### **Chinas Evolving Industrial Policies And Economic Restructuring China Policy Series:**

*China's Evolving Industrial Policies and Economic Restructuring* Zheng Yongnian, Sarah Y. Tong, 2014-07-11 In the past three decades China has successfully transformed itself from an extremely poor economy to the world's second largest economy. The country's phenomenal economic growth has been sustained primarily by its rapid and continuous industrialisation. Currently industry accounts for nearly two-fifths of China's gross domestic product and since 2009 China has been the world's largest exporter of manufactured products. This book explores the question of how far this industrial growth has been the product of government policies. It discusses how government policies and their priorities have developed and evolved, examines how industrial policies are linked to policies in other areas such as trade, technology and regional development, and assesses how new policy initiatives are encouraging China's increasing success in new technology-intensive industries. It also demonstrates how China's industrial policies are linked to development of industrial clusters and regions.

**China Entering the Xi Jinping Era** Zheng Yongnian, Lance L. P. Gore, 2014-11-20 How will China develop under the new leadership of Xi Jinping and Li Keqiang? This is a key question for both China and the wider world. This book presents a comprehensive overview of the key areas and issues, assessing how things are likely to develop under the new leadership. It considers the economy, trade, politics and demographics, appraises the leadership both at the national and provincial levels, and discusses potential flashpoints in China's relationship with its neighbors and China's emerging role in world politics. The book emphasizes the great uncertainties surrounding the next phase of China's development, highlighting the structural problems of the economy, the problems of urbanization and governance, and the deep social cleavages which exist over issues such as income disparity, rampant corruption, and unequal opportunities in social mobility. Against this backdrop, it measures the emerging leadership of Xi Jinping to assess the prospects for China in the next decade and beyond. *Beyond Energy*

Jacopo Maria Pepe, 2017-11-22 Jacopo Maria Pepe examines the rapid development of non-energy transport infrastructure in the broader Eurasian space. By doing so, the author considers the ongoing structural transformation of the Eurasian continent against the backdrop of deepening commercial interconnectivity in Eurasia into broader areas of trade supported by the rapid development of rail connectivity. He frames this process in a long-wave historical analysis and considers in detail the geopolitical, geo-economic and theoretical implications of deepening physical connectivity for the relationships among China, Russia, Central Asia and the European Union.

**China's Governance Model** Hongyi Lai, 2016-06-10 Many studies of government in China either simply describe the political institutions or else focus critically on the weaknesses of the system, such as corruption or the absence of Western-style democracy. Authors of these studies fail to appreciate the surprising ability of China's government to rapidly transform a once impoverished economy and to recover from numerous crises from 1978 to the present. This book, on the other hand, takes a more balanced, more positive view. This view is based on a study of changes in China's institutions for coping with critical crises in governance since 1978. These changes include better

management of leadership succession better crisis management improved social welfare the management of society through treating different social groups differently depending on their potential to rival the Party state and a variety of limited intra party and grassroots democracy This book applies to the Chinese model the term pragmatic authoritarianism It explains changes to and the likely future direction of China's governance model It compares current risks in China's governance with threats that terminated dynasties and the republic in China over the past four thousand years and concludes that the regime can be expected to survive a considerable period despite its existing flaws Few topics in Chinese politics are as significant as the nature state and prospects of the political regime While the topic had been unduly understudied for a long period of time a young generation of scholars has emerged on this subject Among others the book by Hongyi Lai stands out and provides a comprehensive and penetrating analysis on this topic I am confident that his book will make a significant contribution to the study of Chinese politics and may well define the debate on China's political development governance and model for years to come Yongnian Zheng Director East Asian Institute National University of Singapore

**China's Assertive Nuclear Posture** Baohui Zhang, 2015-02-11 China's nuclear capability is crucial for the balance of power in East Asia and the world As this book reveals there have been important changes recently in China's nuclear posture the movement from a minimum deterrence posture toward a medium nuclear power posture the pursuit of space warfare and missile defence capabilities and most significantly the omission in the 2013 Defence White Paper of any reference to the principle of No First Use Employing the insights of structural realism this book argues that the imperatives of an anarchic international order have been the central drivers of China's nuclear assertiveness The book also assesses the likely impact of China's emerging nuclear posture on its neighbours and on the international strategic balance especially with the United States The book concludes by examining China's future nuclear directions in the context of its apparent shift toward a more offensive oriented international strategy

