

Let the Efficiency Booster cut your gas heating bill!

Now, at last, heat is drawn right up the chimney, then can be saved and recycled, back into the existing furnace heating system. The Efficiency Booster System installs easily on a new or existing central gas heating furnace (either natural or LP gas).

The Efficiency Booster does not alter the operation of the furnace in any way and, with only one moving part — a UL-approved water pump — the system is tough, reliable. It is also certified by the American Gas Association. When the existing furnace heating system is in good condition, and the Efficiency Booster System has been expertly installed by a properly trained technician, heating bills can be dramatically reduced. The particular installation, application and local weather conditions will, of course, affect actual results.

Safe design

The Efficiency Booster is completely safe when installed by a properly trained technician. If, for any reason, it fails to operate, the furnace continues to function normally. Plus gases simply exit from the existing chimney.

Qualifies for tax credit (within IRS guidelines)

The Efficiency Booster qualifies for a 15% Federal Energy Tax Credit when the system is installed in a principal residence substantially completed before April 29, 1977. That means even more savings for the owner, and a faster payback.

Total Efficiency Booster System

The entire installation system consists of these few parts: main cabinet containing primary and secondary spray system tubes, float and float valve assembly, strainer, water supply connection, drain connection, heat exchanger coil, water connections to and from coil, pressure vent, and a package of small hardware. Fastenings, plumbing and vent connections are minimal.

Older furnaces can now be made more efficient

The Efficiency Booster System works on furnaces up to 165,000 Btu/h and can raise the steady-state efficiency of conventional furnaces to 92%. That's about the same as installing older furnaces as energy efficient as a brand new, high efficiency model.

Efficiency Booster mounts on furnace

Slim, lightweight design enables the Efficiency Booster to be mounted on either side of the furnace, on the wall, or suspended from floor joists.

Carrier Heater Instruction Manual
