Flikschuh, Lea Ypi, 2014-11-20 This is the first book dedicated to a systematic exploration of Kant's position on colonialism. Bringing together a team of leading scholars in both the history of political thought and normative theory, the chapters in the volume seek to place Kant's thoughts on colonialism in historical context, examine the tensions that the assessment of colonialism produces in Kant's work, and evaluate the relevance of these reflections for current debates on global justice and the relation of Western political thinking to other parts of the world. Boundaries, Territory and Postmodernity David Newman, 2013-11-05 Contributions to this collection seek to determine the extent to which states and boundaries have in fact disappeared or are simply changing their functions as we move from an era of fixed territories into a post-Westphalian territorial system. A group of international political geographers and political scientists examine the changing nature of the state, pointing to significant changes on the one hand but equally noting the continued importance of territory and boundaries in determining the political ordering of the post-modern world. **Contemporary Issues and U.S. National Security**

**Interests in Africa South of the Sahara**, 1985 **Marxism and National Identity** Robert Stuart, 2006-06-01 Post-Marxists argue that nationalism is the black hole into which Marxism has collapsed at today's end of history. Robert Stuart analyzes the origins of this implosion, revealing a shattering collision between Marxist socialism and national identity in France at the close of the nineteenth century. During the time of the Boulanger crisis and the Dreyfus affair, nationalist mobs roamed the streets chanting France for the French, while socialist militants marshaled proletarians for world revolution. This is the first study to focus on those militants as they struggled to reconcile Marxism's two national agendas: the cosmopolitan conviction that workingmen have no country on the one hand, and the patriotic assumption that the working class alone represents national authenticity on the other. Anti-Semitism posed a particular problem for such socialists, not least because so many workers had succumbed to racist temptation. In analyzing the resultant encounter between France's anti-Semites and the Marxist Left, Stuart addresses the vexed issue of Marxism's involvement with political anti-Semitism.

**Supernatural Environments in Shakespeare's England** Kristen Poole, 2011-06-30 Bringing together recent scholarship on religion and the spatial imagination, Kristen Poole examines how changing religious beliefs and transforming conceptions of space were mutually informative in the decades around 1600. *Supernatural Environments in Shakespeare's England* explores a series of cultural spaces that focused attention on interactions between the human and the demonic or divine: the deathbed, purgatory, demonic contracts, and their spatial surround. Reformation cosmologies and a landscape newly subject to cartographic surveying. It examines the seemingly incongruous coexistence of traditional religious beliefs and new mathematical/geometrical ways of perceiving the environment. Arguing that the late sixteenth and early seventeenth-century stage dramatized the phenomenological tension that resulted from this uneasy confluence, this groundbreaking study considers the complex nature of supernatural environments in Marlowe's *Doctor Faustus* and Shakespeare's *Othello*, *Hamlet*, *Macbeth*, and *The Tempest*. **The Publishers Weekly**, 1911 *The Educational Times*, and *Journal of the College of*