*China's Transition from Communism - New Perspectives* Guoguang Wu, Helen Lansdowne, 2015-11-06 As China moved from a planned to a market economy many people expected that China's political system would similarly move from authoritarianism to democracy It is now clear however that political liberalisation does not necessarily follow economic liberalisation This book explores this apparent contradiction presenting many new perspectives and new thinking on the subject It considers the path of transition in China historically makes comparisons with other countries and examines how political culture and the political outlook in China are developing at present A key feature of the book is the fact that most of the contributors are China born Western trained scholars who bring deep knowledge and well informed views to the study

**International Engagement in China's Human Rights** Titus Chen, Dingding Chen, 2015-07-03 Since the Tiananmen Square incident in 1989 there has been increasing international pressure on China to improve its approach to human rights whilst at the same time the Chinese government has itself realised that it needs to improve its approach and has indeed done much to implement improvements This book explores systematically the

international engagement in human rights in China and assesses the impact of such foreign involvement It looks at particular areas including criminal justice labour and religious freedom considers the processes by which international pressure is brought to bear and the processes by which improvements are implemented in China and concludes that whilst China's human rights record has improved more than many people realise further improvements are still needed **Chinese Higher Education Reform and Social Justice** Bin Wu, W. John Morgan, 2015-06-26 In place of a distributive justice perspective which focuses simply on equal access to universities this book presents a broader understanding of the relationship between Chinese higher education and economic and social change The necessity for research on the place of universities in contemporary Chinese society may be seen from current debates about and policy towards issues of educational inequality at Chinese universities Many questions arise as a consequence What are the limitations of neo liberalism in higher education policy and what are the alternatives How has the Chinese government met the challenges of educational inequality and what lessons may be learned from its recent initiatives How may higher education enhance social justice in Chinese society given economic social and cultural inequality What may be learned from the experience of Macau Hong Kong and of Taiwan in terms of achieving social justice in Chinese universities These questions are considered by a group of leading scholars from both inside and outside China *Ecological Risks and Disasters - New Experiences in China and Europe* Li Peilin, Laurence Roulleau-Berger, 2015-11-19 Climate change and also other factors are capable of bringing about major disasters on a scale hitherto unimaginable Ecological and other risks besides having scientific and technological dimensions are also a subject of study for social scientists concerned with how disasters and potential disasters are noticed perceived guarded against managed once they have occurred and coped with after they have happened This book considers a range of ecological risks and disasters and how they are managed in both China and Europe It examines how far risks and disasters are perceived and managed in different ways in Europe and China explores how an increasing humanitarian approach to vulnerable people being taken up in Europe is also being adopted in China and assesses how far the management of disasters differs from wider government management of more ordinary aspects of everyday life The book argues that the same stresses and strains which are present in normal society are there also in enhanced form in disaster situations China-Taiwan Rapprochement Min-Hua Chiang, 2015-10-30 This book examines how since about 2008 the economy of Taiwan has become ever more deeply integrated into the economy of China It goes beyond a consideration of trade and investment flows and discusses also the large population flows the growing integration of the two financial systems and the nature of the deep economic integration at the industry and firm level It considers the impact of growing economic integration on society and politics assesses how China Taiwan economic integration is affecting the East Asian region more widely and explores the implications for international relations including the United States dominance in the region Overall the book presents a comprehensive analysis of all the issues Dynamics of Institutional Change in Emerging Market

