China After Princeton Legacy Library:

Chinese Economic Diplomacy Shuxiu Zhang, 2016-07-01 Economic diplomacy was declared in 2013 by Beijing as a priority in its comprehensive strategy for diplomacy. The political elite undertook to further invest in economic diplomacy as an instrument for economic growth and development. Globally, Chinese cooperation in multilateral economic processes has become critical to achieving meaningful outcomes. However, little understanding exists in current literature on the factors and mechanisms which shape the processes behind China's economic diplomacy decision making. *Chinese Economic Diplomacy* provides an understanding of the processes and practices of China's economic diplomacy with multilateral economic negotiations as the primary basis of analysis, specifically the UN climate change talks and the WTO Doha Round trade negotiations. It examines how early economic diplomacy in global governance contributed to the varied and evolving nature of its present day decision making structures and processes. Demonstrating how China's negotiation preferences are driven by networks of political actors in formal and informal domestic and systemic environments, it also highlights the capacity of international negotiation practices to alter and re-shape China's approach to multilateral economic negotiations. As a consequence, the book presents a framework for understanding China's economic diplomacy decision making processes that is systemically constructed by domestic and international agencies. Offering a Chinese perspective of the notion of economic diplomacy, this book will be of interest to students and scholars of Chinese Economics, International Relations and Political Economy.

Spatial Literary Studies in China Ying Fang, Robert T. Tally Jr., 2022-11-14 *Spatial Literary Studies in China* explores the range of vibrant and innovative research being done in China today. Chinese scholars have been exploring spatially oriented literary criticism in two different and mutually reinforcing directions: the first has focused on the study of Western literature, especially U.S. and European texts and theory, and the second has examined Chinese cultures, texts and spaces. This collection of essays demonstrates Chinese scholars' insightful interpretation, evaluation and innovative application of international spatial analyses theories and methodologies, as well as their inspiring exploration and reconstruction of distinctively Chinese critical and theoretical discourses. For the first time in English, the essays in this volume demonstrate the vitality of literary geography, geocriticism and the spatial humanities in China in the twenty-first century.

Randle Edwards, 2017-03-14 In this volume of essays, a group of scholars from Europe, Japan, the Republic of China and the United States examines China's legal tradition to determine its importance for the study of both pre-modern China and of contemporary affairs. Cultural Revolution from 1969 to 1976 It highlights the new architecture of this period exemplified by three clusters of buildings for foreign affairs namely buildings for foreign diplomacy in Beijing buildings for foreign trade in Guangzhou and China's foreign aid projects overseas The emergence of new architecture in the early 1970s is closely associated with China's political and diplomatic shift of the time from a radical emphasis on ideological struggle to a dynamic balance between leftist ideology and pragmatic concerns In this context China's relations with the West quickly improved culminating with American president Richard Nixon's visit to China in 1972 The increasing foreign affairs brought new opportunities to Chinese architects who referenced both Western modernism and Chinese architectural traditions to create a new version of Chinese modernism The book brings dimensions of form politics and knowledge to the analysis of architecture to construct an understanding of architectural design as an aesthetic political and intellectual practice Modernism in Late Mao China will be an enriching and useful reference for students and scholars who are interested in the global architectural history of the twentieth century especially Cold War modernism

Priscilla Roberts, Odd Arne Westad, 2017-08-17 This book explores the forces that impelled China the world's largest socialist state to make massive changes in its domestic and international stance during the long 1970s Fourteen distinguished scholars investigate the special perhaps crucial part that the territory of Hong Kong played in encouraging and midwifing China's relationship with the non Communist world The Long 1970s were the years when China moved dramatically and decisively toward much closer relations with the non Communist world In the late 1970s China also embarked on major economic reforms designed to win it great power status by the early twenty first centuries The volume addresses the long term implications of China's choices for the outcome of the Cold War and in steering the global international outlook toward free market capitalism Decisions made in the 1970s are key to understanding the nature and policies of the Chinese state today and the worldview of current Chinese leaders

emerged that all the four Western newsmagazines tended to centre their coverage on the US and China in 2010 and the US and Japan in 1987 although they did not speak in one collective voice with regard to their coverage of China and Japan

Book Bulletin of the Chicago Public Library Chicago Public Library,1928 *War Time* Sten Rynning,Olivier Schmitt,Amelie Theussen,2021-03-02 Perceptions of time contributed to recent Western military failings The decline of the West is once again a frequent topic of speculation Often cited as one element of the alleged decline is the succession of prolonged and unsuccessful wars most notably those waged in recent decades by the United States This book by three Danish military experts examines not only the validity of the speculation but also asks why the West particularly its military effectiveness might be perceived as in decline Temporality is the central concept linking a series of structural fractures that leave the West seemingly muscle bound overwhelmingly powerful in technology and military might but strategically fragile This temporality the authors say is composed of three interrelated dimensions trajectories perceptions and pace First Western societies to tend view time as a linear trajectory focusing mostly on recent and current events and leading to the framing of history as a story of rise and decline The authors examine whether the inevitable fall already has happened is underway or is still in the future Perceptions of time also vary across cultures and periods shaping socio political activities including warfare The enemy for example can be perceived as belong to another time being backward or barbarian And war can be seen either as cyclical or exceptional helping frame the public s willingness to accept its violent and tragic consequences The pace of war is another factor shaping policies and actions Western societies emphasize speed the shorter the war the better even if the long term result is unsuccessful Ironically one of the Western world s least successful wars also has been America s longest in Afghanistan This unique book is thus a critical assessment of the evolution and future of Western military power It contributes much needed insight into the potential for the West s political and institutional renewal

Greece to modern times is a powerful figment of our collective imagination. An urgently needed emergent voice in big history, she offers a bold new account of Western history, real and imagined, through the lives of fourteen remarkable individuals. In this groundbreaking story-driven retelling of Western history, Nao Se Mac Sweeney debunks the myths and origin stories that underpin the history we thought we knew. Told through fourteen figures who each played a role in the creation of the Western idea, from Herodotus, a mixed-race migrant, to Phyllis Wheatley, an enslaved African American who became a literary sensation, and from Gladstone, with a private passion for epic poetry, to the medieval Arab scholar Al Kindi, the subjects are a mind-expanding blend of unsung heroes and familiar faces viewed afresh. These characters span the millennia and the continents, representing different religions, varying levels of wealth and education, diverse traditions and nationalities. Each life tells us something unexpected about the age in which it was lived and offers us a piece of the puzzle of how the modern idea of the West developed and why we've misunderstood it for too long. The concept of the West is present in every daily interaction you have, from entertainment and politics to world markets and world history. This engagingly intimate history will reshape the way you see the world around you. At this moment of civilizational redefinition, if we are to chart a future for the West, we must properly understand its past.
