demonstrate the diversity of urban life in China *The Economic Rise of China* Zhihua Wang, Eleftherios Giovanis, Nikolaos Karagiannis, 2022-08-08 This book seeks to reinvigorate debates on the growing forces influencing China's social and economic evolution. It draws attention to several neglected areas in the discussion of China's rapid economic expansion such as unbalanced growth, mass internal migration, international labour flows and disparities in access to education, public health and housing. China's rapid economic development has attracted the interest of many scholars following its emergence as the world's second largest economy and stimulated research into the underlying factors that have made this development unique. In advancing research, the chapters included in this edited book help with refining our understanding of the forces that have been driving China's social, economic, political, institutional and technological developments, addressing the related issues, thus advancing the social economic literature within the China context. This book serves the interests of scholars who seek to understand more fully the development of China as well as of other emerging economies. One of the chapters in this volume was originally published in the *Review of Evolutionary Political Economy*. Other chapters were originally published in the *Forum for Social Economics*.

Market as a Weapon Anton Oleinik, 2017-09-08 Power is all encompassing in Russia and mediates most interactions among people including everyday decisions. Even the recent administrative reforms in the country which began at the end of the 1990s have tried to reshape the government institutions and modernize the country through the use of power. Changes were initiated and implemented by people vested with power. Power, convention and trust can all support coordination. However, in the Russian institutional context, power tends not only to supplement the alternative coordination mechanisms but also to substitute them. Power can be used to solve problems related to social action by merging two or several centers of decision making into one. The actor vested with power decides exactly how coordination and adjustment can be achieved. This path breaking volume shows how power turns into a unique coordination mechanism and what are the consequences of such transformation for everyday life and businesses. *Market as a Weapon* focuses on issues of power and domination using the configuration of power relationships in Russia as a critical case but goes far beyond a narrowly defined scope of country specific studies. Particular emphasis is put on domination by virtue of a constellation of interests in the market since this is a relatively underexplored yet broadly used technique for imposing will in all countries that heavily rely on interventionist policies. Instead of being a liberating force, the market becomes an additional instrument facilitating the continuous reproduction of power which explains the title of the book. Both qualitative and quantitative data including more than one hundred in depth interviews with experts, state servants and businesspeople in Russia as well as statistics are used throughout the text of this major book.

rise to about one billion or close to 70 percent of the country's population by 2030. China's leaders are seeking a more coordinated urbanization process. **Urban China** is a joint research report by a team from the World Bank and the Development Research Center of China's State Council which was established to address the challenges and opportunities of urbanization in China and to help China forge a new model of urbanization. The report takes as its point of departure the conviction that China's urbanization can become more efficient, inclusive, and sustainable. However, it stresses that achieving this vision will require strong support from both government and the markets for policy reforms in a number of areas. The report proposes six main areas for reform: first, amending land management institutions to foster more efficient land use; denser cities; modernized agriculture and more equitable wealth distribution; second, adjusting the hukou household registration system to increase labor mobility and provide urban migrant workers equal access to a common standard of public services; third, placing urban finances on a more sustainable footing while fostering financial discipline among local governments; fourth, improving urban planning to enhance connectivity and encourage scale and agglomeration economies; fifth, reducing environmental pressures through more efficient resource management; and sixth, improving governance at the local level.

China's Great Economic Transformation Loren Brandt, Thomas G. Rawski, 2008-04-14. This landmark study provides an integrated analysis of China's unexpected economic boom of the past three decades. The authors combine deep China expertise with broad disciplinary knowledge to explain China's remarkable combination of high-speed growth and deeply flawed institutions. Their work exposes the mechanisms underpinning the origin and expansion of China's great boom. Penetrating studies track the rise of Chinese capabilities in manufacturing and in research and development. The editors probe both achievements and weaknesses across many sectors, including China's fiscal, legal, and financial institutions. The book shows how an intricate minuet combining China's political system with sectorial development, globalization, resource transfers across geographic and economic space, and partial system reform delivered an astonishing and unprecedented growth spurt.

A World Connecting Emily S. Rosenberg, 2012-10-30. Between 1870 and 1945, advances in communication and transportation simultaneously expanded and shrank the world. In five interpretive essays, *A World Connecting* goes beyond nations, empires, and world wars to capture the era's defining feature: the profound and disruptive shift toward an ever more rapidly integrating world.

An Economic History of Famine Resilience Jessica Dijkman, Bas van Leeuwen, 2019-09-18. Food crises have always tested societies. This volume discusses societal resilience to food crises, examining the responses and strategies at the societal level that effectively helped individuals and groups to cope with drops in food supply in various parts of the world over the past two millennia. Societal responses can be coordinated by the state, the market, or civil society. Here it is shown that it was often a combined effort, but that there were significant variations between regions and periods. The long-term comparative perspective of the volume brings out these variations, explains them, and discusses their effects on societal resilience. This book will be of interest to advanced students and researchers across

Landry, 2008-10-16 China like many authoritarian regimes struggles with the tension between the need to foster economic development by empowering local officials and the regime's imperative to control them politically Landry explores how the Chinese Communist Party CCP manages local officials in order to meet these goals and perpetuate an unusually decentralized authoritarian regime Using unique data collected at the municipal county and village level Landry examines in

detail how the promotion mechanisms for local cadres have allowed the CCP to reward officials for the development of their localities without weakening political control His research shows that the CCP s personnel management system is a key factor in explaining China s enduring authoritarianism and proves convincingly that decentralization and authoritarianism can work hand in hand
