officials, policy analysts, seismic specialists, journalists and students will find this book extremely useful, conceptually insightful and practically policy relevant. *The Wenchuan Earthquake of 2008* Yong Chen, David C. Booth, 2012-09-11 The Wenchuan Earthquake of 2008: Anatomy of a Disaster gives a detailed account of the damage, seismology and tectonics of the event and discusses earthquake prediction, seismic hazard and risk management, the creation and implementation of building codes and new practices used in rescue, relief and reconstruction. It will be of significant interest to researchers and practitioners engaged in seismology, geophysics, engineering, the social sciences and disaster management and recovery. It also offers a valuable new and unique Chinese perspective with many insights for future mitigation of earthquake risk. Professor Yong Chen works for the China Earthquake Administration. Dr David C Booth works for the British Geological Survey. *Earthquake lessons from China* Chen, Kevin Z, Zhang, Qiang, Hsu, Claire, 2016-04-13 The Wenchuan County earthquake of 2008 was the most severe earthquake as measured in sheer magnitude in the history of the People's Republic of China. Killing almost 90,000 people and creating economic losses of 84.5 billion yuan (US 13.2 billion), the earthquake also elicited a vigorous response from various government agencies, private businesses and nongovernmental organizations (NGOs). The ways these actors responded to the earthquake proved effective in distributing appropriate aid to those in need and the areas where the actors' earthquake response needs to be improved are discussed and analyzed in *Earthquake Lessons from China: Coping and Rebuilding Strategies*. The authors identify three earthquake responses that proved helpful to earthquake-affected communities: the use of a pair-wise aid policy in which a donor province or city is assigned to give aid to a particular earthquake-affected area; expanded NGO and volunteer involvement; and various kinds of public financial aid to earthquake-affected households. They also pinpoint areas that need further work: public aid specifically for home reconstruction, which has been inadequate; and the capacity of local communities to manage their own disaster responses, which is too low. Perhaps most important, the authors found that the high levels of NGO and volunteer involvement in disaster response should be expanded and sustained beyond what they were in the aftermath of the 2008 earthquake. The authors believe that increased nonpublic sector involvement can not only improve the

level of response to natural disasters but also foster a robust civil society and grassroots democracy in China

**Earthquake and Disaster Risk: Decade Retrospective of the Wenchuan Earthquake** Yong-Gang Li, 2019-05-15 This book presents review papers and research articles focusing on the 2008 Wenchuan earthquake in Sichuan China discussing cross disciplinary and multiple thematic aspects of modern seismological geophysical geological and stochastic methodology and technology Resulting from international and regional earthquake research and disaster mitigation collaborations and written by international authors from multiple institutions and disciplines it describes methods and techniques in earthquake science based on investigations of the Wenchuan earthquake It also includes extensive reference lists to aid further research The book helps both senior researchers and graduate students in earthquake science to broaden their horizons in data analysis numerical modeling and structural retrieval for the tectonic geological geophysical and mechanical interpretation of the 2008 M8 Wenchuan earthquake to support a global and regional cooperation for preparedness and the mitigation and management of seismic risk

life and property Applying all the remote sensing technology available the Chinese Academy of Sciences immediately launched into action making full use of its state of the art facilities remote sensing planes and satellites to amass invaluable optical and radar data This unprecedented use of comprehensive remote sensing techniques provided accurate up to the minute information for disaster management and has left us with a visually stunning and beautiful record that is as much a scientific achievement as it is an artistic one Based on the accumulated data and images collected by the Project Team of Remote Sensing Monitoring and Assessment of the Wenchuan Earthquake Atlas of Remote Sensing of the Wenchuan Earthquake documents the events as they happened in real time The book covers the disaster from six aspects geological barrier lakes collapsed buildings damaged roads destroyed farmland and forests and demolished infrastructure It also demonstrates that the Dujiangyan Irrigation Project which has been standing for 2000 years remains fully functioning and keeps the Chengdu Plain operating optimally even after the earthquake Translated into English for the first time the Atlas presents a pictorial summation of this unique project It chronicles the event with over 280 before and after color images from a range of perspectives This volume dramatically demonstrates the value of remote sensing for understanding how an earthquake unfolds and the potential of remote sensing in helping coordinate emergency relief A pictorial record of events as they unfolded this book provides a systematic documentation of earthquake damage that can be used to prepare for future seismic events

Justice Denied, 2009      **The Reconstruction of the Sichuan Earthquake** Qiuxi Li, 2017 The massive earthquake struck the southwest of China leaving more than 87 000 people dead and millions of homeless Many of the victims are Qiang an ethnic minority group in China In the years since the catastrophe the Chinese government has undertaken the enormous task of rebuilding homes infrastructure industries as well as restoring ethnic culture Eight years after the earthquake the author revisited several sites in the quake zone focusing on the reconstruction work lives of survivors and the impacts on Qiang culture Through comparing the fieldwork observation with media reports this study aims to unfold a rich image of the lives of people in these reconstructed sites As a majority of the news coverage focuses on positive coverage of the reconstruction work the fieldwork result indicated that these affected sites varied on their economic statuses Moreover tourism has played a critical role in the economic recovery in these sites Stimulated by the demand of tourism places that retain the purest ethnic culture pay more attention to maintain their heritage and cultural practices while communities assimilated into the majority culture have witnessed a revival of ethnicity as a new source of income Furthermore the catastrophe is neither the main cause of rural urban migration among Qiang people nor the dying out of the intangible culture of Qiang It is more likely to be an accelerator of cultural integration process that is already underway in the context of modernization and urbanization The earthquake in fact called unprecedented attention to the endangered Qiang culture and brought an amplified level of respect to the Qiang people
