The Global Capitalist Crisis and Its Aftermath Berch Berberoglu, 2016-12-05 Written by a team of experts on the contemporary global capitalist political economy who are able to shed light on the inner workings of global capitalism and the capitalist globalization process that has led to the growth and development of capitalism from the national to the global level this groundbreaking volume provides critical analyses of the causes and consequences of the Great Recession of 2008 2009 Through a careful examination of the origin development and aftermath of the catastrophic economic crisis from which the world is still trying to recover editor Berch Berberoglu and his colleagues demonstrate that those most responsible for the economic collapse are the ones least affected by its devastating impact felt most severely by working people around the world Ultimately this book argues that it is only through the systematic restructuring of the world economy by the working class that society will be able to prevent the boom and bust cycle of global capitalist crises and usher in a more egalitarian socialist economy and society

The State-Capital Nexus in the Global Crisis Bastiaan van Apeldoorn, Naná de Graaff, Henk W. Overbeek, 2017-07-05 In the wake of the outbreak of the global crisis in 2008 many

observers expected the state to assume command over a faltering neoliberal finance led model of capitalism We now know that this expectation was by and large mistaken There is indeed an ongoing re calibration of the state capital relations but in many instances the state has become more actively and more deeply involved in extending the reach of markets rather than in constraining markets in the interests of an equitable response to the crisis This volume offers both theoretical perspectives and empirical studies by a selection of leading Critical International Political Economy scholars on the question how and to what extent we are witnessing a return of the state and a transition towards a new phase of global capitalism The chapters cover a wide array of topics from the rise of China and other emerging economies of the Global South the role of state owned enterprises such as Sovereign Wealth Funds and National Oil Companies and global environmental politics to the role of labour in Europe and US grand strategy foreign policy making in the post Cold War period This book was published as a special issue of Globalizations

The Rise of China and the Capitalist World Order Li Xing, 2016-03-03 China's rise within global society and politics has brought it into the spotlight for social scientists the country's long and dramatic transformations in the twentieth and twenty first centuries make it an ideal case study for research on political and economic development and social changes China's size integration and dynamism are impacting on the functioning of the capitalist world system This book offers a non conventional analysis of the possible outcomes from China's transformation and provides a dialectical understanding of the complexities and underlying dynamics brought about by the rise of modern day China The theoretical and methodological approaches will prove useful for students and researchers of development studies and international relations

China in Global Capitalism Kevin Lin, Rosa Liu, Eli Friedman, Ashley Smith, 2024-06-04 As the rivalry between the US and China enters a dangerous new phase reaffirming the politics of anti imperialism is a task more important than ever From trade wars and pandemic politics to rioting workers intercontinental balloons and battles over TikTok the US media tends to present contemporary China when it's discussed at all in sensationalist terms This portrayal has only intensified as China's relationship with the United States has grown increasingly hostile Whether in the form of overtly racist rhetoric and aggressive trade actions or the more buttoned down but equally antagonistic efforts to oppose Chinese interests abroad the US has made clear that it has no interest in giving up its position as global hegemon This seemingly endless cycle of nationalism jingoism and reactionary politics on both sides of the Pacific suggests a downward spiral that could plausibly result in catastrophic military confrontation Against Imperialism forcefully makes the case that workers and socially marginalized people in both the US and China must oppose our rulers claims that they have our best interests in mind as they ratchet up their rivalry Rather if we're to avert nuclear calamity we must oppose imperialism in all its forms and regardless of its source and rhetoric Through snapshots of China's growing social movements from its labor struggles to feminist campaigns and more Lin Liu Friedman and Smith provide some of the building blocks we'll need to construct a movement that centers international solidarity across borders

The Dark Side of Globalisation Leila Simona

Talani,Roberto Roccu,2019-03-28 Firmly rooted in the International Political Economy IPE tradition this book addresses the negative consequences of globalisation what is termed here the dark side of globalisation It explores different definitions of globalisation whether the globalisation we have seen since the 1970s is substantially new and to what extent it can be governed Building on these foundations the work assesses the prospects for de globalisation By focusing on this dark side of globalisation the authors show how the global economic crisis and its various local and sectorial manifestations intensified rather than generated existing trends This scholarship provides an account of the current predicament that is both more complex and more persuasive than the opposition between globalisation and de globalisation *Does Capitalism Have a Future?* Immanuel Wallerstein,Randall Collins,Michael Mann,Georgi Derluguian,Craig Calhoun,2013-10-21 In *Does Capitalism Have a Future* a global quintet of distinguished scholars cut their way through to the question of whether our capitalist system can survive in the medium run Despite the current gloom conventional wisdom still assumes that there is no real alternative to capitalism The authors argue that this generalization is a mistaken outgrowth of the optimistic nineteenth century claim that human history ascends through stages to an enlightened equilibrium of liberal capitalism All major historical systems have broken down in the end and in the modern epoch several cataclysmic events notably the French revolution World War I and the collapse of the Soviet bloc came to pass when contemporary political elites failed to calculate the consequences of the processes they presumed to govern At present none of our governing elites and very few intellectuals can fathom a systemic collapse in the coming decades While the book s contributors arrive at different conclusions they are in constant dialogue with one another and they construct a relatively seamless if open ended whole Written by five of world s most respected scholars of global historical trends this ambitious book asks the most important of questions are we on the cusp of a radical world historical shift *China, the USA and Capitalism's Last Crusade* William Briggs,2021-10-29 As the sun rises on China and sets on America the world holds its breath China the USA and Capitalism s Last Crusade looks at the rise of China and the decline of the USA but from a different angle William Briggs argues that this struggle for economic supremacy is being played out against a much bigger backdrop the decline of the economic structure of capitalism In this sense the decline of the USA is portrayed as that larger economic decline in microcosm Briggs examines the relationship between state and capital of how capitalism came to dominate the world and of the historical political and economic rise of both the USA and China He shows that the struggle between the two nations has little to do with cultural historical demographic political or ideological differences but with what they have in common Despite the portrayal of China as being socialist it functions as a capitalist economy in the globalised capitalist world While its journey to capitalism may have differed the end point is the same and this is why there is such animosity such conflict such acrimony between the two states **Globalization and Transnational Capitalism in Asia and Oceania** Jeb Sprague,2015-12-15 News headlines warn of rivalries and competing nations across Asia and the Pacific even as powerful new cross border relations form as

