

## ? Why Do We Have Day and Night?

The earth is like a huge spinning ball, always turning in the same direction. It is daytime where we live when our part of the world is facing the sun. It is night, though, when we are turned away from the sun.

Because the earth spins from left to right, when it's early morning in the mountains of Asia, it's the middle of the night in Europe, and early in the evening in the eastern United States.

## ? Why Does the Sun Rise in the East And Set in the West?

The earth always turns towards the east, the way the arrows are pointing in the picture. As our part of the world moves east, in the direction the earth is turning, it seems as if the sun flows in the east. At noon it seems to be right overhead. And in the evening at sunset it seems to disappear below the horizon in the west.

## Ancient beliefs about day and night

The people of ancient India believed that the sun moved round a mountain at the center of the world. They thought night came when the sun hid on the other side of the mountain.

### • By the People

They were right to think that the mountain of the world was the place where the sun hid. But they were wrong to think that the sun hid on the other side of the mountain. The sun is always there, shining on the world. It is only when the sun is behind the mountain that it is night. The sun is always there, shining on the world. It is only when the sun is behind the mountain that it is night.
