Geographical Epidemiology Of The Toxemias Of Pregnancy:

Geographical Epidemiology of the Toxemias of Pregnancy Arthur Michael Davies, 1971 **Current Bibliography of Epidemiology**, 1970 **Immunology of Pregnancy 2013** Gérard Chaouat, Olivier Sandra, Nathalie Lédée, 2013-11-08

Since a September 1992 Nature article which read Can there be life without LIF researchers now realize that the maternal immune system is both a foe it can reject the conception and a friend immune cells and molecules are also necessary for successful pregnancy Leukemia Inhibitory Factor LIF when absent prevents embryo implantation in rodents From fecundation to parturition immunity acts as a Janus required but potentially dangerous However the complexity and the diversity of immunity in pregnancy deters many from entering the field This book will try to give a complete overview of immunity from gametes till parturition in brief but with complete chapters and subsections each written by specialists in the field The importance of the topic relies not only on the riddle of the fetal allograft which is per se fascinating but on its consequences linked to the development of IVF and in general Assisted Reproductive Technologies ART Medicine Since the discovery that there would not be mammalian life without LIF it has become clear that Immune Molecules and in general transient post mating inflammatory reactions are required for successful implantation Disruptions of this process can lead to implantation failure sterility In later stages of pregnancy immunological cells mostly of the innate immune system control formation of local spiral arteries Finally a state of tolerance establishes itself whose break leads to immune abortion and the vascular bed is further transformed and enlarged till delivery and here again immunological cytokines do play a major role and can eventually cause immune mediated abortion Failure of not just the cytokine and cell recognition mediated dialogue but also the pre and peri implantation preparation of the uterus as stated leads to sterility early pregnancy loss and recurrent abortions There is also an increasingly stronger argument to implicate immunology in pre eclampsia Further still immunology is also implicated in the control of local infection mother to child transmission of pathogens notably but not limited to HIV Finally pregnancy is the only known physiological phenomenon where the once named suppressor T cells re emerge as regulatory T cells and play a cardinal role This E book provides a complete compendium of gynecological immunology spanning from fecundation to delivery Topics also include the role of various cell types such as T regs ad NK cells in implantation and uterine changes as well as the genetic regulation of immunological processes As such it will be of interest not only to fundamental and reproductive immunologists but more importantly clinicians in obstetrics and gynecology *Cumulated Index Medicus*, 1971 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1971 First multi year cumulation covers six years 1965 70 *Clinical Pharmacology in Obstetrics* Peter Lewis, 2013-10-22 Clinical Pharmacology in Obstetrics presents an extensive examination of drug usage in pregnancy It discusses the principles behind the adverse effects of drugs on the fetus It addresses studies in the drug treatment of heart disease in pregnancy Some of the topics covered in the book are the examination of pharmacokinetics in pregnancy analgesia

Chalmers,1982-04-22 The potential contribution of antenatal care to health is enormous However if this potential is to be fully realised the content and organisation of that care must be more imaginatively conceived and realised and must take into account the uncomfortable paradox that antenatal care is a mixture of science and magic This book faces that paradox asking what in antenatal care has been shown by proper scientific method to work what is questionable dogma what is magic what should be done now This volume is intended not only for those professionals giving the care and for the potential mothers receiving it but also for all those who influence decisions concerning the future of antenatal care such as politicians researchers and the public in general *Prevention of Embryonic, Fetal, and Perinatal Disease* Robert L.
