Generations In Africa Connections And Conflicts Beitrage Zur Afrikaforschung:

Generations in Africa Erdmute Alber, Sjaak van der Geest, Susan Reynolds Whyte, 2008 Though long neglected in anthropological research the connections and conflicts between generations are at the heart of social processes In this book sixteen studies examine relations between generations of kin and between historical and political generations The topics range from grandmother s cooking migrant remittances youth unemployment teenage pregnancy Valentine s Day and hip hop music to respect religious virtue gerontocracy memory wisdom complaint and the meaning of tradition Together they reinvigorate and expand the old anthropological interest in generation showing how necessary it is to understanding contemporary African societies

The Lost World of Socialists at Europe's Margins Maria Todorova, 2020-09-03 Maria Todorova s book is devoted to the golden age of the socialist idea broadly surveying the period in and around the time of the Second International It critically examines the promise for an alternative socialist utopia from 1870 to the 1920s Todorova brings in the experience of the periphery in a comparative context in the belief that the margins can often elucidate better the character of a phenomenon and de provincialize it from essentialist notions In doing so *The Lost World of Socialists at Europe s Margins* moves beyond the traditional historiographical emphasis on ideology by looking at different intersections or entanglements of spaces generations genders ideas and feelings and different flows of historical time The study provides a social and cultural history of early socialism in Eastern Europe with an emphasis on Bulgaria arguably the country with the earliest and strongest socialist movement in Southeast Europe and one that had a unique relationship to both German and Russian social democracy Based on a rich prosopographical database of around 3500 biographies of people born in the 19th century the book addresses the interplay of several generations of leftists looking at the specifics of how ideas were generated received transferred and transformed Finally the work investigates the intersection between subjectivity and memory as reflected in a unique cache of archival materials containing over 4000 documentary sources including diaries oral interviews and unpublished memoirs A microhistorical approach to this material allows the reconstruction of structures of feeling that inspired an exceptional group of individuals

2002 Anthropological Abstract **Routledge Handbook of Childhood Studies and Global Development** Tatek Abebe, Anandini Dar, Karen Wells, 2024-08-28 The Routledge Handbook of Childhood Studies and Global Development explores how global development agendas and processes of economic development influence children's lives. It demonstrates that children are not only the frequent targets or objects of development but that they also shape and influence processes of economic, political and sociocultural development. The handbook makes the case for the importance of placing children at the heart of development debates and demonstrates how researchers, policymakers and practitioners can engage children in development. Through reports on field research as well as a critical engagement with theories in development studies and childhood studies, contributors contest normative assumptions about childhood and global development. They tease out and tease apart the complex social, historical, cultural, economic, epidemiological, ecological, geopolitical and institutional processes transforming what it means to be young in the world today. Showcasing research from both established scholars and early career researchers and with particular prominence given to the work of authors from the global south, this book will be an essential reference for policymakers, practitioners and for researchers and students across childhood studies, education, geography, sociology and global development.

Anthropological Perspectives on Care Erdmute Alber, 2015-09-01 In the course of last two decades, the notion of care has become prominent in the social and cultural sciences. As a result of this proliferation of care in several disciplinary fields, we are observing not only the expansion of its conceptual meaning but also an increasing imprecision in its usage. A growing amount of literature focuses on the intersection between work, gender, ethnicity, affect and mobility regimes. In view of this growing field of literature, *Anthropological Perspectives on Care* looks at the notion of care from an anthropological perspective. Complementing earlier approaches, Alber and Drotbohm argue that an interpretation of care in relation to three different concepts, namely work, kinship and the life course, will facilitate empirical and conceptual distinctions between the different activities that are labeled as care.

2010 Redaktion Osnabrück, 2011-06-16 Generationen-Bande Tabea Häberlein, 2016 Die Beziehungen zwischen Generationen sind in einer Gesellschaft allgegenwärtig. Sie strukturieren gesellschaftliche Ordnung und sind die Basis verwandtschaftlicher Fürsorge. Werden von historischen Einflüssen geprägt und verändert, sind sie so auch bei den Lama Kabaye im Nordosten Togos. Diese Monographie beschreibt Bindungen und Reibungen zwischen den Generationen im Dorf Assir angesichts gesellschaftlichen Wandels. Sie hebt die Stabilität und Belastbarkeit dieser Beziehungssachse hervor und leistet damit einen Beitrag zur aktuellen ethnologischen Generationenforschung.
