Geographies Of Development:

Geographies of Development Robert Potter, Tony Binns, Jennifer A. Elliott, Etienne Nel, David W. Smith, 2017-12-14 Now in its fourth edition *Geographies of Development: An Introduction to Development Studies* remains a core balanced and comprehensive introductory textbook for students of Development Studies, Development Geography and related fields. This clear and concise text encourages critical engagement by integrating theory alongside practice and related key topics throughout. It demonstrates informatively that ideas concerning development have been many and varied and highly contested, varying from time to time and from place to place. Clearly written and accessible for students who have no prior knowledge of development, the book provides the basics in terms of a geographical approach to development: what, where, when and why. Over 200 maps, charts, tables, textboxes and pictures break up the text and offer alternative ways of showing the information. The text is further enhanced by a range of pedagogical features: chapter outlines, case studies, key thinkers, critical reflections, key points and summaries, discussion topics and further reading. *Geographies of Development* continues to be an invaluable introductory text not only for geography students but also anyone in area studies, international studies and development studies.

Geographies of Development in the 21st Century Sylvia H. Chant, Cathy McIlwaine, 2009-01-01 This is an excellent book and should prove to be a valuable text for geography and development studies students. Hedley Knibbs, *Geography*. *Geographies of Development in the 21st Century* provides a very accessible and comprehensive account of a broad spectrum of key contemporary issues of concern to geographers and development studies specialists. The world over, I am sure that this excellent volume will be widely read and appreciated. Professor Andrea Cornwall, University of Sussex, UK. Uneven, contradictory and complex is how Sylvia Chant and Cathy McIlwaine describe the processes of development that constitute the subject of this distinctive and lively introductory text. Seeking to comprehend, let alone portray with any degree of accuracy, the burden of these three adjectives with reference to the sheer diversity within what is sometimes called the majority world is a daunting challenge. Chant and McIlwaine draw on their first-hand experience on the ground in several countries spread across all the major continents of the global South, stretching well beyond conventional academic research into NGOs, social movements and major international agencies. Students will find the blend of accessibly written broad survey and case study very helpful. In addition to lists of important websites, further reading and learning outcomes, the text is interspersed with focused activities to foster active learning. Professor David Simon, Royal Holloway, University of London, UK. Written by two widely published academics with many years' experience in university teaching, research and consultancy, *Geographies of Development in the 21st Century* provides a concise yet informative introduction to

development in the contemporary Global South Incorporating field research from Mexico Costa Rica Guatemala Colombia El Salvador the Philippines Botswana and The Gambia Sylvia Chant and Cathy McIlwaine bring alive a body of fascinating subject matter extending across gender family poverty employment household livelihoods the informal economy housing migration civil society conflict and violence Reflecting both authors enduring interests in the academic policy interface the book is also informed by assignments they have undertaken for various international organisations such as the World Bank Inter American Development Bank UNDP UNICEF ILO and the Commonwealth Secretariat This timely and engaging volume will be an essential companion for undergraduate students taking introductory courses in development and globalisation as well as a useful reference and repository of teaching and learning ideas for those lecturing on the subject Students will not only find this resource refreshingly accessible and user friendly but will be able to further their knowledge guided by annotated readings key internet sources and a range of learning activities