Economies Nezameddin Faghih, Ali Hussein Samadi, 2021-04-08 Economic social political and cultural institutions and institutional change reflect shared journeys of humanity throughout history This edited volume explores dynamics trends and implications of institutional change in emerging markets by focusing on theories concepts and mechanisms of institutional development Presenting research by eminent scholars and experts engaged in education and research they address and discuss the most recent issues in the field reveals new insights into the dynamics of institutional change for researchers interested in development of new theories and comparative studies especially in the era of emerging markets Topics range from dynamics of institutional change and development within the Group of Twenty G20 and the European Union with an assessment of Brexit impact to institutional quality measurement public administration reforms as well as emergent topics such as the effects of energy and globalization It provides new international business theories and sheds light on the way to global peace by producing a better understanding of the dynamics of historical change The book is intended for a wide range of global audience and should serve as a useful reference in education and research offering innovative and productive discussions as well as satisfy scholarly and intellectual interests regarding institutional development and a broad spectrum of its interactions with functioning of markets and economies

**Broadband Telecommunications Technologies and Management** Riaz Esmailzadeh, 2016-03-04 The focus of this book is broadband telecommunications both fixed DSL fiber and wireless 1G 4G It uniquely covers the broadband telecom field from technological business and policy angles The reader learns about the necessary technologies to a certain depth in order to be able to evaluate and analyse competing technologies The student can then apply the results of the technology analysis to business revenues and costs market size etc to evaluate how successful a technology may be in the market place Technology and business analyses lead to policy analysis and how government deal with rolling out of broadband networks content such as text audio and video delivered over them Furthermore how government may ensure a competitive and fair environment is maintained for service provision The book is unique in its approach as it prepares the student to evaluate products from three different viewpoints of technology business and policy The book provides a unified vision for broadband communications offering the required background as well a description of existing broadband systems finishing with a business scenario The book breaks new ground by discussing telecommunication technologies in a business and policy context

**China's Global Quest for Resources** Fengshi Wu, Hongzhou Zhang, 2016-11-18 The world's key resources of energy food and water which are closely connected and interdependent on each other are coming under increasing pressure as a result of increasing population development and climate change In the case of China following its recent economic surge energy food and water are already nearing the point of shortage This book considers how China is working to avoid shortages of energy food and water and the effect this is having internationally Subjects covered include domestic policy debates on China's resource strategies challenges for managing transboundary waters related to China responses from various regions and countries to China's Go Out strategy

and China's increasing energy links with Russia and declining agricultural trade with the United States. The book concludes by discussing in comparative perspective China's outward resource acquisition activities and the consequent policy implications. *Paradigm Shifts in Chinese Studies* Shiping Hua, 2022-02-06. This book is a study of the change and continuity in paradigms in China studies both inside and outside of China.

In the last few years the United States and China appeared to be moving in the direction of decoupling, indicating that the engagement policy with China in the last four decades is ending. The modernization theory that is the theoretical foundation of the engagement policy has proved to be insufficient. This situation calls for a reexamination of the field of China studies. Historically, scholarly paradigms shifts often went hand in hand with drastic social change. As we have entered an era of great uncertainty, it is constructive to reflect on the paradigms in China studies in the past and explore the possibility of new paradigms in the future. How are the shifts of major theories, methods, and paradigms in China studies in the west related to social change? How did some of China's paradigms impact on the country's social change and developments? This book will appeal to a wide readership including scholars and graduate students, upper division undergraduate students of China studies, Asian studies. **Exploitation of**

**Unconventional Oil and Gas Resources** Kenneth Imo-Imo Israel Eshiet, 2019-07-10. The stimulation of unconventional hydrocarbon reservoirs is proven to improve their productivity to an extent that has rendered them economically viable. Generally, the stimulation design is a complex process dependent on intertwining factors such as the history of the formation rock and reservoir fluid type, lithology, and structural layout of the formation, cost, time, etc. A holistic grasp of these can be daunting, especially for people without sufficient experience and/or expertise in the exploitation of unconventional hydrocarbon reserves. This book presents the key facets integral to producing unconventional resources and how the different components if pieced together can be used to create an integrated stimulation design. Areas covered are as follows: stimulation methods, fracturing fluids, mixing and behavior of reservoir fluids, assessment of reservoir performance, integration of surface drilling data, estimation of geomechanical properties and hydrocarbon saturation, and health and safety. *Exploitation of Unconventional Oil and Gas Resources: Hydraulic Fracturing and Other Recovery and Assessment Techniques* is an excellent introduction to the subject area of unconventional oil and gas reservoirs but it also complements existing information in the same discipline. It is an essential text for higher education students and professionals in academia, research, and the industry. **Research Handbook on the Belt and Road Initiative** Chinyong Liow, Joseph Liu, Hong Xue, Gong, 2021-10-26. This timely Research Handbook investigates the radically transformative impact of the Belt and Road Initiative (BRI) addressing key questions regarding its economic, political, and strategic consequences: what does the Chinese government hope to achieve with the BRI? How have recipient states responded? And what are its potential opportunities and risks?

