Chimpanzees I Love Saving Their World And Ours Byron Preiss :

Heritage of Care Marion S. Lane, Stephen L. Zawistowski Ph.D., 2007-12-30 Founded in 1866 the American Society for the Prevention of Cruelty to Animals was the nation's first animal welfare organization. The society had its origins in the fervor for social reform that characterized the era following the Civil War. Its founder Henry Bergh organized the ASPCA because of his abhorrence of injustice; personally he was never especially interested in animals. The society's agents known in the early years as Bergh's men were empowered to enforce the law throughout the state. Bergh used the media to advance his cause and many of the issues that he confronted were covered in the press. *Heritage of Care* brings these early efforts to life again. After Bergh's death the ASPCA's original mission to provide effective means for the prevention of cruelty to animals drew committed men and women to continue the work. From 1894 to 1994 the ASPCA handled animal control for New York City, changing the image of dog pounds to animal shelters by introducing the concept of a professional staff. And just as Bergh preached kindness to children in the orphanages of old New York, his successors instilled caring attitudes through the new medium of television and later through the Internet. *Heritage of Care* brings the society's work up to date. It is an insider's look at Bergh's men and Bergh's women of the twenty-first century. *Africa* Laurel A. Spielberg, Lisa V. Adams, 2011 An innovative and indispensable guidebook for people traveling to Africa to work on health or humanitarian projects. *Journal of Youth Services in Libraries*, 2001. *The Chimpanzees I Love* Jane Goodall, 2001 As a child Jane Goodall dreamed of living with the wild animals of Africa. As a young woman she amazed the world with her groundbreaking discoveries about chimpanzees which she documented in her acclaimed National Geographic television specials. Ever since Dr. Goodall has campaigned unceasingly for the protection of the chimpanzee, now an endangered species. This moving personal account will inspire readers of all ages to join in her vital work. *American Book Publishing Record*, 2002. *Chimpanzees I Love Saving Their World and Ours* Jane Goodall, 2001. **Save the Chimpanzee** Louise Spilsbury, 1900-01-01 Arguably the most intelligent of nonhuman animals, chimpanzees are endlessly fascinating. Sadly, their population has been drastically reduced over the past 50 years. This book explains what makes these animals so interesting, the dangers they grapple with, and a number of conservationist efforts. *Saving Chimpanzees - A Man On A Rescue Mission* Eugene Cussons, 2012-11-21. Genetically, the chimpanzee is humankind's closest relative in the animal kingdom. Yet in recent times, humans have shown scant regard for the welfare of their intelligent cousin. Conflicts and endemic poverty across their range have decimated wild chimpanzee populations, and they are today a seriously endangered species. Destruction of their habitat and the bush meat trade have disrupted their complex social structures, often resulting in orphaned youngsters, some of which are sold illegally as exotic pets to people who do not understand their highly specialized needs. In association with the Jane Goodall Institute, South Africa, Eugene Cussons and his family established Chimpanzee Eden in the South African Lowveld as a sanctuary for the relocation of abused and orphaned chimpanzees from all over Africa. Often at great personal risk, Cussons travels

throughout strife torn African countries and brings traumatised primates back to the safety of Chimp Eden where for the first time for most of them they have freedom and the opportunity of being with their own kind as well as the attention of experts Saving Chimpanzees is a remarkable account of some of his rescue missions complicated operations requiring diplomacy and no small measure of courage and dedication This updated edition includes section on the recent traumatic events at Chimp Eden Eugene Cussons explains the reasons for the chimpanzees attack on a tour guide and provides an insider s glimpse into the events of that fateful day

Among Chimpanzees Nancy J. Merrick,2014-06-17 Foreword by Jane Goodall A former student and colleague of Jane Goodall shares stories of chimps and their heroes and takes readers on a journey to save man s closest relative Unbeknownst to much of the public chimps are in trouble censuses show them to be extinct in four African countries and nearly so in ten others A large percentage of the remaining populations live in unprotected increasingly fragmented forests When Nancy Merrick learned these startling facts in 2009 she decided it was past time to discover the extent to which chimpanzees are at risk across Africa and what can be done Merrick had begun working with primates in 1972 as a young field assistant in Jane Goodall s famous Gombe camp Like the rest of the world at the time she was swept up in the excitement of discovering the remarkable world of chimpanzees their ability to fashion tools their dazzling intelligence and their complex relationships and societies From that moment on her human centered worldview shifted and she became a devoted advocate for our closest genetic relatives When Merrick returns to Africa decades later she s alarmed by how much has changed Human activity such as agriculture and logging has encroached on natural habitats throughout equatorial Africa endangering chimpanzees gorillas and bonobos In an effort to understand what we can do to save great apes Merrick connects with primatologists and conservationists who are trying to protect the last great forests Visits to some of Africa s parks sanctuaries and expanding agricultural areas reveal the urgency of the problems and the inspiration of the people leading the search for solutions Along the way Merrick demonstrates that the best hope for chimps and other great apes lies in connecting conservation to humanitarian efforts ensuring a healthy future for animals and humans alike

Among Chimpanzees is at once an inspiring chronicle of Merrick s personal search to learn how chimps are faring across Africa and in captivity a crucial eyewitness account of a very critical period in their existence and a rousing call for us to join the efforts to be a voice for the chimpanzees before it s too late
