Portuondo,2013-04-18 The discovery of the New World raised many questions for early modern scientists What did these lands contain Where did they lie in relation to Europe Who lived there and what were their inhabitants like Imperial expansion necessitated changes in the way scientific knowledge was gathered and Spanish cosmographers in particular were charged with turning their observations of the New World into a body of knowledge that could be used for governing the largest empire the world had ever known As Mar a M Portuondo here shows this cosmographic knowledge had considerable strategic defensive and monetary value that royal scientists were charged with safeguarding from foreign and internal

enemies Cosmography was thus a secret science but despite the limited dissemination of this body of knowledge royal cosmographers applied alternative epistemologies and new methodologies that changed the discipline and in the process how Europeans understood the natural world Greenhouse: Planning for Climate Change GI Pearman,1988-01-01 It is important for the reader to understand clearly the objectives of these papers They are not an attempt to provide accurate predictions of what is going to happen in Australia over the next few decades Rather they represent sensitivity studies designed to illustrate to what extent we as a nation are dependent on the climate and likely to be affected by climatic change and attempts to develop the techniques for such sensitivity analyses For this the climate scenario reproduced in the Appendix to this volume was a key A Dictionary of the English Language Johnson,1834 A Dictionary of the English Language, abstracted from the folio edition ...
