bypassing unions altogether or innovating new forms of workers organisations In one of the first major studies to critically assess this new cycle of global working class struggle Robert Ovetz collects together case studies from over a dozen contributors looking at workers movements in China Mexico the US South Africa Turkey Argentina Italy India and the UK The book reveals how these new forms of struggle are no longer limited to single sectors of the economy or contained by state borders but are circulating internationally and disrupting the global capitalist system as they do China's Engine of Environmental Collapse Richard Smith,2020-07-20 As the world hurtles towards environmental oblivion China is leading the charge The nation s CO2 emissions are more than twice those of the US with a GDP just two thirds as large China leads the world in renewable energy yet it is building new coal fired power plants faster than renewables The country s lakes rivers and farmlands are severely polluted yet China s police state can t suppress pollution even from its own industries This is the first book to explain these contradictions Richard Smith explains how the country s bureaucratic rulers are driven by nationalist industrialist tendencies that are even more powerful than the drive for profit under normal capitalism In their race to overtake the US they must prioritise hyper growth over the environment even if this ends in climate collapse and eco suicide Smith contends that nothing short of drastic shutdowns and the scaling back of polluting industries especially in China and the US will suffice to slash greenhouse gas emissions enough to prevent climate catastrophe **Behemoth: A History of the Factory and the Making of the Modern World** Joshua B. true history of social movements and left politics in China up to the present day Song of the Stubborn One Thousand
Peter Shapiro, 2016-10-10 How 1 000 Latina workers in Watsonville California won an 18 month long strike an inspiring tale
Mae M Ngai author of Impossible Subjects and The Lucky Ones On September 9 1985 a predominately Mexican group of one
thousand women workers in Watsonville California the frozen food capital of the world were forced out on strike in response
to an attempt by Watsonville Canning owner Mort Console to break their union They returned to work eighteen months later
Not one had crossed the picket line A moribund union has been revitalized and Watsonville s Latino majority emerged as a
major force in local politics At a time when organized labor was in headlong retreat the Watsonville Canning strike was a
dramatic show of the power of women workers whose struggle became a rallying point for the Chicano movement Apart from
its sheer drama the strikers story illuminates the challenges facing a group of ordinary working people who waged a
protracted and ultimately successful struggle against seemingly insurmountable odds *The Communist Road to Capitalism*
Ralf Ruckus, 2021-07-27 The Communist Road to Capitalism explores how a dynamic of social struggles from below followed
by countermeasures of the Chinese Communist Party CCP regime has pushed the historical evolution of the People s
Republic of China PRC since 1949 Under socialism until the mid 1970s during the ensuing transition until the mid 1990s and
in the capitalist period since the CCP regime responded to the struggles of workers peasants migrants and women with a mix
of repression concession cooptation and reform Ralf Ruckus shows that this dynamic took the country into a new phase each
time and eventually all the way from socialism to capitalism in the 1950s labor struggles and the Hundred Flowers Movement
were followed by the regime s Great Leap Forward in the 1960s the Cultural Revolution led to the CCP s failed attempt to
revitalize socialism in the 1970s social unrest and movements for a democratic socialism made room for the regime s Reform
and Opening policies in the late 1980s the Tian anmen Square uprising triggered more radical reforms in the 1990s peasant
and state worker unrest could not stop the capitalist restructuring and in the 2000s migrant worker struggles led to
concessions tightened repression and the regime s global capitalist expansion strategy in the 2010s The Communist Road to
Capitalism breaks with established orthodoxies about the PRC s socialist successes and myths on its later rise as an economic
power It combines a historiography of workers peasants migrants and women s struggles with a searing critique of
exploitation authoritarian state power and gender discrimination under socialism and capitalism Drawing lessons from PRC
history Ralf Ruckus finally outlines political aims and methods for the left that avoid past mistakes and allow to fight on for a
society free of all forms of exploitation and oppression **China in Global Capitalism** Kevin Lin, Rosa Liu, Eli
Friedman, Ashley Smith, 2024-06-04 As the rivalry between the US and China enters a dangerous new phase reaffirming the
politics of anti imperialism is a task more important than ever From trade wars and pandemic politics to rioting workers
intercontinental balloons and battles over TikTok the US media tends to present contemporary China when it s discussed at
all in sensationalist terms This portrayal has only intensified as China s relationship with the United States has grown

increasingly hostile Whether in the form of overtly racist rhetoric and aggressive trade actions or the more buttoned down but equally antagonistic efforts to oppose Chinese interests abroad the US has made clear that it has no interest in giving up its position as global hegemon This seemingly endless cycle of nationalism jingoism and reactionary politics on both sides of the Pacific suggests a downward spiral that could plausibly result in catastrophic military confrontation Against Imperialism forcefully makes the case that workers and socially marginalized people in both the US and China must oppose our rulers claims that they have our best interests in mind as they ratchet up their rivalry Rather if we re to avert nuclear calamity we must oppose imperialism in all its forms and regardless of its source and rhetoric Through snapshots of China s growing social movements from its labor struggles to feminist campaigns and more Lin Liu Friedman and Smith provide some of the building blocks we ll need to construct a movement that centers international solidarity across borders

Hellworld: The Human Species and the Planetary Factory Phil Neel, 2025-07-24 Hellworld examines the megastructures of global capitalism asking how revolutionary subjectivity might emerge within and against capital s domesticating force Central to this inquiry is the planetary factory the global value chains connecting disparate industrial territories the rise of China the fragmentation of global trade and above all the simultaneous deagrarianisation and deindustrialisation of labor These structural shifts are linked to subjective forces exploring how social divisions shape resistance Through an analysis of uprisings in Hong Kong Thailand Sudan and beyond Hellworld considers whether this system inescapable as it seems can perhaps be destroyed

Private Regulation of Labor Standards in Global Supply Chains Sarosh Kuruvilla, 2021-04-15 Private Regulation of Labor Standards in Global Supply Chains examines the effectiveness of corporate social responsibility on improving labor standards in global supply chains Sarosh Kuruvilla charts the development and effectiveness of corporate codes of conduct to ameliorate sweatshop conditions in global supply chains This form of private voluntary regulation spearheaded by Nike and Reebok became necessary given the inability of third world countries to enforce their own laws and the absence of a global regulatory system for labor standards Although private regulation programs have been adopted by other companies in many different industries we know relatively little regarding the effectiveness of these programs because companies don t disclose information about their efforts and outcomes in regulating labor conditions in their supply chains Private Regulation of Labor Standards in Global Supply Chains presents data from companies multi stakeholder institutions and auditing firms in a comprehensive investigative dive into the world of private voluntary regulation of labor conditions The picture he paints is wholistic and raw but it considers several ways in which this private voluntary system can be improved to improve the lives of workers in global supply chains

Atomized Incorporation Sungmin Rho,2023-08-17 Atomized Incorporation examines why the Chinese regime selectively tolerates workers collective action within single factories and what this means for the country s long term political resilience It investigates the implications of state labor relations in contemporary China and suggests that it has evolved away from overt coercion to limited incorporation Based on two years of in depth fieldwork Rho uncovers how ordinary workers think believe and behave in this changing socio political environment She demonstrates that labor grievances have become more politicized and finds that the current approach to economic grievance resolutions demobilizes the emergence of labor movements by rewarding those with collective action resources within individual workplaces Rho argues that though this limited state of incorporation allows workers to express discontent at wages and working conditions it also denies them the opportunity to make claims about structural problems and does not effectively enhance political loyalty in the long run
