The Routledge Companion to Alternative Organization Martin Parker, George Cheney, Valérie Fournier, Chris Land, 2014-01-03 Despite the Great Recession slightly different forms of global capitalism are still portrayed as the only game in town by the vast majority of people in power in the world today Unbridled growth trade liberalisation and competition are advocated as the only or best ways of organizing the contemporary world Unemployment yawning gaps between rich and poor political disengagement and environmental devastation are too often seen as acceptable side effects of the dominance of neo liberalism But the reality is that capitalism has always been contested and that people have created many other ways of providing for themselves This book explores economic and organizational possibilities which extend far beyond the narrow imagination of economists and management theorists Chapters on co operatives community currencies the transition movement scrounging co housing and much more paints a rich picture of the ways in which another world is not only possible but already taking shape The aim of this companion is to move beyond complaining about the present and into exploring this diversity of organisational possibilities Our starting point is a critical analysis of contemporary global capitalism is merely the opening for thinking about organizing as a form of politics by other means and one that can be driven by the values of solidarity freedom and responsibility This comprehensive companion with an international cast of contributors gives voice to forms of organizing which remain unrepresented or marginalised in organizational studies and conventional politics yet which offer more promising grounds for social and environmental justice It is a valuable resource for students activists and researchers interested in alternative approaches to economy and society in a variety of disciplinary and interdisciplinary fields

Protest Camps in International Context Gavin Brown, Anna Feigenbaum, Fabian Frenzel, Patrick McCurdy, 2017-03-29 From the squares of Spain to indigenous land in Canada protest camps are a tactic used around the world Since 2011 they have gained prominence in recent waves of contentious politics deployed by movements with wide ranging demands for social change

Through a series of international and interdisciplinary case studies from five continents this topical collection is the first to focus on protest camps as unique organisational forms that transcend particular social movements contexts Whether erected in a park in Istanbul or a street in Mexico City the significance of political encampments rests in their position as distinctive spaces where people come together to imagine alternative worlds and articulate contentious politics often in confrontation with the state Written by a wide range of experts in the field the book offers a critical understanding of current protest events and will help better understanding of new global forms of democracy in action Towards Just and Sustainable Economies Peter North, Molly Scott Cato, 2017-04-19 With capitalism in crisis rising inequality unsustainable resource depletion and climate change all demanding a new economic model the Social and Solidarity Economy SSE has been suggested as an alternative What can contribute in terms of generating livelihoods that provide a dignified life meeting of social needs and building of sustainable futures What can activists in both the global North and South learn from each other In this volume academics from a range of disciplines and from a number of European and Latin American countries come together to question what it means to have a sustainable society and to ask what role these alternative economies can play in developing convivial humane and resilient societies raising some challenging questions for policy makers and citizens alike
