Cohen, 2020-10-22 Sustainability is one of the buzzwords of our times and a key imperative for economic growth technological development social equity and environmental quality But what does it really mean and how is it being implemented around the world In this clear eyed book Maurie Cohen introduces students to the concept of sustainability tracing its history and application from local land use practices construction techniques and reorientation of business models to national and global institutions seeking to foster sustainable practices Examining sustainable development in scientific technological social and political terms he shows that it remains an elusive concept and evidence of its unambiguous achievements can be difficult to ascertain Moreover developed and developing countries have formulated divergent agendas to engage the notion of sustainability further complicating its application and progress across the world Innovative and readily accessible to students from a range of disciplines this primer takes us on a journey to show that sustainability is as much about uncharted waters as it is about formulating answers to urgent global issues Access to Power Ijlal Naqvi, 2022 Pakistan's power sector's woes are less mystery than tragedy but to conclude simply that a weak state produces poor governance outcomes misses the manner in which these arrangements are important to reproducing existing relations of domination and are resistant to change The question this book addresses therefore isn't just about why Pakistan doesn't produce enough power Retrofitting Sprawl Emily Talen, 2015 These twelve new essays present innovative and practical ideas for addressing the harmful effects of sprawl Sprawl is not only an ongoing focus of specialized magazines like *Dwell* indeed *Time* magazine has cited recycling the suburbs as the second of Ten Ideas Changing the World Right Now While most conversations on sprawl tend to focus on its restriction this book presents an overview of current thinking on ways to fix repair and retrofit existing sprawl Chapters by planners geographers and architects present research grounded in diverse locales including Phoenix Arizona Seattle Washington Dublin Ohio and the Atlanta Georgia and Washington D C metro areas The authors address head on the most controversial aspects of sprawl issues of power and control justice and equity and American attitudes about regulating

private development But they also put these issues in practical contexts bringing in examples of redesign that are already occurring around the country including the retrofitting of corridors and the repurposing of the cul de sac Whether fixing sprawl requires a cultural shift in thinking or a coordinated effort by local government these essays testify that a combination of forethought and creativity will be needed EMILY TALEN is a professor in the School of Geographical Sciences and Urban Planning and the School of Sustainability at Arizona State University Her books include *City Rules How Regulations Affect Urban Form and Design for Diversity* Cover design Kaelin Chappell Broaddus Cover photo Author photo Courtesy of Sandy Sorlien The University of Georgia Press Athens Georgia 30602 www.ugapress.org *The Art of Classic Planning* Nir Haim Buras, 2020-01-28 An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable demonstrating how we can restore function and beauty to our urban spaces for the long term Nearly everything we treasure in the world's most beautiful cities was built over a century ago Cities like Prague Paris and Lisbon draw millions of visitors from around the world because of their exquisite architecture walkable neighborhoods and human scale Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years not because of traffic population growth or other practical hurdles but because of ill considered theories emerging from Modernism and reactions to it The errors of urban design over the last century are too great not to question The solutions being offered today sustainability walkability smart and green technologies hint at what has been lost and what may be regained but they remain piecemeal and superficial In *The Art of Classic Planning* architect and planner Nir Haim Buras documents and extends the time tested and holistic practices that held sway before the reign of Modernism With hundreds of full color illustrations and photographs that will captivate architects planners administrators and developers *The Art of Classic Planning* restores and revitalizes the foundations of urban planning Inspired by venerable cities like Kyoto Vienna and Venice and by the great successes of L'Enfant's Washington Haussmann's Paris and Burnham's Chicago Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world *The Art of Classic Planning* celebrates the enduring principles of urban design and invites us to return to building beautiful cities *Citizen Participation in Democratic Europe* Alberto Alemanno, James Organ, 2021-02-05 As the European Union undergoes a major self proclaimed democratic exercise the Conference on the Future of Europe and approaches Treaty change this volume offers a new model of citizen participation to address Europe's long standing democracy challenge and respond to the aftermath of the COVID 19 pandemic Proposed are a set of democratic innovations ranging from citizens assemblies to regulatory gaming to citizens initiatives and lobbying which are complementary not antagonistic to existing representative democracy across the European continent These innovations are emerging bottom up across the continent and getting traction at local national and EU level in a new era powered by technology This book brings together academics as well as practitioners to give a forward looking holistic view of the realities of EU citizen participation across the spectrum of

participatory opportunities They all converge in arguing that after many years of proven experimentation the EU must institutionalize supranational participative and deliberative democratic channels to complement representative democracy and each other and ultimately improve the effectiveness of EU citizen participation While this institutional approach will not magically treat the EU democratic malaise it should make the system more intelligible accessible and ultimately responsive to citizen demand without necessarily undertaking Treaty reform The attempt to harness citizen participation to help address the current EU crisis needs the type of multi faceted approach presented in this book One that recognises the potential of existing and new democratic mechanisms and also importantly the links between different instruments of citizen participation to improve the overall quality of EU s democratic system