**China** Gungwu Wang, Yongnian Zheng, 2013. China has achieved significant socio-economic progress and has become a key player on the international stage after several decades of open door and reform policy. Looking beyond China's

transformation this book focusses on the theme of governance which is widely regarded as the next most critical element to ensure that China's growth remains sustainable Today China is confronted with a host of pressing challenges that call for urgent attention These include the need to rebalance and restructure the economy the widening income gaps the poor integration of migrant populations in the urban areas insufficient public housing and healthcare coverage the seeming lack of political reforms and the degree of environmental degradation In the foreign policy arena China is likewise under pressure to do more to address global concerns while not appearing to be overly aggressive The next steps that China takes would have a great deal to do with governance in terms of how it tackles or fails to address the myriad of challenges both domestic and foreign China Development and Governance with 57 short chapters in total is based on up to date scholarly research written in a readable and concise style Besides China's domestic developments it also covers China's external relations with the United States Japan Korea and Taiwan Non specialists in particular should find this volume accessible and useful in keeping up with fast changing developments in East Asia

*Reform, Opening-up and China's Changing Role in Global Governance* Yuyan Zhang, 2021-02-08 This book looks back to 40 years ago for the whole history of China's reform and opening up and focuses on the role change of China in the relationship with outside world In the first half part the author explores China's economic reform and opening up policy from theoretical analysis and systematic interpretation In the second part the author aims to present how China's international roles have changed in recent years and the Chinese appeal and purpose of participating in and improving global governance procedure The author answers the question of why China has obtained miraculous achievements after its reform and opening up from academic perspective and provides representative cases with profound but not obscure theoretical interpretation It is a must read for anyone who is interested in contemporary China's economy and foreign affairs

**Chinese Politics as Fragmented Authoritarianism** Kjeld Erik Brødsgaard, 2016-10-04 This book explores how far the concept of fragmented authoritarianism remains valid as the key concept for understanding how the Chinese political process works It contrasts fragmented authoritarianism which places bureaucratic bargaining at the centre of policy making arguing that the goals and interests of the implementing agencies have to be incorporated into a policy if implementation is to be secured with other characterisations of China's political process Individual chapters consider fragmented authoritarianism at work in a range of key policy areas including energy issues climate change and environmental management financial reform and civil military relations The book also explores policy making at the national provincial city and local levels debates how far the model of fragmented authoritarianism is valid in its current form or whether modifications are needed and discusses whether the system of policy making and implementation is overcomplicated unwieldy and ineffective or whether it is constructive in enabling widespread consultation and scope for imagination flexibility and variation

*China's New Public Health Insurance* Armin Müller, 2016-11-25 Especially since the 2003 SARS crisis China's healthcare system has become a growing source of concern both for citizens and the Chinese government

China's once praised public health services have deteriorated into a system driven by economic constraints in which poor people often fail to get access and middle income households risk to be dragged into poverty by the rising costs of care. The New Rural Cooperative Medical System (NRCMS) was introduced to counter these tendencies and constitutes the main system of public health insurance in China today. This book outlines the nature of the system, traces the processes of its enactment and implementation, and discusses its strengths and weaknesses. It argues that the contested nature of the fields of health policy and social security has long been overlooked and reinterprets the NRCMS as a compromise between opposing political interests. Furthermore, it argues that structural institutional misfits facilitate fiscal imbalances and a culture of non-compliance in local health policy, which distort the outcomes of the implementation and limit the effectiveness of insurance. These dynamics also raise fundamental questions regarding the effectiveness of other areas of the comprehensive New Health Reform which China has initiated to overhaul its healthcare system.
