Generations Herb Greene:

Generations Herb Greene, Lila Cohen, 2015 *Generations* showcases six decades of the art and architecture of Herb Greene informed by his interest in science and history. This picture book is organized to showcase large scale images of Mr. Greene's architectural work alongside his collage paintings and Armature drawings in a way that reveals the unified philosophy behind all of his work. Its purpose is to tell a story of the important interrelationships between art, science, and philosophy which is described with simple narrative juxtaposed alongside these images.

Renegades Luca Guido, Stephanie Pilat, Angela Person, 2020-01-28 Like America itself, the architecture of the United States is an amalgam, an imitation or an importation of foreign forms adapted to the natural or engineered landscape of the New World. So can there be an American School of architecture? The most legitimate claim to the title emerged in the 1950s and 1960s at the Gibbs College of Architecture at the University of Oklahoma where, under the leadership of Bruce Goff, Herb Greene, Mendel Glickman, and others, an authentically American approach to design found its purest expression, teachable in its coherence and logic. Followers of this first truly American school eschewed the forms most in fashion in American architectural education at the time, those such as the French Beaux Arts or German Bauhaus Schools, in favor of the vernacular and the organic. The result was a style distinctly experimental, resourceful, and contextually challenging, not only established architectural norms in form and function but also traditional approaches to instructing and inspiring young architects. Edited by Luca Guido, Stephanie Pilat, and Angela Person, this volume explores the fraught history of this distinctively American movement born on the Oklahoma prairie. *Renegades* features essays by leading scholars and includes a wide range of images, including rare, never before published sketches and models. Together, these essays and illustrations map the contours of an American architecture that combines this country's landscape and technology through experimentation and invention, assembling the diversity of the United States into structures of true beauty. *Renegades* for the first time fully captures the essence and conveys the importance of the American School of architecture.

Generation, 1966 **Still So Excited!** Ruth Pointer, Marshall Terrill, 2016-02-01 *Still So Excited* My Life as a Pointer Sister is an engaging, funny, heartbreaking, and poignant look at Ruth Pointer's roller coaster life in and out of the Pointer Sisters. When overnight success came to the Pointer Sisters in 1973, they all thought it was the answer to their long-held prayers. While it may have served as an introduction to the good life, it also was an introduction to the high life of limos, champagne, white glove treatment, and mountains of cocaine that were the norm in the high-flying 70s and 80s. Pointer's devastating addictions took her to the brink of death in 1984. Pointer has bounced back to live a drug and alcohol-free life for the past 30 years, and she shares how in her first autobiography, detailing the Pointer Sisters' humble beginning, musical apprenticeship, stratospheric success, miraculous comeback, and the melodic sound that captured the hearts of millions of music fans.

The Next Generation Judith Ennew, Brian Milne, 1990 **Rock and Roll Explorer Guide to San Francisco and the Bay Area** Mike Katz, Crispin Kott, 2021-05-14 San Francisco's rich and unique cultural history since its

time as a gold rush frontier town has long made it a bastion of forward thinking and freedom of expression. It makes perfect sense then that both it and the surrounding Bay Area should prove to be a crucible for some of the most enduring and influential music of the rock and roll era. From the heady days of Haight Ashbury in the 60s to today, San Francisco and the Bay Area have provided a distinctive soundtrack to the American experience that has often been confrontational, controversial, enlightening and always entertaining. Perhaps best known for the 60s psychedelic scene which included the Grateful Dead, Jefferson Airplane, Creedence Clearwater Revival, Santana, the Steve Miller Band, Sly and the Family Stone, punk later gripped the East Bay giving us Green Day and Rancid. From the folk and blues eras through the chart topping sounds of Journey and Huey Lewis and the News where the Clash recorded much of their second album where a drug addled Keith Moon passed out during a concert by the Who only to be replaced behind the drum kit by an eager fan. Rock and roll is baked into the Bay Area's culture and story to this day. A guide to the places that shaped the local scene and world famous sound, the Rock and Roll Explorer Guide to San Francisco and the Bay Area will take you to where music makers lived, rocked, performed, recorded, met, broke up and much much more.

Who Shot Rock and Roll Gail Buckland, 2009-10-20. More than two hundred spectacular photographs, sensual, luminous, frenzied, true from 1955 to the present that catch and define the energy, intoxication, rebellion and magic of rock and roll, the first book to explore the photographs and the photographers who captured rock's message of freedom and personal reinvention and to examine the effect of their pictures on the musicians, the fans and the culture itself. The only music photographers whose names are well known are those who themselves have become celebrities. But many of the images that have shaped our consciousness and desire were made by photographers whose names are unfamiliar. Here are Elvis in 1956, not yet mythic but beautiful, tender, vulnerable, sexy, photographed by Alfred Wertheimer. Bob Dylan and his girlfriend on a snowy Greenwich Village street by Don Hunstein. John Lennon in a sleeveless New York City T-shirt by Bob Gruen. Jimi Hendrix by Gered Mankowitz, a photograph that became a poster and was hung on the walls of millions of bedrooms and college dorms. For the first time, the work of these talented men and women is brought into the pantheon; we see the musicians they photographed and how the images gave rock and roll its visual identity. To bring together these images, Gail Buckland, acclaimed photographic editor, curator and scholar, looked through the archives of one hundred photographers, selecting pictures not on the basis of the usual suspects but on the power of the images themselves, often picking an image a photographer didn't even remember he or she had taken. Buckland writes about the photographers, their influences, their relationships with their subjects, how they took the images, how they saw what they saw and captured what they captured, the spirit and essence of rock. A revelation of an art form whose iconic images changed the world as we knew it.

Oklahoma City's Mid-Century Modern Architecture Lynne Rostochil, 2017. From its very first land run days in 1889, Oklahoma City has been a mecca for daring men and women intent on transforming the flat grassy prairie into a thoroughly modern metropolis. This risk-taking ethic came to beautiful fruition after World War II when several enterprising young

architects many of whom were students of the mighty Bruce Goff at the University of Oklahoma rejected traditional styles and approaches and enthusiastically embraced more modern forms in their sleek ambitious building designs The result is a vast collection of bold mid century modern structures that span every function and budget from the giant egg shaped First Christian Church to the modest but equally dramatic Neptune Subs building to homes like the spiral shaped Zuhdi House This book celebrates Oklahoma City s unique built landscape and the minds behind our best architectural treasures
