

Cut the same sized rabbet on the uncut ends of each leg.

The larger top rabbet is cut on the same face as the rabbet on the opposite end.

The larger rabbet cuts on the top rails and legs will form a half lap joint.

The half lap joint is secured with glue and 1 1/4" screws. Build two frames using two legs and one top rail for each assembly. Be sure to apply wood glue to all surfaces of the rabbet cuts before clamping and securing with screws.

The frames can now be connected to each other using the support rails. Two are at the top, flush with the top surface of the legs. The other two are attached with their top edges 16" above the lower leg ends.

Attach the rails to both frames with a simple butt joint and glue. Use two 3" screws, in pilot holes, to secure each joint. Corner blocks will strengthen these connections.

Position the leg frames so that the lower rabbet cuts on the legs face inwards (i.e. face each other).

Glue and nail the four corner blocks into the top corners. They should be set flush with the top edge of the cart frame.

The bottom board is a piece of 3/4" thick particleboard. Cut it to size and install it in the 3/4" rabbets at the bottom of each leg. Use glue and two 2" screws to secure this panel.

While the cart is upside down, attach the four wheel assemblies. I used a combination of 3/4" and 1 1/2" screws to secure the legs. The longer screws are positioned over the leg's end and are driven through the bottom board into the legs.

The middle board is attached using four 2" screws. I didn't use glue for this shelf, just in case it might need to be replaced in the future.

The top board is 2" wider and longer than the cart frame. That dimension will provide a 1" overhang on all edges. Attach the top with 2" screws through the corner blocks. Use a sander to round over the top board's corners.
