*China* Michael D. Swaine, Michael Swaine, Donald P. Henry, Swaine, 1995 This report analyzes the implications of political military social intellectual and economic change within China for the evolution of Chinese foreign policy over the next 10 15 years The purpose of such analysis is to discern whether and how the profound changes under way in China could prove adverse to U S interests in Asia The report finds that strong incentives will likely remain for China to adhere to the central tenets of its existing foreign policy during the period examined marked by overall caution and pragmatism a recognition of the need for a placid Asian security environment and a balancing of both cooperation and competition with the West China will probably become neither significantly more cooperative nor extremely uncooperative and or belligerent toward the West nor will it lapse into chaos and confusion as a result of domestic collapse or political fragmentation Although policy continuity could pose significant challenges to Asia s security environment the report argues that such challenges should prove manageable for the United States over the next 10 15 years However the report stresses that more adverse forms of Chinese external behavior could emerge during this period largely associated with military intervention in politics or a major increase in the influence of ultra conservative nationalistic sentiments upon foreign policy To minimize the chances of such adversity the report recommends that the United States strengthen and expand contacts with Chinese civilian and military leaders avoid vaguely defined or broadly punitive economic or diplomatic actions against China encourage more extensive and durable economic links with China that promote moderate growth establish greater coordination and communication on China policy with regional allies and friends and maintain current U S force levels in Asia

**Relations** Allen Carlson, Ren Xiao, 2011-10-14 This book stands as a rebuke to any who would attempt to forward simplistic interpretations of China's rise In place of parsimonious arguments or an endorsement of any singular set of images whether pacific or confrontational it repeatedly calls attention to the remarkable complexity of China's emerging international profile More specifically the leading Chinese and American scholars working in the fields of Chinese foreign policy international political economy and national security who contributed to this volume argue that while China appears to be entering a new era in its relationship with the outside world such a development encompasses disparate even contradictory policies and as a result there is a great deal of fluidity within China's place in world politics      **Prospect Theory and Foreign Policy Analysis in**

**the Asia Pacific** Kai He, Huiyun Feng, 2013 By examining major events in Asian security this book investigates why and how leaders make risky and seemingly irrational decisions in international politics The authors take the innovative step of integrating the neoclassical realist framework in political science and prospect theory in psychology Their analysis suggests that political leaders are more likely to take risky actions when their vital interests and political legitimacy are seriously threatened This pioneering book tests and expands prospect theory to the study of Asian security and challenges traditional expected utility based rationalist theories of foreign policy behavior      **Globalization and State Transformation in China**