never before This book looks behind the Asia Pacific curtain at the new forms of social economic and political integration taking place through a global capitalism that is rife with contradictions inequality and crisis We are moved beyond traditional conceptualizations of the inter state system with its nation state competition as the core organizing principle of world capitalism and the principal institutional framework that shapes the makeup of global social forces These important studies examine and debate over how there is a growing transnationality of material economic relations in the global era as well as an emerging transnationality of many social and class relations How does transnational capitalist class fractions new middle strata and labor undergird globalization in Asia and Oceania How have states and institutions become entwined with such processes This book provides insight into a field of dynamic change

A New Global Geometry? Greg Albo,2024-06-18

Scrutinizes possibilities for an equalised global order in light of recent conflicts between the world s major powers The post Cold War era is definitively over asserted US President Joe Biden as he launched the new National Security Strategy warning in late 2022 that a competition is underway between the major powers to shape what comes next American leadership the document declared would be more necessary than ever to define the future of the international order insisting that the US must marshal its unparalleled economic military and diplomatic resources to confront its geopolitical rivals Socialist Register 2024 A New Global Geometry takes stock of momentous changes on the horizon Even if these geopolitical shifts do not spell the end of globalization how might they alter its historical trajectory While it is it premature to speak of the end of the liberal economic order let alone the development of a multipolar international system can we begin to assess the dimensions of a new global geometry And how might we assess the potential vulnerabilities of socialist movements worldwide alongside the potential resistance our movements might manage to present grounded in our historical demands for a democratic and equalizing world order

China's Capitalism Tobias ten Brink, 2019-02-14 Since 1978 the end of the Mao era economic growth in China has outperformed every previous economic expansion in modern history While the largest Western economies continue to struggle with the effects of the deepest recession since World War II the People's Republic of China still enjoys growth rates that are massive in comparison In the country's smog choked cities a chaotic climate of buying and selling prevails Tireless expansion and inventiveness join forces with an attitude of national euphoria in which anything seems possible No longer merely the workshop of the world China is poised to become a global engine for innovation In China's Capitalism Tobias ten Brink considers the history of the socioeconomic order that has emerged in the People's Republic With empirical evidence and a theoretical foundation based in comparative and international political economy ten Brink analyzes the main characteristics of China's socioeconomic system over time identifies the key dynamics shaping this system's structure and discusses current trends in further capitalist development He argues that hegemonic state business alliances mostly at the local level relative homogeneity of party state elites the maintenance of a low wage regime and unanticipated coincidences between domestic and global processes are the driving forces behind China's rise He also surveys the limits to the state's influence over economic and social developments such as industrial overcapacity and social conflict Ten Brink's framework reveals how combinations of three heterogeneous actors party state institutions firms and workers led to China's distinctive form of capitalism Presenting a coherent and historically nuanced portrait China's Capitalism is essential reading for anyone interested in the socioeconomic order of the People's Republic and the significant challenges facing its continuing development

The Palgrave Handbook of Critical International Political Economy Alan Cafruny, Leila Simona Talani, Gonzalo Pozo Martin, 2016-07-05 Challenging the assumptions of mainstream International Political Economy IPE this Handbook demonstrates the considerable value of critical theory to the discipline through a series of cutting edge studies The field of IPE has always had an inbuilt vocation within Historical Materialism with an explicit ambition to make sense from a critical standpoint of the capitalist mode of production as a world system of sometimes paradoxically and sometimes smoothly overlapping states and markets Having spearheaded the growth of a vigorous critical scholarship in the 1960s and 1970s however Marxism and neo Gramscian approaches became increasingly marginalized over the course of the 1980s The authors respond to the exposure of limits to

mainstream contemporary scholarship in the wake of the onset of the Global Financial Crisis and provide a comprehensive overview of the field of Critical International Political Economy Problematizing socioeconomic and political structures and considering these as potentially transitory and subject to change the contributors aim not simply to understand a world of conflict but furthermore to uncover the ways in which purportedly objective analyses reflect the interests of those in positions of privilege and power

The Huawei Model Yun Wen, 2020-11-30 In 2019 the United States trade war with China expanded to blacklist the Chinese tech titan Huawei Technologies Co Ltd The resulting attention showed the information and communications technology ICT firm entwined with China's political economic transformation But the question remained why does Huawei matter Yun Wen uses the Huawei story as a microcosm to understand China's evolving digital economy and the global rise of the nation's corporate power Rejecting the idea of the transnational corporation as a static institution she explains Huawei's formation and restructuring as a historical process replete with contradictions and complex consequences She places Huawei within the international political economic framework to capture the dynamics of power structure and social relations underlying corporate China's globalization As she explores the contradictions of Huawei's development she also shows the ICT firm's complicated interactions with other political economic forces Comprehensive and timely The Huawei Model offers an essential analysis of China's dynamic development of digital economy and the global technology powerhouse at its core
