Conyers, 2016-01-14 There has long been a strong collaboration between geologists and archaeologists and the sub field of geoarchaeology is well developed as a discipline in its own right This book now bridges the gap between those fields and the geophysical technique of ground penetrating radar GPR which allows for three dimensional analysis of the ground to visualize both geological and archaeological materials This method has the ability to produce images of the ground that display complex packages of materials and allows researchers to integrate sedimentary units soils and associated archaeological features in ways not possible using standard excavation techniques The ability of GPR to visualize all these buried units can help archaeologists place ancient people within the landscapes and environments of their time and understand their burial and preservation phenomena in three dimensions Readership Advanced students in archaeology and geoarchaeology as well as practicing archaeologists with an interest in GPS techniques

Digital Geoarchaeology Christoph Siart, Markus Forbriger, Olaf Bubenzer, 2017-12-03 This book focusses on new technologies and multi method research designs in the field of modern archaeology which increasingly crosses academic boundaries to investigate past human environmental relationships and to reconstruct palaeolandscapes It aims at establishing the concept of Digital Geoarchaeology as a novel approach of

interdisciplinary collaboration situated at the scientific interface between classical studies geosciences and computer sciences Among others the book includes topics such as geographic information systems spatiotemporal analysis remote sensing applications laser scanning digital elevation models geophysical prospecting data fusion and 3D visualisation categorized in four major sections Each section is introduced by a general thematic overview and followed by case studies which vividly illustrate the broad spectrum of potential applications and new research designs Mutual fields of work and common technologies are identified and discussed from different scholarly perspectives By stimulating knowledge transfer and fostering interdisciplinary collaboration Digital Geoarchaeology helps generate valuable synergies and contributes to a better understanding of ancient landscapes along with their forming processes Chapters 1 2 6 8 and 14 are published open access under a CC BY 4 0 license at link springer com

Human Interactions with the Geosphere Lucy Wilson, 2011 Human impact on our environment is not a new phenomenon For millennia humans have been coping with or provoking environmental change We have exploited extracted over used but also in many cases nurtured the resources that the geosphere offers Geoarchaeology studies the traces of human interactions with the geosphere and provides the key to recognizing landscape and environmental change human impacts and the effects of environmental change on human societies This collection of papers from around the world includes case studies and broader reviews covering the time period since before modern human beings came into existence up until the present day To understand ourselves we need to understand that our world is constantly changing and that change is dynamic and complex Geoarchaeology provides an inclusive and long term view of human geosphere interactions and serves as a valuable aid to those who try to determine sustainable policies for the future
